BRICKS.—After finishing the weekly canvass of the market it reveals simply the same old general run of prices and the familiar story in regard to general conditions of trade. Some days there is a little further demand, upon others a shrinkage, and at one time a few receivers seem to get all the orders, while others wait and then turn about, but on the average the movement varies very little and can always be promptly met from the supply of stock in hand. Quality continues good, and it is extremely rare that buyers think well enough of any one make to pay a premium for it. Pales moderately active at former rates, but not many coming forward unless specially ordered. Reports of stoppage of work are reported, but there has thus far been no curtailment of shipments sufficient to influence the market, and until the barges actually commence to lay up will there be a belief that manufacturers are quitting for the season.

GLASS.—The local market is somewhat more active and firmer, but without unusual feature. A meeting of manufacturers of the Western District has been in session in Cleveland, Ohio, this week. Some forty factories were represented, including all those of any prominence in the district. Of the 1,451 pots in the Western district, only about 500 were not represented. About 20,000 men will be affected by the action of the Wages Committee. There was much feeling because the glass workers made a settlement with an individual manufacturer at wages lower than they offered the regularly authorized Wages Committee of the manufacturers, and there was a strong sentiment in favor of the manufacturers treating directly with individual workers in the settlement and starting three or four non-union factories, having the moral and financial support of the rest of the manufacturers. This would be a startling departure in the window glass business. The movement has not taken practical form, but is being considered. The new scale, as accepted by a few manufacturers, was thoroughly discussed, and all agreed that it was simply impossible to make glass and compete with the foreign product under the red reef tariff. The entire wages matter was left in the hands of the Wages Committee, with full authority to act.

LATHS.—There has been a great deal of irregularity since last report, with prices named on a range of 10 to 15c, between extremes, some lots touching \$1.85 it is said, but of late conditions are not quite so stiff, and on a cargo basis \$1.70 to 1.75 is high enough to quote. Demand runs about as before, no open call developing until buyers fully feel the want of stock, but as there is said to be a probability of fuller suburban consumption there is chance of fair business if supplies do not come along too rapidly and of that sellers claim there is little danger. The following from Washington, under date of August 30, will interest the trade: A cargo of laths from Canada arrived at the port of Georgetown, D. C., this morning, the first cargo of its kind to arrive in the United States as far as the Treasury is advised, since the new tariff went into effect. Laths are placed upon the free list under the new tariff, provided the country whence exported does not exact an export duty on them. This, it is said, Canada does, so Collector Manogue at Georgetown, after consulting with the Treasury officials, imposed the rate of the McKinley law, 15 cents per 1,000 pieces.

LIME.—The most important feature of the market is the break up of the combination of Eastern manufacturers and the opening of the market once more to general offerings and competition. This dissolution is not due to any mismanagement of the association's agent here, who has handled affairs to the best possible advantage under existing conditions and made himself popular with the trade in general, but seems to be the result of the generally unpropitious state of business with possibly some injudicious forwarding of stock at times, and a culmination at a point, where instead of dividends expected there comes a call for assessment, and then the parting of the compact. There seems to be an assumption that eventually the opening of the opportunity for promiscuous offering must weaken the market, but just now the tone is firm at full former rates. Lump in particular is wanted, but common a close enough second to keep all the fresh arrivals cleaned up.

LUMBER.—There is a somewhat better tone noticeable in the reports of a portion of the trade. They have found a greater number of customers calling for stock that will be worked pretty

promptly into consumption, and while the purchases were principally in small lots, there was more of them to help swell the aggregate and any gain is hailed with delight. There is even a report of an addition to demand for building grades, most marked in the suburban districts, although nothing to indicate that the fall trade will be extensive. Yard prices remain very irregular, as every dealer drives a bargain to suit the immediate trade in hand, and even the spruce list is still so often evaded as to be practically useless, although some dealers make a strong effort to stand by the agreement.

In bulk lot parcels, dealings are not very progressive. Direct demand is small and indifferent, and the selling side of the market is evidently not yet prepared to take particularly aggressive action. Resident agents who are right on the ground and in close touch with the entire trade know well enough how useless it would be to endeavor forcing matters, and they hope that traveling men also will not consider the market a good working field this autumn, unless business improves into much greater proportions than any one now has an idea of. Supplies are arriving gradually and going into yards, and there is a hint that a great many dealers are already owners of about all the stock they will want this fall, having been quietly picking up bargains all the season to be ordered forward at convenient periods.

The present export demand is only fair, but there are some promises of an early gain on South American orders.

Lumbermen in common with the general business community are pleased with the final settlement of the tariff matter no matter how much they may object to many of the provisions of the bill. It will permit calculations for some little time ahead without danger of unexpected legislative interference, and that certainly is a great boon. Regarding free trade lumber there is noticeable much the same different feeling which prevailed when the idea was first brought out and there will probably be no immediate effect upon this market. Indeed some leading parties in close touch with the trade across the border consider that the depression of values occasioned by the poor state of trade already discounts a large portion of the duty removed and whatever may be left the Canadians will manage to absorb themselves.

It may be of interest and useful for convenient reference to give the lumber schedule as it stands in the new tariff bill, and place in comparison the old law, which we do as follows:

WOOD.

672. Logs, and round unmanufactured timber not specially enumerated or provided for in this Act.

Old law.—Free of duty.

673. Firewood, handle bolts, heading bolts, stave bolts, and shingle bolts, hop poles, fence posts, railroad ties, ship timber, and ship planking, not specially provided for in this Act.

Old law.—Free of duty.

674. Timber, hewn and sawed, and timber used for spars and in building wharves.

Old law.—Ten per cent.

675. Timber, squared or sided.

Old law.—One-half cent per cubic foot.

676. Sawed boards, plank, deals and other lumber, rough or dressed, except boards, plank, deals and other lumber of cedar, lignum-vitæ, lancewood, ebony, box, granadilla, mahogany, rosewood, satinwood, and all other cabinet woods.

Old law.—One dollar per thousand feet board measure.

677. Pine clapboards.

Old law.—One dollar per thousand.

678. Spruce clapboards.

Old law.—One dollar and fifty cents per thousand.

679. Hubs for wheels, posts, last blocks, wagon blocks, car blocks, gun blocks, heading, and all like blocks or sticks, rough hewn or sawed only.

Old law.—Twenty per cent.

680. Laths.

Old law.—Fifteen cents per thousand.

681. Pickets and palings.

Old law.—Ten per cent.

682. Shingles.

Old law.—White pine shingles, twenty cents per one thousand; all other, thirty cents per one thousand.

683. Staves of wood of all kinds, wood unmanufactured: Provided, That all of the articles mentioned in paragraphs six hundred and seventy-two to six hundred and eighty-three, inclusive, when imported from any country which lays an export duty or imposes discriminating stumpage dues on any of them, shall be subject to the duties existing prior to the passage of this Act.

Old law.—Ten per cent; proviso is new matter.

684. Woods, namely, cedar, lignum-vitæ, lancewood, ebony, box, granadilla, mahogany, rosewood, satin wood, and all forms of cabinet woods, in the log, rough or hewn; bamboo and rattan unmanufactured; briar root or briar wood, and similar wood unmanufactured, or not further manufactured than cut into blocks suitable for the articles into which they are intended to be converted; bamboo, reeds, and sticks of partridge, hair wood, plumto, orange, myrtle, and other woods, not otherwise specially provided for in this Act, in the rough, or not further manufactured than cut into lengths suitable for sticks for umbrellas, parasols, sun-shades, whips, or walking canes; and India malacca joints, not further manufactured than cut into suitable lengths for the manufactures into which they are intended to be converted.

Old law.—Free of duty.

A Washington special to a local journal says:

The question has already been raised whether Canadian lumber of any kind can be imported into the United States free of duty. The concluding proviso of the paragraphs relating to free lumber declares that all of the articles "when imported from any country which lays an export duty or imposes discriminating stumpage dues on any of them shall be subject to the duties existing prior to the passage of this Act." This relegates the whole schedule to McKinley rates in case an export duty can be discovered on logs, firewood, timber, sawed boards, or any kind of clapboards, hubs, laths, shingles, staves, or any one of a long list of articles. And Secretary Carlisle telegraphed to Ottawa to learn the exact status of the Canadian law and the decisions made under the law by the Governor in Council. It is well known that the Governor in Council has authority

to impose or remit duties on certain natural products, but whether any export duties are now imposed on any article of wood does not appear to be settled to the satisfaction of the Treasury officials.

It is expected that the Canadian Government will remit the export duties, if they exist, so that in all probability lumber will become free of duty.

GENERAL LUMBER NOTES.

STATE.

The Albany *Argus* reports

The lumber trade continues quiet, but, though there are no new features, the demand is fair and stocks dwindle away somewhat with continued shipments. This is more especially true concerning spruce, the receipts of which are limited, owing to the shut down of the mills on the upper Hudson. Local stocks, however, show good assortments as yet of all kinds.

THE WEST.

The Northwestern *Lumberman* as follows:

It looks as if the degree of revived requirement in the east, that has been lately observed, has arisen from the belief that, since fall is nearly here, there must be more call for lumber. As stocks are low dealers have thought it safe to put in a little lumber, and they have done so. In the wholesale line the approach of autumn has sent a considerable number of buyers from eastern points up the lakes. They have bought some lumber, and promise to return later and purchase more. At Cheboygan, Mich., 7,000,000 feet of stock has recently been sold to eastern parties, and the late heavy movement by cargo from Duluth indicates that a certain amount of provision for a fall trade is being made. It is likely, also, that in respect to white pine there is an apprehension that prices have touched the lowest point for the season, and that, to be safe, purchases may as well be made before a change shall come. Besides, lake rates are likely to advance from the present extremely low figure, and if lumber is to be got forward before such advance a beginning must soon be made.

At Chicago:

The market during the week was fully supplied, and, though the fleet was worked off without much delay, the demand could not be characterized as active. In fact, there was a tendency toward dragging and stickiness, which had a depressing effect on prices. It can be seen that there must be a change in the disposition of buyers or it will be necessary to withhold shipments to the market to some degree in order to permit it to recover its usual strength.

Within the past fortnight prices have sagged a trifle. Short piece stuff has been sold in considerable quantity at \$9 a thousand, though it is alleged that no good tallies have gone at that figure, but at the one recently prevalent, \$9.25. It is now safe to quote the value of short piece stuff at \$9 to \$9.25. Hemlock is dragging, with small demand for it at \$6 to \$6.50. Small timbers are \$9.50 and up. Nearly all the inch now arriving is dry stock, and our quotations have reference to that kind of lumber. The market for flat common inch lumber is rather weak, and prices do not stand up strong under pressure. Good inch lumber holds fairly firm, as it is known to be in comparatively short supply; at least that is the report made by buyers who go out to hunt for it.

The sag thus far has not been alarming, and may have resulted from too great an eagerness on the part of shippers to take advantage of the better condition of demand at large, which has been manifest this month. But the market has not yet sufficiently recovered from its sickness to have an all-consuming appetite; it will have to be fed carefully, and only in such quantity as it can bear.

Lake freight rates from Western Lake Superior ports have advanced a shilling a thousand, now being \$1.75 from Duluth, Ashland, Washburn, and probably from Ontonagon. It is not likely that the low rate of \$1.62½ will rule again this season, though some shippers claim that a less rate than \$1.75 can be secured if a sufficient effort be made.

Conditions in respect to poplar have not appreciably changed during the week. Manufacturers and dealers count on the moderate supply of both logs and lumber for the maintenance of prices. The demand is not sufficient to make an active market, though some late improvement is reported from Tennessee and Ohio River points. In the lower grades there is especial quietude, particularly at western points, because the furniture and kindred factories are consuming comparatively little. In the better grades there is a firm holding, since it is believed that there is no overburden of stock, and that it will all be wanted before many months have passed. In the Mississippi River towns the growing use of cottonwood is cutting away the demand for poplar to some degree. Yet, owing to the limitation of the poplar supply and the fact that the bulk of the product is in strong hands, all that is needed for an active market is a revival of the consuming industries until a normal state shall be reached.

The Mississippi Valley *Lumberman* as follows:

In the general prospects for better trade the lumber trade is sharing. Consumption seems to be reviving into country districts and many of the larger cities are now consuming more lumber than for over a year past, owing to the fact that capitalists are getting over their fright and are becoming anxious to invest their money in buildings because of the cheapness of labor and material. Crop reports, as the weeks go by and more of the details are obtainable, are much more encouraging than they were a few weeks ago, and the outlook for a prosperous fall among farmers of the northwest is good.

This is the time of the year when experience has shown that prices for lumber reach the lowest point. Since the first of February there has been a gradual decline of prices, at the rate of about a half dollar every two months, and as the usual turning point is not far ahead it is expected that the downward tendency has about reached the limit. There is one factor that may tend to keep prices down until later than usual this year, and that is the fact that there is a lighter demand than the average and the stocks are heavier than they were at this time last year. The light demand due to the strike during the month of July reduced the shipments to almost nothing, and

THE business revival, no bigger than a man's hand two months ago, has now reached such dimensions that everybody sees it, and at last it is recognized that once more the wheels of commerce are moving, slowly as yet, but none the less surely. The dry-goods jobbers say that the last fifteen days of business equal those of 1892, which were very large. This improvement is not local, but extends all over the country, with the possible exception of Nebraska, Iowa and a small part of Kansas where the corn crop failed. In the South there will be an increase of 800,000 bales of cotton, which increase alone will represent a very good business in handling, carting, etc. In the stock market there seems to be no general buying movement, and prices sag when realizations are attempted. The next signal for an advance will be when we begin to import gold, which naturally ought to be very soon. How quickly prices may return to better figures is shown by the very recent movement of the Pittsburg, Chicago, Cincinnati & St. Louis stock, which a year ago sold for about 20, and slowly declined to 13, remaining there for months, but a little buying movement taking place the price in a week rose to 20 and is there now. It is the same with Northern Pacific preferred, which recently advanced from 13 to 22, while it was months in falling to the first-named point. On the whole, it may be safely said that a substantial improvement has set in which gives every indication of being permanent.

EUROPEAN financial papers continue to be occupied with discussions of our tariff and its consequences to the trade of the countries they represent. The London Economist is not very enthusiastic over its probable effects on British trade, owing to the low prices already prevailing here. It takes tin plate, cotton ties, iron and steel to be most in question from that point of view. Of the first it says: Seeing that they have already made the larger proportion of the black plate tinned in America there is little reason to doubt that they will be able to overtake the production of all the black plate required, so long at least as the basis of prices is so near our own. South Wales makers may be disappointed if they anticipate any very great immediate benefit from the change in the tariff, and we think it would be wise to keep prices moderate so as to check the new industry which has sprung up in America. In cotton ties the English manufacturer could find no comfort because prices on both sides of the Atlantic were so nearly equal. The reduction of the duty on pig iron from \$6.72 to \$4 was not likely to help English trade at present. English iron of the same quality as No. 1 American and Bessemer would cost \$4 more than the product of the home furnaces and mills laid down in New York. Harvest time has not yet brought the demand for money which the banks expected, and a new process of piling up has begun at the great European financial centres; the Bank of England surplus continues to make new precedents in proportion to liabilities. Discount rates as a consequence remain low, and business gives signs of relapsing into dullness. If Secretary Carlisle wants \$50,000,000 or even double that to put his gold surplus on a proper foundation it can now be had easily and cheaply. A westward movement of gold would be hailed as affording a gratifying relief to the choked European money markets, and as matters now stand there would be no danger of its being demanded back again for some time to come. The Austrian

public is fighting against the use of silver in place of the one-florin notes they have become accustomed to, but this absurd prejudice toward the white-metal money will not endure long. This is what we would have to expect in our Eastern States if our \$1 and \$2 bills were retired to make way for a larger use of silver, as they ought to be.

RICHMOND TERMINAL, a name which has had such a disturbing influence in financial circles and has been synonymous for disaster in the minds of investors for so long, will soon disappear entirely from the security lists, which places will happily know it no more. The Southern Railroad, in which is embraced all the lines, except the Georgia Central and some few others that were cast off or refused to come into the plan of reorganization, has been finally organized, and the securities of the new company which is to control it may be issued in the course of a month or two. If any regret is to be expressed regarding the substitution of one organization for another, it is that the process did not include an inquiry into the manner in which the old one was brought to the ground and the way in which deceived and defrauded security-holders could obtain recompense. Such a thing was apparently not to be because of the impossibility of getting stock and bondholders to act with any spirit even in their own interests. The Southern Railroad Company will start with a compact, though extensive railroad of 4,000 miles, with about 150 miles of water line besides owned directly by it, and leasing 500 more lines of railroad, with fixed charges cut down to recent net earning capacities and with a reserve of securities to provide equipment and improvements for some years to come. Moreover, the territory it operates being the first to feel the stress of the hard times that have weighted down commerce for some years past is now, under the stimulus of extensive economies and good crops, returning to prosperity at a rate, if not rapid, is at least satisfactory. Consequently if the new company is managed conservatively, it will make itself strong before another phase of adversity is likely to come upon it. The launching of this the first of the great bankrupt railroad enterprises into renewed solvency will be watched with interest both at home and abroad, because the results will show whether railroad managers of this country have learned a lesson by the past, or whether the old-time recklessness and dishonesty are to continue and the process of reorganization to go on over and over again as in the case of Reading and Atchison. An immediate influence of this reorganization is the encouragement of holders of securities of other bankrupt properties who may well feel cheered when some intrinsic merit can by any process be found in securities that once seemed so hopelessly placed as those of Richmond Terminal.

IT is an unwholesome and discouraging sign, that of the reported refusal of practically all those merchants who testified before the Lexow Committee to appear now and assist the Grand Jury to find indictments against the police officers to whom they had paid regular blackmail for "sidewalk privileges." It bears out the pessimistic view which has been advanced frequently, but always with reluctance in these columns, that New York City after all is governed in close conformance to the moral and intellectual standards of the bulk of the people. It is a sad enough disclosure which reveals prominent and wealthy merchants debauching the police in order to obtain small conveniences at the expense of their fellow citizens; but what are we to say when these men, having publicly testified to their own wrongdoing, refuse to make their confession effective toward producing a cleaner administration of the Police! Under such circumstances a reformer in New York must needs be furnished with unexhaustible confidence in his fellow-men and unconquerable faith in the long right arm of the Lord. The truth is, whether it be pleasant to us or not we have the government we deserve and a municipality of our own making. It is the most arrant hypocrisy to denounce officials whom reputable citizens have been busy bribing, and whom when occasion presents itself they refuse to testify against. Citizen and officer are tarred with the same brush. Let us at least retain the courage of our vices. Let us clear ourselves of cant, as Dr. Johnson advised, and not whine sanctoriously for "clean government" when the bulk of us do not want "clean government," which means the abolition of party rule in city affairs and the strict enforcement of the laws of the municipality. People don't want to do jury duty, pay their taxes to the uttermost cent, see the excise laws rigidly administered, and all those places that shall be mentioned here effectively closed, no sidewalks or streets occupied for the storage of goods and carts, no franchises taken and no contracts let save upon terms which amply satisfy the last just requirement of the city. In short, people don't really want clean government out and out. Everyone no doubt would not object to his neighbor being strictly looked after. The merchant whose goods encumber the side-

walk is ready enough to see the saloons closed on Sunday, and so on; but righteous indignation over six offenses of one's neighbors counts as nothing against the bribery one commits or the laxity one practises on one's own behalf.

ANOTHER bi-metallic conference has been held in London, at which there was a great deal of talking and very little said. This is not remarkable because it was characteristic of the other meetings of the party, which says a national currency can only be adequate and safe when it has, instead of one firm support, two legs of unequal strength. The result is especially disappointing in the last instance, however, because the conference was attended by two such well-known men as the Hon. W. C. Whitney and Mr. Lidderdale, late governor of the Bank of England, who so efficiently carried that institution through the Baring trouble. Mr. Whitney's work on this side of the Atlantic in public office and in large financial operations has been of quite a practical sort. It was, therefore, expected that these two gentlemen would have something very interesting to say and perhaps some convincing reasons to give for this espousal of the bi-metallic cause. But nothing of the sort; their remarks as reported contain nothing but stereotyped assertions about the necessity for a double standard and the usual threats of what injury is to follow to the commerce of the world unless it is soon adopted. The fact of Mr. Whitney and Mr. Lidderdale being found in such a crowd remains then a matter for wonder and the elevation of eyebrows. A knowledge of the processes of reasoning which brought them there would not necessarily alter this position toward the fact, indeed it might increase the wonder and physical indications of indulgence, but really an explanation of their position is due to the people who have a respect for their opinions judged from their conduct in the past. The conference had another point of interest in showing how the conferees regarded the steady increase in the world's supply of gold, forgetting apparently that they had hitherto used the fact of the limited output of gold as an argument in favor of the larger use of silver, they simply said the increased output of gold did not matter at all and went on with reiterations of their demand that the coinage of silver be made free at all the mints of the world.

ONLY a year ago, such a movement as that which has been started in Denver to defeat the Populist party in Colorado would not have been possible. The leader of that party was then in the height of his renown, having metaphorically dipped his horse's bridle in the blood of the East, amidst general applause in his State. All through the West there was much wild, ignorant talk of cutting loose from the moneyed power of the Atlantic States. This was not seriously intended, but it brought about at least some estrangement and the withdrawal of foreign loans taught Colorado what she was talking about and at the same time contributed a good deal to the distress from which both East and West have suffered. It is very doubtful if fifteen of the one hundred and fifty Denver business men could then have been induced to adopt the address which they have, by common consent, recently published to the electors of their State, asking them to relegate Governor Waite and his party to private life in order to regain the confidence of the East. There is nothing more satisfactory in life than to see mistakes acknowledged readily and generously; nothing is more helpful or more conducive to good feeling. The East will doubtless recognize this and extend its fullest and heartiest sympathy to the business men of Denver who have set about doing the thing that can help their State more than any other. Even if they are not fully and immediately successful these men of Denver will have done something for themselves and their neighbors; their good sense cannot fail to ultimately prevail, and their example will not be without effect upon the thinking parts of other crank-ridden States. Meantime the East will know that a powerful opposition is growing up against the continued rule of those witch-doctors of modern politics, the Waites, the Pfeffers and the Hatches, who have in a time of temporary derangement of the public faculties set the community by the ears by the sheer strength of impudence and what may be called their economical superstitions. The East is fully alive to the value of commercial friendship with the West and ready to respond to any advances made on the basis of good politics and sound finance.

If the Health Department is to keep us free of the soft coal smoke nuisance it must increase the efficiency of its system of inspection and carry it up town. The city is full of factories, small as well as large, and while they are in every district the latter are particularly thick near the fronts of the rivers. Such a violation of the law as was committed last winter by the Steam Heating Company in so conspicuous a place as Cortlandt street was easily and promptly detected. A similar offense by a small manufacturer in one of the side streets, near either of the rivers which flow around New York, might very easily escape the

attention of the officers of the department unless their search for such violation is constant and systematic. If the small manufacturers find immunity in the carelessness of the department, the large ones will hope to do so too, with the result that one day we shall be surprised to find that soft coal has come into general use in the remoter districts without accompanying precautions against its use becoming a nuisance and a danger to health. Abuses of this nature take root most easily and thrive most luxuriantly in the poorer quarters of the town, and it is in them that violations of any sanitary ordinances can most naturally be expected to be found because of the laxity of official attention as well as the indifference of their populations to things that would arouse bitter indignation in richer quarters. There are now some chimney shafts on the East River and adjacent streets giving off clouds that in appearance, smell and taste, resemble the smoke of bituminous coal enough to warrant scientific tests being applied and the securing of action according to the result. Any way, as the offense consists not in using any particular class of fuel, but in giving off smoke containing noxious gases and being an annoyance to the public, there can be found sufficient justification for a crusade by the Health officers among the manufactories of the city. If its citizens could only thoroughly appreciate how much the comfort and satisfaction of living in New York is due to the clearness of its atmosphere, they would not only see that the manufacturer's chimney shaft was kept innocent of offense, but also that every locomotive smoke stack should be equally free of harm, and that even the river tugs should not be allowed to pollute the air as they are doing by sending up huge clouds of black vapor and coal dust, and as a Federal tug does at the Barge Office daily.

AN electric locomotive, not a trolley with either overhead or underground wires, but a machine generating its own electricity has proved a mechanical success in France. Such a one is reported to have pulled a train of 180 tons with ease eight different times in two days over a distance of about twenty miles on the Western Railway between Havre and Benzeville-Breante, attaining at different times a speed of 40, 50 and 62½ miles an hour. The value of such a locomotive will depend on its ability to make better time at less cost than the ordinary steam engine. What it will have to do in the mere matter of drawing power, before it can be pronounced a success, may be seen from the reports of a trial recently made on the Missouri, Kansas & Texas Railway of a compound steam-engine specially made for that road. This engine drew a train of 363 tons, almost exactly double the weight of the train attached to the electric locomotive, at a speed of forty-eight miles an hour over a 50-foot grade, forty-one miles an hour over a 55-foot grade and thirty-eight to forty-five miles an hour over a 71-foot grade. While the achievements of the electric locomotive as recorded by its friends in France are very considerable, they can as yet only be taken as an evidence of advancement and promise for the future. It is still a long way from beating the record of the American steam locomotive, with the matter of cost quite unknown, but most probably against the new invention.

NOTWITHSTANDING the many exposures that have been made of bogus land schemes and the method of doing business adopted by many irresponsible projectors of so-called suburbs, it would appear that the list of confiding victims is still far from complete. It may be claimed that buyers who incautiously invest in lots in suburban localities that are as nearly inaccessible as they well can be or if within easy reach have nothing whatever to recommend them for settlement are undeserving of sympathy in that they reap only as they have sown, with their eyes wide open. But it must be remembered that many of the agents employed to sell worthless suburban property are but a degree better in a moral or conscientious sense than the average bunco steerer. Their methods of swindling the unsophisticated are almost identical. The land agent simply lacks the bunco man's effrontery, and instead of "playing for big stakes" is content to extract from the pockets of poor and ignorant, yet thrifty people, their hard-earned savings. The latest scheme that promises to be hauled up with a short run is that of a so-called "Land Improvement Company," dealing in Long Island wild and swamp land, with offices in a down-town building. The man who is president of the company sold lots in a tract near Babylon, L. I., which had been given an euphonious title. The company had given the original owner a purchase money mortgage on the land, but nevertheless sold lots on the installment plan, and when a lot was fully paid for obligingly gave the buyer a warranty deed. The property was recently foreclosed to satisfy the mortgage and the warranty deeds are now worthless, unless they become the means of sending the officers of the company to jail.

The Renting Season.

SMALL HOUSES AND MODERATE PRICED FLATS IN ACTIVE DEMAND.—

IMPROVEMENTS NEEDED IN MANY OLD HOUSES.—CONCESSIONS THE RULE ON HIGH-CLASS HOUSES.

A canvass made of the up-town brokers' and agents' offices last week by two observers of the real estate market resulted in two diametrically opposite impressions of the renting season. One came away with the conviction that every vacant house and flat was being eagerly sought after and would surely be rented before the close of the month at good figures. The other found that the season had not more than made a beginning and that rents were down below anything ever before known, with a dismal prospect of more vacant houses being carried over to another renting season than ever before. A more systematic and thorough inspection of the field this week shows that both were in a measure right and both wrong.

Under normal conditions the fall season in real estate opens with the return of the usual summer migratory part of the population to their homes in the city. Until within recent years these homes had been standing in readiness for their reoccupancy since early summer and there was not much of a renting business done in the fall. But of late years, as has frequently been observed in these columns, a very great change has taken and is taking place in the customs of New Yorkers in this respect. A much larger proportion of the population than ever before annually remove their entire household establishments from the city during the four, five and sometimes six months of warm weather. A considerable proportion of these people surrender old spring leaseholds every year with the intention of renting from the 1st of October thereafter, some for only eight months, but the most for periods of two, three or more years. Again, there is a growing disposition among the wealthier classes of tenants to maintain their permanent establishments in the suburbs, and to live during the opera season in the modern family hotels that have been established to meet this demand. Then, too, the result of every winter and spring season's operations in real estate is to transform a large number of former private residence properties into business or flat properties, driving their former dwellers to the newer residence sections up town. These almost invariably resign their old homes in the spring, go to the country for the summer, and return in August or September to look up new homes for occupancy in October. These are the usual conditions.

Last year and this there have been the additional incentives of a universal business depression to make changes in the renting seasons. In their efforts to meet reduced incomes with corresponding economies many owners of fine town houses discharged their servants and moved into less expensive establishments in the country, and offered their town houses for rent, furnished. Many of these owners, if they have returned to town at all, have taken quarters in the hotels, where their entire living expenses are met by the incomes from their rented houses. But what more directly affects the rental of houses is the fact that many former householders have abandoned expensive establishments and have gone to live in apartments and flats at from one-fifth to a-half their former expense for housekeeping. All these facts in conjunction had a year ago thrown upon the market a larger number of houses, chiefly of the better sort, than were ever before vacant at one time in this city. The larger proportion of these houses have been carried over unoccupied until the present season.

Now, however, there are many evidences of a change for the better. To a much greater extent than has generally been admitted business conditions were held in suspension pending the long protracted struggle over the tariff laws. Had this been settled a month earlier there is every reason to believe that the fall renting season would have begun at the usual time—about the 20th of August, and would have been at its height at this date. But the delay in its settlement postponed with a vast number of our business men the day of decision upon their winter's operations, upon which in turn depended the opening of establishments in town and the employment of operative forces. Thus the renting season was delayed from a fortnight to a month, and has only just begun to develop in good force and energy.

Without entering into details the result of our inquiries in most of the representative brokers' and agents' offices this week shows that the demand for houses and apartments has actively begun, and is much better now than it was a year ago. While there is a universal demand for lower rents tenants are obtaining concessions only upon the higher-priced houses and apartments. For the class of houses ranging between \$1,200 and \$2,000 per year the demand is so great that no concessions are obtainable. Above these figures, however, the season is still backward, and owners are so timid that first comers are likely to obtain reductions of from 10 to 20 per cent. But, even as to this class of houses, it is stoutly maintained by many agents that the condition of the house itself determines the extent of the concessions.

Throughout the district south of 59th street the complaint of the agents is well-nigh universal that the great majority of the houses are in no condition for the habitation of wealthy people. The complaint is strongest against the sanitary conditions of the houses. Most of them, it is declared, have had no material repairs in from five to ten years, have the old systems of plumbing, with dingy bath-rooms, zinc-lined bath-tubs, hidden lead pipes, soapstone or even wooden tubs, old ranges and no dumb-waiters or butler's pantries. Within the period mentioned there has come over the system of house construction and interior finish a vast change for the better, and people who have seen the interiors of our modern West Side dwellings are no longer to be satisfied with the ancient equipments. They demand exposed plumbing,

tiled and tile-wainscoted bath-rooms, porcelain tubs, ceramic sinks and laundry tubs, and generally brighter interiors. The lack of these in the older houses places them out of competition with those which have been renovated, and makes it impossible to rent the houses at the old rates. The complaint is general among the agents that owners refuse to make these obviously necessary improvements while yet expecting the old rentals.

In this section, too, agents are met by some very strong arguments for lower rents on the part of tenants of the best possible kind. A well-known banker who has occupied a house for six years, paying \$5,000 a year for it, offered \$3,500 for a renewed term and said: "I don't see why it is that house-owners should expect as large incomes from their properties in these times as they receive in times of general prosperity. Prices are down in every other direction and I look over my books and find that the salaries of all my employes are down from 20 to 50 per cent and my own income is smaller in proportion. Why then should I make an exception of my landlord? Why shouldn't he come down in his prices as other people have done?" The broker thought that in the end the banker would be given a concession of 10 per cent on the old figures for the ensuing year.

On the West Side the renting of small houses is said by many brokers to be as good as ever, but for houses ranging over \$2,000 in rental up to a year ago it will from present appearances be necessary to make concessions of from 10 to 20 per cent in the rents in order to secure tenants. Many who would renew their leases under such concessions threaten to give up their houses and move into flats unless the concessions are made. Still it is admitted that the demand has only just begun for the better class of houses and another fortnight may show a considerable improvement upon former conditions. In this and the middle section of the city there are not enough small houses to meet the demands for them, and the apartment houses are accordingly reaping the benefit. In the renting of flats and apartments the agents who make that a specialty report a lively demand, that has been on the increase ever since the middle of August. Prices are fairly well maintained, though the most desirable tenants are met half way in their demands for reduced rents. Altogether the consensus of opinion is that the renting season is later this year than usual by at least a fortnight; that small houses and moderate-priced flats hold their own fairly well and that concessions of from 10 to 20 per cent are being made on the higher-priced houses, the larger discount applying to the higher rents; but matters are steadily improving, and another fortnight will doubtless disclose a still better condition of the renting season.

OUR BUILDING LAWS.

Architects, builders, building operators and others interested in the building trades in Brooklyn, will be glad to learn that THE RECORD AND GUIDE edition of the new Building Laws of Brooklyn is now issued and for sale. Those who are familiar with the manner in which THE RECORD AND GUIDE editions of the Building Laws of New York have been compiled know what to expect—a handy volume, containing everything embraced within the State laws, municipal ordinances, and departmental regulations, with illustrations wherever they are helpful to declare the meaning of the text, and a directory of the Building Department. The laws and ordinances embrace those governing sanitation, drainage, water and other street connections, and the regulations of the Health Department also. Finally there is a complete index—a labor and time-saving convenience that is alone worth twice the price of the book, which is ready for delivery from the offices of THE RECORD AND GUIDE, Nos. 14 and 16 Vesey street, New York, and 276 Washington street, Brooklyn, at the uniform price of \$2.

Collections in the Tenements

M. & L. Jarnulowsky, whose experience of East Side tenement property is too well known to need description, confirm the opinions previously given in THE RECORD AND GUIDE of the better results obtained from tenement property than other classes. In course of conversation with one of our reporters recently they stated that the poorest class of tenements were the easiest to let and produced the best results. Up town, while the tenants paid as well as down town, they asked more in the way of additions and repairs. For every \$25 collected up town about \$8 had to be spent for the benefit of the tenants, whilst down town such expenditures from the same amount of rent collected did not amount to more than \$3. As a consequence better net returns could be obtained from the down town houses. To prove how well collections are kept up in the tenements they furnished the following figures, showing the amount received from a total of about \$4,000 per month, of which all but about \$200 was for tenements, at three different periods for the last five months:

	March.	April.	May.	June.	July.	August.
10th.....	\$1,910	\$2,100	\$2,125	\$1,800	\$1,675	\$1,880
20th.....	3,325	3,050	3,185	3,280	2,950	2,960
30th.....	4,090	3,650	3,980	3,925	3,533	3,900

* One house less than in other months.

Collections it will be seen are slow, the collector having to take his rent in installments as he can get it, but it nearly all eventually comes to his hand. There has been created considerable prejudice against tenement property by reports of the poverty of the people of the East Side tenement districts, but with the above figures as an example of what nearly all agents say is the case, it will be seen how misplaced this prejudice is.

We will bind copies of THE RECORD AND GUIDE in ½ morocco, 6 months, per vol., \$2 ½ sheep, \$1.75.—Binding Department, RECORD AND GUIDE 14 and 16 Vesey street,

How a Low Tax Rate is Made.

The tax rate for New York City this year will be \$1.79 on the hundred dollars of valuation. The Board of Aldermen so determined last week. This is the lowest tax rate the city has known for many years, and on its face bespeaks an economical and wise administration of the city's affairs. But no one's tax bills will be any less because of the lower rate, except those favored ones who have escaped an increase in the valuation of their properties for tax purposes. The reason the low rate is possible is that the assessed valuations were increased by over \$70,000,000.

But there is another view of this matter which has been overlooked, and which affords an explanation for the constantly decreasing tax rate. In 1886 the net bonded debt of the city was \$90,395,633.35, the lowest point it had reached since 1871. Then the total valuation of real and personal property was \$1,420,968,286 and the tax rate was \$2.29 per \$100 valuation. The tax levy for that year was \$32,421,550.15, and the total appropriations \$33,802,320.59, including \$7,456,184.37 of interest on the city debt, and \$1,199,606.15 for State taxes. That year, also, only \$2,250,000 was appropriated from the city's income from its franchises for the general purposes of the city. With an occasional relapse the tax rate has declined generally to the figure for this year—\$1.79.

But, in the meantime, the net bonded debt has been increased by over \$32,000,000, to \$122,778,073.21, and the assessed valuation for tax purposes has increased by over \$580,000,000. This year the tax levy is \$35,659,026.78 and the total appropriations \$38,664,257.69, including only \$5,134,199.59 for interest on the city debt and \$1,112,266.62 for State taxes. This year, also, \$3,600,000 is appropriated from the city's income for general purposes. Deducting State taxes and interest on the city debt from the total appropriations and there remains for the general expenses of the municipal government \$22,146,530 in 1886, and \$29,417,791 for the current year, an increase of over \$7,000,000, or a steady yearly increase of a million a year for the last seven years.

In recapitulation the figures are as follows:

Assessed valuation.....	1886	\$1,420,968,286
" " " " " " " " " " " "	1894	2,003,332,937
Increase.....		\$582,363,751
Net bonded debt.....	1886	\$90,395,633
" " " " " " " " " " " "	1894	122,778,073
Increase.....		\$32,382,440
Total appropriations.....	1886	\$33,802,320
" " " " " " " " " " " "	1894	38,664,257
Increase.....		\$4,861,937

State tax.....	1886	\$4,199,606
" " " " " " " " " " " "	1894	4,112,266
Decrease.....		\$87,340
Interest on city debt.....	1886	\$7,456,184
" " " " " " " " " " " "	1894	5,134,199
Decrease.....		\$2,321,985
Expenditures for general city purposes.....	1886	\$22,146,530
" " " " " " " " " " " "	1894	29,417,791
Increase.....		\$7,271,261
Tax rate.....	1886	\$2.29
" " " " " " " " " " " "	1894	1.79
Decrease.....		.50

It is manifest that by continuing the process revealed by these figures the city administration could juggle the tax rate down to a merely nominal figure. By continually issuing bonds, and out of their proceeds paying the expenses of the city government; by appropriating all the revenues from franchises, rents, licenses, etc.; by adding a few hundred millions to the assessed valuations—in effect, by carrying the process of the present and other recent city administrations a little farther, the tax rate could easily be reduced to \$1 per \$100 of valuation. But what about the future?

Notice to Property-Owners.

One Hundred and Twelfth street, between the Boulevard and Riverside avenue. The estimate and assessment relative to acquiring title have been completed and report of commission will be presented to the Supreme Court for confirmation on October 8th. Objections to same must be verified and presented in writing by the 20th inst.

Emerson street, opening from Seaman to Amsterdam (10th) avenue. One Hundred and Sixty-fourth street, opening from Edgecombe road to Amsterdam avenue.

Boscobel avenue, opening from bridge over Harlem River at 181st street, to Jerome avenue. Assessments have been confirmed and are now payable. If paid by the 24th inst., in the case of Emerson street and Boscobel avenue, and by October 1st, in the case of 164th street, no interest will be charged. After the dates mentioned interest at the rate of 7 per cent will be charged from the respective dates of entry, July 26th and August 2d.

THE RECORD AND GUIDE edition of the Building Laws and Ordinances of Brooklyn, with illustrations and a complete index, by which one is enabled to find at a glance just what he is looking for, is now ready for delivery at the offices of THE RECORD AND GUIDE, 14 and 16 Vesey street, New York, and 276 Washington street, Brooklyn, at the uniform price of \$2.

The "Steeple Building."

Unique in many respects, of scientific construction, at once a landmark and a trademark, is the latest addition to the new publishing and manufacturing district.

In no quarter of the city has rebuilding been so active during these two years as in the section between the wholesale and retail dry-goods districts. That which was, within the lifetime of men still prominent in metropolitan affairs, the fashionable residence section of New York City, has been compelled to yield to the inexorable demands of trade and manufacturers and, beginning gradually, is now being rapidly rebuilt for mercantile and manufacturing purposes. Every month sees some new business establishment added to the many already permanently located there.

Manufacturers and publishers with their auxiliary branches began about five years ago to come together in the district between Broadway and 6th avenue and 10th and 16th streets, and are now there in such numbers as almost to create a new centre. As the process of reconstructing the lower wards goes on, printing offices, lithographers, publishing houses and clothing and other manufacturing establishments, released from their obligations as tenants in the old, dismal, comfortless and inconvenient structures, are finding new locations in this new district. One of the most satisfactory features of this trade migration is that it involves new and better, vastly better, sanitary conditions for the large army of operatives. Humanitarianism in its best and most practical phase finds no better example than in the new buildings devoted to industrial pursuits. Light, ventila-

tion advantage. With a frontage of 15 feet on 13th street, it runs back 116 feet 8 inches, by diverging side lines, to a rear line of 82 feet 7 inches, covering an area of more than 4,100 square feet.

The building was designed and built in the most solid and enduring manner as an investment, in conformity with the time honored adage: "the best is always the cheapest." Its walls are thick and solid and of selected materials. The first floor is steel beams and girders, with fire-proof floor arches, and the other stories are of first-class mill construction, with double floors 3 inches thick. The massive beams, of selected dressed timber, in view, afford no lurking places for fire or vermin. The first layer of the floors is of dressed and matched 2-inch North Carolina pine, and between that and top layer (also of matched pine) is a double thickness of fire-proofing, just the sort of construction to carry machinery and heavy stocks. While the *slow combustion construction* will command the lowest rates of insurance, as additional safeguards, the building has been equipped with automatic sprinklers supplied with water from one of the large tanks in the tower, also with ironclad shutters at all rear and side windows.

It is equipped with two boilers of 300 horse power capacity and other modern furnishings and conveniences. Accompanying illustration shows the front elevation, which is of granite in the two lower stories with buff brick and stone above. A broad ornamental entrance leads to a spacious vestibule attractively finished with marble, wainscoted and asphalted floor. At the rear of vestibule is a spacious elevator, designed for both freight and passenger service,

tion and drainage that were in the former days matters of minor consideration, are the main factors in every new design. When a workman moves into one of these new buildings he moves into more wholesome conditions of daily employment, into better light and better air, and is a more cheerful and spirited man for the change. There the employer gets his benefit.

The most recently completed and one of the most striking of the new buildings that adorn this district is the new "Steeple Building" which Mr. Hearn of 14th street has built at No. 40 West 13th street, south side, between 5th and 6th avenues. At first glance it seems a nine-story pile devoted to secular purposes, but that is because of its altogether unconventional appearance. Messrs. J. B. Snook & Sons, the architects, have given us an example of the possibilities of Gothic art in a business structure, and the result is pleasant beyond belief. Perhaps, if they had had a lot of conventional rectangular shapes to deal with, the result might not have been so happy. As it is the "Steeple Building," so different in appearance from the neighboring structures, is so strikingly agreeable by contrast that it catches the eye and the attention as Grace Church does in Broadway. In its district it is destined to become just such a landmark. It is in substantial and important reality a model modern business structure, 122 feet high, seven stories above basement, exclusive of tower, from which it takes its name, the "Steeple Building."

Standing upon and conforming to a plot of extraordinary shape, which at first sight might have been considered a drawback, but which in the hands of skillful architects is found to have been a dis-

and on the opposite side the main stairway. The elevator shaft is fire-proof. Between it and the front is the tower or "Steeple" which on every story is specially adapted for office purposes. Each floor is equipped with steam heating pipes and two light toilet rooms, with exposed sanitary plumbing of the best quality. The building sets back from the lot line on every side and has from seventeen to nineteen large windows on every floor, set clear to ceiling, a scientific improvement, insuring the best light and ventilation at all times. A permanent, broad, fixed iron escape with steps skirts the western wall, terminating on the roof of a one-story triangular extension. The basement, finished with concreted floor, is unusually light and available for business purposes. Besides the main chimney in one of the rear corners there are small flues at convenient intervals for gas stoves or bench forges or crucibles.

The "Steeple Building" is available for manufacturing and commercial purposes, and will be rented in whole or part. Centrally located in the district mentioned, with assurance of a continued increase for years to come in the nearby market for its products, accessible by many lines of street and elevated railroads in Broadway, University place, 6th avenue and 14th street, and adjoining a densely-populated labor market, with the United States postal station "O" only 75 feet distant, no one about to change to or establish a new location will do himself justice without inspecting this property. Further particulars will be supplied on application to Mr. Clarkson Cowl, of the firm of James A. Hearn & Son, at their stores in 14th and 13th streets.

Questions and Answers.

Correspondents who do not find answers to their communications in this paper must please refer to future issues.

To the Editor of THE RECORD AND GUIDE:

Being a constant reader of your valuable paper permit me to inquire who are wholesale dealers in dogwood and what the ruling price is, and if it is dried when shipped?

Answer.—Dogwood has no market value here; no one deals in it; is used mainly for making shuttles, knife handles and similar small work. Probably could obtain some information by writing to Providence and Fall River mills. The supply is ample; most likely cut near place of manufacture, where logs can be turned out in dimensions to suit the local requirements.

BROKER'S COMMISSION.

To the Editor of THE RECORD AND GUIDE:

Eight months ago I got a verbal order from a lady to sell her house for \$12,000, but not to sell it to her next door neighbor who wanted to buy the same. I got a buyer and spoke to the lady that my customer could not buy right away, but would strike a bargain in about 14 days, to which the lady consented. After 14 days, when I appointed a time for landlady and my man to meet, I was informed by the lady's husband that she had sold the house that morning for \$10,000 to a party who sold it in the afternoon to the neighbor whom she did not want to sell it to. The lady received a check for \$10,000, signed by her neighbor. Can I claim my commission on that sale and for how much?

Answer.—We do not think you are entitled to any commission.—

Obituary.

SIMON STEVENS.

Simon Stevens, a well-known lawyer of this city, who was widely known in the real estate field as an authority on riparian titles and a manager of water-front properties, died Tuesday week at his residence, No. 37 East 20th street. Mr. Stevens was a native of Barnet, Vt., where he was born in 1825. He was a cousin of Thaddeus Stevens, the famous jurist, under whose supervision he studied law and was admitted to the bar. After a period of residence and practice in Washington Mr. Stevens came to New York, which has been his residence nearly thirty-five years. He became an intimate friend of Horace Greeley, and the two formed a habit of breaking fast together on Sunday mornings—a custom observed during many years. About two years ago Mr. Stevens presented before the local authorities a proposition to fill up the Harlem River and convert it into a great boulevard. The scheme was elaborately presented, with maps and printed arguments, and attracted a great deal of attention at the time. Mr. Stevens was a member of the New York Historical Society, an honorary member of the American Society of Civil Engineers and of the Indiana Historical Society.

BERNHARD GRUNHUT.

Dr. Bernhard Grunhut's mysterious disappearance from the trans-Atlantic steamer *Bothnia*, a fortnight ago, while on the return voyage from Liverpool, has recalled in a startling manner the death of Ascher Weinstein under strikingly similar circumstances. Dr. Grunhut, who was about forty years old, gave up his medical practice about three years ago and began to dabble in real estate, first alone, and then, in a rather more extensive way, as a member of the firm of Sammet, Grunhut & Co., at No. 153 Broadway. The firm was supposed to be generally successful in its operations, and the cause of Dr. Grunhut's suicide, if such it was, is a mystery to his acquaintances, except as it may be explained by the fact that he was divorced about two years ago, and about a year after was married a second time to a woman with whom his relatives claimed no acquaintance. His health failed shortly after, and in the desire to regain it he went to Europe, as stated.

THOMAS GEARTY.

On August 26th, at his residence, No. 52 West 97th street, died Thomas Gearty, a well-known builder and contractor, in the 63d year of his age. Mr. Gearty first became identified with the building industries in the bluestone branch, many years ago, when he operated a yard at 2d avenue and 43d street. Later he engaged extensively in contracting on public and private works, and of late years turned his attention to building. He was buried on Wednesday, from the Church of the Holy Name.

JAMES S. CONOVER.

On Monday, at his home in Stratford, Conn., died James S. Conover, a pioneer in one of the important branches of the building industry in this city. Mr. Conover was born in Freehold, N. Y., in 1819. Twenty-five years later he established the firm in Canal street which in the after years became known throughout the country as a representative house in the manufacture and sale of ornamental grates and wood mantles. At first it was Conover & Wooley; then in 1870, on the admission of A. F. Conover to the firm, it became Conover, Wooley & Co.; in 1876 Mr. Wooley retired and the firm name became J. S. Conover & Co. It removed then to 28 and 30 West 23d street, where it continued until July, 1893, when under stress of the prevailing panic it was forced to assign. Mr. Conover's long business career in New York City brought him a host of friends among all classes, but chiefly among the merchants and business men of his own generation, who will be sorry to learn of his demise.

The widow and a son, Alonzo E., and a grandson, W. E. Conover, and James W. Conover are among the surviving relatives.

Personals.

M. C. Baum has returned to town after a six weeks' sojourn at the Windsor Hotel, Sea Cliff, L. I.

James A. Frame has spent the summer at the grounds of the Forest Lake Club, Pike county, Pa., and will prolong his visit there about two weeks longer.

Mr. Richard V. Harnett, who has been summering at Saratoga, will leave for the city on the 15th inst.

Mr. D. L. Einstein has been sojourning in Europe. His travels have now taken him to London.

Mr. H. J. Burchell is in town again after a refreshing outing at Lake George.

Mr. A. Bellamy has returned to the city from Vermont.

Mr. Henry Brash, who was at Delaware Water Gap during the vacation season, has returned to the city.

Mr. Henry A. Hurlbut is back to town from Saratoga, where he spent the summer.

Mr. M. Schrenkeisen is in town again after a vacation spent near Hunter, N. Y.

Mr. H. Mandelbaum is again receiving his mail at his city address.

Mr. J. L. Ritterband is back in town from his summer sojourn at Atlantic Highlands.

Worth Knowing.

The Title Guarantee and Trust Co. have opened a branch office at No. 211 West 125th street, for the convenience of Harlem builders, borrowers on bond and mortgage and investors in selected mortgages. Mr. G. M. Gillies is in charge of the 125th street branch. About sixty million dollars have been loaned by The Title Guarantee and Trust Co. during the past four years.

THE RECORD AND GUIDE edition of the *Building Laws and Ordinances of Brooklyn*, with illustrations and a complete index, by which one is enabled to find at a glance just what he is looking for, is now ready for delivery at the offices of THE RECORD AND GUIDE, 11 and 16 Vesey street, New York, and 276 Washington street, Brooklyn, at the uniform price of \$2.

Special Notice.

One of the results of the consolidation of all the Kings County towns into the Greater Brooklyn, has been to compel most of the real estate brokers to considerably enlarge their fields of operations. The wisest of them are not attempting to cover the whole vast territory of the new city, but are making themselves the masters of certain well-defined locations. Such is the case with the firm of John Reis & Co., whose main office, at No. 5 Willoughby street, covers the main part of the old town, while from their branch office at 805 Flatbush avenue, adjoining the Flatbush post-office, they keep expert eyes on the business of this former flourishing suburb and now 29th Ward of the enlarged city. John Reis & Co. have built very extensively in Flatbush and are by many years of experience qualified to render expert service to prospective investors and home-seekers. They have also a very large renting and collecting list of business properties in the vicinity of the City Hall. Mr. H. B. Davenport is the son of the late A. B. Davenport, who was in the real estate business in Brooklyn for forty years. He was associated with his father for twelve years and has had twenty years' experience in the business. Mr. Reis is thoroughly acquainted with Flatbush and other suburban properties.

"SHENANDOAH."

The Academy of Music opened the fall season last week to a jammed house, with a production that is likely to hold the boards for many months. The greater "Shenandoah" was presented for the first time. The curtain arose upon a beautiful and realistic panorama of the Shenandoah Valley, famous in rebellion history as the scene of some of the most hotly contested conflicts between the contending armies and immortalized in literature as the scene of Buchanan's "Sheridan's Ride." It is the background of the thrilling play that follows, with all the delightful lovers, brave boys in blue and gray, the panoply of war, the martial music and war songs that characterized the former production, and much added material in the way of new scenes and thrilling incidents. Three hundred people were employed in the production. There were cavalry charges, dashing orderlies, electric signals from Lookout Mountain, and through all the evolution of the love story that furnishes the strong romantic flavor of the play. The sentiment is lofty and true, and the play ought not to stop until everyone has seen it.

REMOVAL NOTICE.

The Eagle Cornice and Sky Light Works, of which Mr. N. Bois is the proprietor, has removed, under stress of necessity for more room and larger facilities, to new and commodious quarters at Nos. 30 and 32 Sullivan street, in a new building. Mr. Bois is an expert manufacturer of galvanized iron cornices, skylights, awnings, window caps, building fronts and architectural sheet metal work. His figures ought to be obtained by architects and builders before letting their contracts.

What are the legal requirements for fire-proof structures? For answer to this and all other questions within the scope of the Building Law, see THE RECORD AND GUIDE's special edition of the *New York Building Law*, arranged for ready reference. \$2.00. Nos. 14-16 Vesey street.

The sales of realty in the past few days were unusually well divided among the various uptown sections of the city. One transaction only is reported in property below 10th street. The purchases, however, include no parcels of special value, and compared with the business of the previous week, the market has apparently suffered a relapse. The week, to be sure, began with a holiday, but it does not seem as if that fact alone can be responsible for the sluggish condition that has prevailed since Tuesday. It may be the proverbial calm before the storm, in this instance storm meaning activity. Or it may be interpreted as demonstrating that there will be no ground this year for the upsetting of the tradition that September is the dullest month of the year for real estate.

The September auction market opened on Tuesday with a noticeable increased attendance. Their summer outings having ended, the regular habits of the salesroom were on hand in force with speculative instincts doubtless sharpened by a voluntary absence from the city for a month or two. There were also others present who made no secret of their desire to buy if bargains of the right sort could be had. But, alas! the properties offered not only on Tuesday but on the succeeding days as well failed to interest to any extent the would-be buyers. The plaintiffs and other parties interested in the various actions leading to enforced sales had, as usual of late, the field to themselves with scarcely a show of opposition. Of the several parcels knocked down since the beginning of the week only two of small value went to an outside bidder.

Peter F. Meyer & Co. adjourned on Wednesday a foreclosure sale of No. 179 West 102d street to the 17th inst., and a partition sale of property, 25x100, on the north side of 160th street, 300 feet west of Washington avenue, to October 9. On the same day the judgment in a foreclosure sale of the southwest corner of 1st avenue and 98th street was announced as settled. On Thursday, Peter F. Meyer & Co. postponed until the 20th inst. a foreclosure sale of No. 75 West 91st street, and William Kennelly adjourned sine die the similar sale of Nos. 406 to 412 East 104th street. On Friday, James L. Wells adjourned to the 18th inst. a foreclosure sale of Nos. 114 and 116 East 123d street.

James L. Wells will sell at auction, in partition proceedings, on Wednesday, September 19th, at 2 P. M., on the premises, at White-stone, Long Island, adjoining Cedar Cliff Park, 85 acres of water front property, part of the estate of Garret Nostrand, deceased; also at the same time and place ten acres of woodland at Flushing, on the Fresh Meadow road. Maps and full particulars of the property may be had of the auctioneer at his offices, No. 59 Liberty street.

Gossip of the Week.

SOUTH OF 59TH STREET.

Mandelbaum & Lewine have purchased from Good & Carpenter, Nos. 419 to 425 West 13th street, between 9th avenue and Washington street, a plot, 100x103.3, with one and three-story old and shallow buildings. They report the price agreed upon as about \$60,000. Martin E. Dotson was the broker. The same operators have bought of Lewis J. Manholt, executor, the leasehold property No. 253 Washington street, for about \$7,000.

Wilmerding & Field have sold for the estate of Samuel I. Prime to Dr. Murray the three-story and attic stone front dwelling, No. 32 West 39th street, on lot 25x98.9, for about \$58,000. The house was purchased in January, 1873, by the late Mr. Prime, for \$45,000.

Charles S. Brown has sold for the estate of W. C. Tuckerman, No. 37 East 29th street, a three-story dwelling, on lot 21x98.9, to J. R. Soley, for \$27,000.

Seton & Wissmann have closed a sale of the four-story stone front dwelling, No. 115 East 39th street, on lot 16.8x98.9.

The three and four-story brick stores and tenements, Nos. 114 to 118 4th avenue, and No. 70 East 12th street, with plot 45.4x44.9x 62x62.6, on the southwest corner of 4th avenue and 12th street, has been sold by the heirs of the late William H. Morss to Charles Connor, a tenant of a portion of the premises, for about \$75,000.

Martin E. Dotson has sold to Ransom Parker, No. 314 West 16th street, a frame building on lot 25x34x25.1x31.7.

S. Kemper & Bro. have sold for improvement, both the lot No. 133 East 17th street and the property No. 97 Perry street.

J. Edgar Leayercraft has purchased No. 269 South street, north side, 37.2 west of Jefferson street, a five-story brick warehouse, on lot 31.10x64.4, for \$45,900, giving in exchange a residence on West 82d street. This trade exposes the falsity of a report given out by a broker and published in THE RECORD AND GUIDE of July 28th. It was then represented that the South street property had been sold for Alexander Ayres to A. R. McMurray for \$60,000. Mr. McMurray may have bought the property and not yet taken title, but the figure made public must certainly have been intended to mislead.

NORTH OF 59TH STREET.

Max Simon has sold for W. H. Scott the two five-story stone front tenements, Nos. 67 and 69 West 101st street, 25x87x100.11 each; for Mr. Schneittecher the five-story stone front double flat, No. 128 West 90th street, 26.2x87x100.8, and for Henry Tonyan, No. 73 West 98th street, a five-story double flat, 26x68x100.11.

Hagan & Campbell have sold for Henry Felling, No. 100 East 107th street, southeast corner of Park avenue, a four-story double flat with stores, lot 30x100.11, to Christopher Stohldreier for \$26,500.

L. J. Phillips & Co. have sold for Michael Brennan to Orlando Jones the four-story stone front dwelling, No. 11 West 70th street, 20x60x100.5, for about \$38,000.

The three-story dwelling, No. 255 West 136th street, 17x50x 99.11, has been sold by Stabler & Smith, for R. B. Greenwood to a Mrs. Ridgeway, for about \$16,000. The same firm has sold for George J. Harlow to a Mr. Clare, No. 43 West 95th street, a three-story dwelling, 17x52x100, for about \$21,000.

John Davis has sold to Builder Samuel W. B. Smith a plot, 50x 100, on the west side of Amsterdam avenue, 25.11 north of 100th street, for \$23,000. The lots will be improved without delay. The same broker negotiated the sale reported last week of a lot on the south side of 120th street, 275 feet west of 5th avenue, for E. G. Bach to the same builder.

Cremie & Norton have sold to Builder Harry Chaffee, No. 207 West 70th street, a four-story dwelling, for \$27,500.

Frank L. Fisher has sold for Charles H. Parsons to Walter T. Pell, of the firm of A. G. Spalding & Bro., the four-story stone front dwelling, 20x55x102.2, No. 114 West 80th street, for \$34,000. This is the house referred to last week as No. 110 West 80th street, reported sold at \$32,000.

Bennett & Graff have disposed of, for Builders Livingston & Dunn, No. 332 West 88th street, a four-story limestone and brick front dwelling, 20x55x102.2, on terms not disclosed. The price is said to be between \$35,000 and \$40,000.

G. Tuoti & Co. have sold for J. Figliuolo, No. 342 East 115th street, a four-story brick single flat, 20x50x85, to M. Rossi and G. Tieno for \$9,500.

LEASES.

Tim & Co. have leased for Mrs. Isabella Field Judson the old Cyrus Field residence, No. 123 East 21st street, Gramercy Park, 33x102, to Mrs. L. J. Brown for five years, at about \$30,000 for the term; for Mrs. W. Sturgis the four-story residence, 21 West 34th street, 25x65 x100, to a Mrs. Alexander at \$1,800 per annum; for J. P. Marshall the three-story house, No. 234 West 51st street, 17x60x100, to Mrs. B. G. Ware at \$1,500 per annum; to Mrs. M. L. Rockwell the four-story English basement house, No. 310 West 51st street, for three years, at \$1,200 per annum; to Mrs. L. W. Ashleigh the three-story house, No. 104 West 43d street, 22.6x60x100, for three years, at about \$1,800 per annum; to Dr. J. Walker the store floor of 213 East 31th street, the three-story house, 355 West 28th street, for three years, at \$1,000 per annum, and the store No. 43 West 28th street for three years at \$1,200.

J. Arthur Fischer & Co. have effected the following leases: For Mrs. Benjamin to Nellie McHenry the three-story brownstone dwelling, 107 West 15th street, at \$1,600 per year; the four-story brownstone dwelling, No. 226 West 39th street, to Mrs. Van Brunt, for a term of three years, at \$1,500 per annum; No. 225 West 36th street, a three-story brick dwelling, to Mrs. Doherty, for a term of three years, at \$1,050 per year; No. 235 West 40th street, a three-story brick dwelling, to Mrs. Lucerne, at \$1,000; No. 260 West 39th street, a three-story brick dwelling, at \$1,000 per year, to Mrs. Margery Jacobs, for Messrs. Mandelbaum & Lewine the three-story brownstone dwelling, No. 264 West 40th street, to Mrs. Hewitt, at \$1,000 per annum, and the four-story English basement house, No. 243 West 42d street, to Dr. Schweig.

Ames & Co. have leased the following houses: For J. G. Wells, No. 207 West 38th street, at \$1,700, for three years, to Mr. Witbeck; for Mabel Clarke, No. 137 West 43d street, for three years, at \$2,400; for O. Buel, No. 122 West 44th street, for three years, at \$2,000, to Mrs. Wallack, and the four-story house, No. 208 West 25th street, for one year, at \$1,200.

Seton & Wissman have rented a furnished apartment in the "Wyoming," 166 West 55th street, to Mr. H. B. Anthony for the season.

NORTH SIDE.

Kaeppel & Brooker have sold for Annie M. Metzler a house and lot, 25x100, on the east side of Elsmere place, near Prospect avenue, to Herbert Eggleston, for \$6,500; and for John Somerville, the three-story frame houses and lots, Nos. 682 and 684 East 175th street, to Annie Helzel and George Zaser, respectively, for \$6,200 and \$6,350. The last-mentioned houses were held by the seller for two weeks and sold at a profit of \$750.

WESTCHESTER COUNTY.

Joseph Bierhoff, of this city, in conjunction with Schenck & Co., of Mt. Vernon, have sold a house and lot on North 10th avenue, near the White Plains road, for a Mr. Forster.

Out of Town.

G. Tuoti & Co. have made the following sales: For Drake & Post to C. Bergamo, lots 5 and 6, Richmond Terrace, Staten Island, for \$1,400; to G. Burgo, lots 1 and J, Arlington Manor, Staten Island, for \$500; for Maclay & Davies to M. Matera, lot 1, section B, at West Englewood, N. J., for \$750; to A. Di Flora, lots 1 and 2, block O, for \$200; to R. Santomenne, lots 3 and 4, block O, for \$309; for E. J. Woolsey to D. Pellegrino, lots 57 and 58, block A, at Astoria, L. I., for \$800; and to G. Dondrego, lot 61, block A, for \$400; for Drake & Post to P. Cirifeci, lots M and N, Arlington Manor, Staten Island, N. Y., for \$800.

Smith, No. 165 Broadway; architects, Neville & Bagge, No. 217 West 125th street. The specifications will call for inside blinds, structural and architectural iron-work, electric bells, speaking tubes, gas fixtures, dumb-waiters, interior marble work, decorated ceilings, steam heating, bath and laundry fittings, tiled vestibule and bath rooms, nickel-plated plumbing (exposed), skylight, refrigerators, ranges, probably hardwood mantles, and hardwood finish throughout.

Amsterdam avenue, west side, north of 100th street, two five-story brick and brownstone flats, 25x84 each; estimated cost, \$45,000. Condition—land just purchased; plans not started. Owner, S. W. B. Smith, 165 Broadway; architects, Neville & Bagge, 217 West 125th street. The buildings will be furnished with all modern improvements, including dumb-waiters, gas lighting, bath and laundry fittings, sanitary plumbing, skylights, electric bells, speaking tubes, ranges and probably steam heating.

Robbins avenue, east side, near 150th street, alteration and addition to two-story frame store; cost, \$1,800. Condition—no contracts let. Owner, M. Fritz; architect, W. C. Dickerson, 149th street

and 3d avenue. An extension, 17.5x22, will be added to rear of building and a new store front and foundation will be built. Bath fittings, electric bells, speaking tubes, pine flooring, gas fixtures and two ranges will be purchased.

Franklin avenue, west side, 119 feet north of 170th street, three three-story and basement brick and frame dwellings, 17x56 each; total cost, \$16,000. Condition—plans completed; no contracts let. Owner, L. O. Reeve; architect, M. J. Garvin, 3311 3d avenue. The specifications call for inside blinds, tin roofing, bath and laundry fittings, electric bells, speaking tubes, dumb-waiters, stained white-wood finish, concrete and spruce floors, grates, gas lighting, hardwood mantles, sanitary plumbing, ranges, skylights and tiled vestibules. Address the architect.

South 5th avenue, northeast corner West 3d street, seven-story brick, stone and terra cotta factory, 50x90, of slow burning construction; estimated cost, \$70,000. Condition—no contracts let. Owner—John B. Ireland, 170 Broadway; architect, Charles R. Behrens, 108 Fulton street. The specifications include tin roofing, structural and architectural iron-work, galvanized iron cornice, Portland cement, iron shutters, steam heating plant, fire-escapes, concrete and yellow pine floors, gas lighting, skylights and sidewalk lights. The plans for this building were filed September 27, 1893, but, owing to the financial stringency, the project was temporarily abandoned. Contracts will be let and the work of construction begun early this fall.

Seventy-fifth street West, near Riverside Drive.—Harvey Murdock, 140 Nassau street, contemplates erecting a three-story brick and stone residence to have all improvements. Estimated cost, \$40,000.

Eighty-second street and Amsterdam avenue.—P. J. Walsh, 48 East 28th street, general contractor for the new \$200,000 school building to be erected on this site, is in the market for the necessary building materials and interior furnishings.

Manhattan avenue, northeast corner of 102d street, four five-story brick and stone-trimmed flats, one 25.11x85, two 26x85, and on corner 23x91. Condition—plans under way. Owners and builders, Van Orden Bros., on premises; architect, W. Ormiston Tait, No. 65 5th avenue. The specifications include hardwood mantles with mirrors, steam-heating and all improvements. These flats will be laid out for two families on each floor.

DETAILS OF PLANS FILED.

Division street, Nos. 41 and 41½, seven-story brick store and workshop, 25x65.4; cost, \$29,000. Condition—estimating. Owner, Meyer Vessel, 220 East 61st street; architect, Louis F. Heinecke, 62 Bowery. The specifications include tin roofing, structural iron-work, plate glass, iron shutters, concrete and pine floors, gas and electric lighting and skylights. Address the architect. Plan No. 1080.

Seventy-first street, south side, 225 feet west of West End avenue, three three-story and basement brick and brownstone dwellings, 17x55, with 16 foot extension; cost, \$45,000. Owner, William Bradley, 536 West 48th street; architect, Arthur J. Horgan; mason, James Bradley. The specifications include tin roofing, electric bells, speaking tubes, concrete and pine floors, gas fixtures, bath and laundry fittings, tiled vestibules, ranges, wood mantles, skylights and sanitary plumbing. Plan No. 1058.

METROPOLITAN DISTRICT AROUND NEW YORK CITY.

SEWAREX, N. J.—Palliser, Palliser & Co., 24 East 42d street, New York, have prepared plans for two two-story, basement and attic frame dwellings, 36.6x44 and 36x39, to be built for Mrs. Hannah E. Abell. The buildings will cost \$7,000, and have shingle roofs, hot-air heating, sanitary plumbing, gas fixtures, gas machines, yellow pine floors, wood mantles, bath and laundry fittings and ranges. Address the architects.

WHITE PLAINS, N. Y.—McKim, Mead & White, 160 5th avenue, New York, are the architects for a two-story stone lodge, to be erected for Whitelaw Reid.

IRVINGTON-ON-HUDSON, N. Y.—At the fall election the taxpayers will vote on a proposition to appropriate money for the erection of a new town hall.

MT. VERNON, N. Y.—Patrick H. Kain, of this place, has been awarded the contract for the erection of an addition to the school-house on 6th street. Contract price, \$14,399.

PLATTSBURGH, N. Y.—Capt. George E. Pond, Assistant Quartermaster U. S. A., will receive sealed bids until Sept. 27, 1894, for erecting two storehouses at Plattsburgh Barracks.

BEYOND THE METROPOLITAN DISTRICT.

PITTSBURG, PA.—Driefus, Block & Co., of this city, will erect a tin plate manufactory at New Kensington. The plant will be built and equipped at an estimated cost of \$300,000.—Charles E. Bickel has drawn plans for a twelve-story brick, granite and stone stock exchange building, 86x90, to be erected at a cost of \$200,000. Three elevators, steam and electric plants, mail chute and all office building improvements are specified.

MCDONALD, PA.—J. E. Carlisle & Co., of Pittsburg, are the architects for a \$22,000 school building to be erected here.

WILMERDING, PA.—The congregation of the United Presbyterian Church will build a new edifice.

SCRANTON, PA.—The Board of Trade will erect a new building to cost about \$125,000. A. W. Dickson, of the Board, can give details.

POLK, PA.—F. J. Osterling, of Pittsburg, has completed plans for the Western State Institution for the Feeble Minded, to be erected at this place. The structure will be four stories, stone, brick and iron construction, heated by steam and lighted by electricity.

LEWES, DEL.—Palliser, Palliser & Co., of New York, have completed plans for a two-story and basement frame hall building, 32x50, to be erected here for Jefferson Lodge, A. F. and A. M. The specifications include slate roofing, concrete and yellow pine floors, gas lighting, skylights, stained glass, decorated ceiling and opera chairs. Estimated cost, \$5,000. Address, Charles H. Maull, Secretary of Jefferson Lodge.

LYNN, MASS.—The plans of H. W. Rogers for the hospital for contagious diseases to be erected here have been accepted and the work of construction will be commenced shortly.

READING, PA.—The plans of A. F. Smith for a new high school building have been accepted. Estimated cost, \$50,000. No contracts let.

FITCHBURG, PA.—Andrew Whitney will erect a six-story brick and stone store building to have all improvements. Cost, \$50,000.

INGRAM, PA.—Riddle & Kurn, of Pittsburg, have completed plans for a hall building to be erected here for the O. U. A. M. Cost, \$8,000.

WATERBURY, CONN.—The Board of Education has had plans drawn for a \$20,000 addition to be built to the school-house on Baldwin street.

BINGHAMTON, N. Y.—The City Clerk has been ordered to invite architects to submit plans for a new city hospital.

PITTSBURG, PA.—The directors of the Bank of Pittsburg will have plans drawn for a new bank building. The structure is to be built of brick and granite and will be fire-proof throughout.

AUBURN, N. Y.—A new school building is to be erected at James and Orchard streets. No contracts let.

HAMMONDSPORT, N. Y.—The Protestant Episcopal Church will erect a new edifice to have all modern church improvements.

BRADFORD, PA.—The City Council has instructed the City Clerk to advertise for plans for a new city hall.

LONG ISLAND.
(See also page 341.)

SAYVILLE.—Harry E. Wickes has the contract to erect the extension to the public school. It will cost \$6,000.

SPRINGFIELD.—The Board of Education has decided to erect a school-house, to cost \$15,000.

SOUTHAMPTON.—John Willer is building a two-story and attic frame cottage on the road leading north from Hill street.—Eugene Homan is erecting a two-story and attic frame cottage on Post's crossing, near Main street.

SETAUKET.—Isaac Golden is erecting a two-story and attic frame cottage, 28x40, at East Setauket. It will contain all improvements. William Deckman has the contract.

Trade Notes.

DARK ROOMS MADE LIGHT.

It has been for many years a vexatious problem how to furnish daylight in rooms, lofts, stores, etc., otherwise dark, by reason of adjacent buildings or peculiarities in style of architecture. Various and numerous have been the efforts in this direction, but until now no device has been made which would combine practical efficiency with cheapness. It would seem, however, that all this is accomplished in a recent invention of Edward Westernmayer, well known in this city, which consists of a device that catches the rays of daylight at any window through which the light is obtainable, at any angle, intensifies, diffuses and then reflects them into the room, thus making it as light as day itself, irrespective of the condition of the weather. In fact the inventor claims that the best results are attained on gloomy days. The device appears to be thoroughly durable, will not get out of order and requires absolutely no care, besides which there is no expense in operating it. Its efficiency has been fully tested and is now in practical use in many business houses and flats in New York City. It can be seen at C. W. Yutte & Co., No. 451 Broadway; London and Brazilian Bank, No. 71 Wall street; Essex Apartments, No. 61 9th avenue; Lexington Avenue Opera House, 58th street, near 3d avenue, and many other representative concerns. These "Illuminators," as the inventor calls them, are manufactured by the New York Illuminator Co., No. 2711 8th avenue, this city.

HIGH SPEED ELEVATORS FOR J. J. ASTOR'S HOUSE.

The Sprague Electric Elevator Company of New York has been awarded the contract for the two passenger elevators to be placed in the mansion of John Jacob Astor, at 65th street and 5th avenue. After careful deliberation on the merits of the various elevators now on the market the high speed electric elevator of the above-named company was selected. Nothing more elaborate than these elevators will have been seen in New York or any other city, and will be an innovation in the introduction of high speed elevator service in town houses.

BIG SLABS OF CALIFORNIA REDWOOD.

At the yards of John F. Carr, Nos. 543-557 West 23d street, may be seen an extraordinary collection of California redwood slabs. They are thirteen in number, all five inches thick and four feet long, and vary in width from seven to nine feet. They convey a vivid impression of the enormous sizes of the trees from which they were cut. Twelve of the pieces are soon to be shipped to London, England, and the remaining one will be polished and mounted in the office of the John F. Carr lumber yards, as an object-lesson in the beauty and solidity and massiveness of the wood.

DUMB-WAITERS.

Architects and builders will do well to consult Joseph Constantin whenever they are in need of dumb-waiters; it is his specialty to build them, and his workmanship and prices are right. He is at No. 39 East 12th street.

ECCLESIASTICAL AND ARCHITECTURAL MARBLE.

Theiss & Janssen, whose works are at 413 and 415 East 25th street, have completed and erected the Roscoe Conkling memorial altar and reredos for Calvary Protestant Episcopal Church, in Utica, New York. It is the gift of Mrs. E. C. Oatman, the daughter of Mr. and Mrs. Conkling and is considered one of the finest examples of ecclesiastical art in this country. It is executed in Cararra marble, the Cristala brand, the gem of all marbles for this class of work. Messrs. Theiss & Janssen are contractors for all kinds of interior marble and onyx work, artistic carvings, etc., and have received the highest encomiums for their work from the leading clergy throughout the United States. They invite the attention of the architects of this city to the altar of St. Leo's Church, in West 28th street, of which the Rev. Father Ducey is rector, as an example of their artisanship.

THE TIFFANY CHAPEL.

This famous example of art glass work was reopened on Tuesday for exhibition (free), at No. 333 4th avenue, and will remain on exhibition daily from 10 A. M. to 4 P. M. until December 1. Cards of admission may be obtained at the office of the Tiffany Glass and Decorating Company, No. 333 4th avenue.

GAS AND ELECTRIC FIXTURES, ETC.

Carpenter, Heward & Co., who have conveniently situated offices in the Kennedy Building, No. 289 4th avenue, just under the Mechanics' and Traders' Exchange, are expert and extensive manufacturers of gas and electric fixtures, and brass and woodwork, wrought-iron work, and-irons, mantles, etc. As examples of the class of work they do, we mention as among their most recent contracts, the gas and electric fixtures for the Davis, Collamore & Co. building, at 5th avenue and 21st street; the Diamond Exchange, No. 14 Maiden lane; the St. Nicholas Club, in 5th avenue; the Rockaway Hunt Club-house and the wrought-iron gates for the National City Bank of Brooklyn, which are considered to be very fine.

MACHINE-MADE LIME MORTAR.

The United States Mortar Supply Co., of which Mr. William W. Kenly, C. E., is the general manager, has published a neat little pamphlet in which the superior merits of machine-made mortar are entertainingly set forth. Architects and builders ought to examine this pamphlet before undertaking to mix lime mortar in the old manual way. The machine-made mortar of this company is superior to the product of all the old processes and is used by most of the larger builders on all important work. The office of the company is in the Kennedy Building, No. 289 4th avenue.

The Opinions of Others.

LAWS RELATING TO BUILDINGS IN THE CITY OF BROOKLYN.—The sections divided into paragraphs, with headings, marginal notes and colored engravings. I., The Building Law; II., Regulations of the Building Department; III., Plumbing and Drainage; IV., Water and Sewers; V., Classes of Buildings on Certain Streets; VI., Storage and Sale of Illuminating Oils; VII., Fire Limits. Edited by Wm. J. Fryer. One octavo volume, cloth; price, \$2. New York: THE RECORD AND GUIDE.

Mr. Fryer's well-known efforts in the preparation of the New York, Brooklyn and general laws for the State, which were submitted to the Legislature last winter, assure us of a careful compilation and one that will be properly annotated and indexed. The work before us is a fit companion of the New York laws prepared by him last year. The subject of building laws has been a study of years with Mr. Fryer, and New York and Brooklyn are largely in debt to him for the carefully drawn law passed the last session of the Legislature. This work, however, does not confine itself to this portion of the law, but is a comprehensive presentation of the law covering the whole subject, and placing in the hands of the architect, builder, contractor, lawyer and real estate owner the whole law as at present in force—the regulations of the Building Department as to acceptance of plans and specifications, inspection, etc., requirements for elevators and fire escapes. On walls fourteen colored diagrams are given illustrating the construction required by the present law for dwelling houses and warehouse walls. In the section on skeleton structure, so much in vogue in large public and office buildings, a diagram illustrating the construction of curtain walls is shown, also diagrams showing the encasing of iron or steel columns with the use of fireproof materials. The work covers, in addition to what are known as strictly building laws, plumbing and drainage and the rules and regulations of the Health Department; the regulations of the Department of City Works, such as water and sewers, opening and refilling trenches, restoring street pavements, licensing of plumbers, scale of water rates, ordinances regulating the laying of sidewalks and construction of driveways, classes of buildings on certain streets, ordinance prescribing projection of bay windows, stoops, areas, etc.; storage and sale of illuminating oils, fire limits, Department of Buildings—altogether furnishing just the information required by the architect, builder and contractor. The author has taken great pains in bringing this matter together to classify carefully, give side heads and furnish a complete index for ready reference. The work will be found one of the best and most convenient local references to building laws and the requirements of the various city departments ever published.—*Architecture and Building.*

CONVEYANCES.

Wherever the letters Q. C., C. a. G. and B. & S. occur, preceded by the name of the grantee, they mean as follows:

1st—Q. C. is an abbreviation for *Quit Claim deed*, i. e., a deed in which all the right, title and interest of the grantor is conveyed, omitting all covenants or warranties.

2d—C. a. G. means a deed containing *Covenant against Grantor only*, in which the covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or encumbered.

3d—B. & S. is an abbreviation for *Bargain and Sale deed*, wherein, although the seller makes no express covenants, he really grants or conveys the property for a valuable consideration, and thus implicitly claims to be the owner of it.

Editor RECORD AND GUIDE:

The lien filed against my property on Sept. 6th, 1894, by Soldano & Luchesi, is unjust and unfair. I hold receipts for payments of nearly \$9,000, while their contract calls only for \$8,000, and I have still \$1,000 of work unfinished which belongs to their contract. I have bonded the lien.

REVIEW AND RECORD.

BROOKLYN, SEPTEMBER 8, 1894.

Notes Gathered Here and There.

Owing to the question as to the ability of the trustees of the Brooklyn Tabernacle, under the new building law, to use the foundations and walls left standing in reconstructing the edifice, the \$100,000 insurance on the structure has not been paid. Deputy Building Commissioner Howell stated that there was nothing in the law to prevent the use of the foundations of a building damaged by fire or the side walls that are left standing, provided that on examination they are found intact and sufficiently strong to come within the requirements of the law for the building about to be erected.

City Works Commissioner White, after consultation with a committee of Wallabout Market men, has definitely accepted the design of Architect William B. Tubby, of New York, for the exterior of the new market building. The estimated cost of the most expensive block, that on the corner of Washington and Flushing avenues, will probably be about \$40,000. The whole cost, if the ground now occupied by buildings is improved according to the design, will be about \$200,000. Under the act the market men bear the cost of the new buildings. The present buildings are to be removed. Mr. Tubby's design, while ornamental, is not extravagantly so. The exterior will be of washed red brick, with Colabaugh brick trimmings.

Notice is given that the assessment for the cost and expense of constructing a sewer in Map F, District 11, Butler street, from Vanderbilt avenue easterly to the crown of the street between Underhill and Washington avenues, has been completed by the Commissioner of City Works. The said Commissioner will be at his office, Room 15, Municipal Building, on the 14th day of September, to hear objections to the said assessment.

Registrar of Arrears Heinrichs has just completed a list of the parcels of property he intends to sell at public auction in Justice Neun's court-room, on October 3d. The properties lie in the 5th, 6th, 8th, 9th, 16th, 19th, 21st, 22d, 24th and 25th Wards. In the 22d Ward there are 123 lots, nearly all of which belong to the Litchfield estate. Each parcel will be sold to the highest bidder for a sum not less than the amount remaining unpaid and interest from the date of filing the certificate at the rate of 12 per cent per annum.

Summons and complaint were served on Mayor Schieren on Wednesday in a suit brought by Henry P. Litchfield, who seeks to restrain the city from selling for arrears of taxes the 123 pieces of Litchfield estate, which Registrar of Arrears Heinrichs has advertised for sale on October 3d. Mr. Heinrichs has been served with a notice of an application for an injunction to restrain the sale. This is the second effort of the Litchfield estate made this year to stay off the sale of its properties for taxes. The estate was defeated in its last efforts.

PROPOSALS FOR CITY WORK.

Sealed proposals will be received at the Department of City Works, until Tuesday, September 11, at 12 M., for grading and paving 6th street, from 8th to 9th avenue, with cobbleston pavement.

CONVEYANCES.

Wherever the letters Q, C, and C. a. G. occur, preceded by the name of the grantee they mean as follows:
1st—Q, C, is an abbreviation for Quit Claim deed, i. e., a deed in which all the right, title and interest of the grantor is conveyed, omitting all covenants or warranties.
2d—C. a. G. means a deed containing Covenant against grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or encumbered.

JUDGMENTS.

In these lists of judgments the names alphabetically arranged, and which are first on each line, are those of the judgment debtor. The letter (D) means judgment for deficiency. (C) means not summoned. (I) signifies that the first name is fictitious, real name being unknown. Judgments entered during the week, and satisfied before day of publication, do not appear in this column, but in list of Satisfied Judgments.

BUILDING MATERIAL MARKET.

BRICKS.—There does not appear to be much, if any, real change in the position of Common Bricks, certainly no gain. A somewhat unusual feature is the fact that the run of stock ordinarily considered the finest has really the weakest tone, although that is a result not difficult to account for. It has been a remarkably favorable season for production and the effect is now shown in the universally excellent quality of stock offering giving buyers a great advantage in matter of selection and inducing many of them to desert their regular fancy makes when there is an attempt to place a premium upon the stock. At \$1.50 we have a dead outside and the bulk of business is not done above the \$1.25 limit, with some tip-top goods at \$1 per M. Whether demand has diminished or arrivals increased is doubtful, as accounts disagree upon that subject, but there is no doubt that the accumulation here has been larger, and there is at the close a greater quantity unsold than last week. Production is gradually shutting down, although the percentage of working yards is greater than might have been expected in view of the threats made by manufacturers for a number of weeks past. Sales are dull and nominally unchanged. Fronts get in different custom only, and secure no chance for a stiffening of values. We learn that the Trenton manufacturers have a rather light stock of fronts on hand, but nevertheless have resolved to shut down on account of the heavy accumulation of unsalable rough brick which clogs the entire business. Very few contracts for fancy colored stock are making.

GLASS.—Since last writing advices have been received stating that Western manufacturers and their workmen had come to an agreement upon the wage question at a reduction of 22 1/2 per cent, and were about starting their fires. It is further reported that the Eastern pots are likely to resume operations upon the same basis. The run of business at present doing is small and principally of a regular trade character, with nominally unchanged prices. As yet the effects of the changes in duty have not had an opportunity to demonstrate themselves, but there is an idea that the matter has really been pretty well discounted. According to dispatches received from Washington this week the Treasury Department has made an important ruling in relation to paragraph 91 of the tariff, earthenware and glass schedule. After fixing the rates of duty, the paragraph provides "that unpolished cylinder, crown and common window glass, imported in boxes, shall be packed fifty square feet per box as nearly as sizes will permit, and the duty shall be computed thereon according to the actual weight." Secretary Carlisle has decided that the words "actual weight" are to be construed "commercial weight," and that therefore only 5 per centum of each gross importation must be examined in order to strike an average, unless where the actual weight of such proportion shows a material variation from the above standard. Glass exceeding 60 by 40 inches, however, must be actually weighed. The circular to which the Secretary refers, No. 11,099, declares that this method of ascertaining weight is a necessity, in view of the fact that 35,000 to 40,000 boxes of glass often arrive in one week in New York.

LATH.—About the only really new feature on the market is to find a general admission of disappointment among receivers, and a weak tone quoted without contradiction. Consumption has failed to reach the proportions calculated upon, as almost sure by this time, and with many dealers carrying a good stock from previous purchases they are in no humor for handling additions even at modified cost, and current arrivals are difficult to place. Some quotations are named at \$1.75 for small lots, but cargo rates stand at about \$1.65 a 1.70, the latter a little extreme. Only fair quantities are reported afloat, but probably quite as much as the market at present requires.

LIME.—Although the market has again reached a go-as-you-please condition through the disintegration of the Eastern combination, affairs have not as yet reached any very serious state. Indeed

WITH SUPPLEMENT.

THE RECORD AND GUIDE edition of the Building Laws and Ordinances of Brooklyn, with illustrations and a complete index, by which one is enabled to find at a glance just what he is looking for, is now ready for delivery at the offices of THE RECORD AND GUIDE, 14 and 16 Vesey street, New York, and 276 Washington street, Brooklyn, at the uniform price of \$2.

WALL STREET, or rather that part of it which spends its life in guessing at the daily prices of securities, is just now puzzled even more than when Congress was in session when the daily grinding of lies innumerable could be worked without cessation. On one side, the Street feels that the long-talked-about revival of business is undoubtedly here, and woolen mills, glass factories and other industries which have been paralyzed for months are getting into operation; but these good signs are offset by the official bad reports of the corn crop, reports which are corroborated by every one who personally knows anything about the condition of the corn States. The difference between 1,100,000,000 bushels and 1,800,000,000 is appalling and Wall street and the country generally may well stop a short time until this difference can be realized. Whether we have 700,000,000 bushels of corn more or less to be handled or made into provisions means employment and business for many different interests, the aggregate of which would be at least two or three hundred millions dollars and this means trade and trade means profits and profits mean good times in Wall Street. It does not follow that even with the reduced crop a big business will not be done, but it does follow that discrimination must be made with one's purchases and, for this reason, it will be well to keep east of the Mississippi with purchases of railroad stocks. The coal stocks are also safe, as with a revival of business and the increased use of coal by trolley cars alone, where formerly horse-power was used, there will be a very tangible addition to the sale of coal. All Southern securities ought also to be good, as there crops of all kind are the best of any in the history of the South.

IN Europe the improvement in trade conditions continues, but without any marked features. A more hopeful feeling prevails generally, but this sanguineness does not appear to be based as yet upon any very pronounced increase in actual transactions. Indeed, reports indicate that the situation in Europe is in many respects similar to that prevailing at present in this country. The markets are brisker than they were a year ago, but buyers, upon the whole, are proceeding very cautiously and prefer to purchase for present needs rather than stock up to meet even very restricted anticipations. The money market is unchanged. The Bank of England continues to augment its stock of gold. There is no demand for money anywhere. This lifeless state of affairs is the surest indication possible that business is not yet in a normal condition. In Germany there are two sources from which better trade is looked for—the United States and the Orient. The new tariff, of course, has caused the expectations concerning this country, and, it is supposed, the war between China and Japan will arouse trade with the far East. It is more than probable, however, that the German tariff promises our German friends more than they will ever realize, for, whatever advantages the lower scale of duties confers upon the foreigner, in very many cases they are more than offset by the reductions in the cost of production which have been effected within the last few years by the American manufacturer. Still, prices in Europe are said to be so low that they now scarcely leave any margin for profit, and, under these circumstances, should business in the United States pick up and prices here

stiffen, imports from Europe might be increased. Those who are lamenting the poor corn crop in this country should not overlook the fact that only 50 per cent of an average of that cereal or maize will be obtained this year in Europe. Statistics of the out-turn of cotton in India are at hand. The total yield for this year is placed at 2,950,000 bales, or about 200,000 bales more than in the previous season. Due to adverse climatic conditions the quality of the crop is pronounced decidedly poor. The greater part of India cotton goes to the continent of Europe and not to Great Britain, the chief customer for the American fibre.

The Leaven of Morality in Brooklyn.

WHEN the rotten borough of Gravesend was annexed to Brooklyn last winter the impression was universal that the leaven which had worked the political revolution in November would suffice to raise this new ward to the moral level indicated by the election of Mayor Schieren and the jailing of John Y. McKane. Not a few of the best friends of the enlarged city have noted therefore, with alarm, in the last few weeks, indications that the leaven is working the other way, or, to preserve the technical accuracy of our simile, is insufficient for the leavening of the whole lump and that there is grave danger that all of Brooklyn's cake will turn to dough.

The most conspicuous of these indications at this present time is the revival of the bestial, brutal, inhuman, pugilistic exhibitions at Coney Island, under the false appellations of "amateur athletic" exhibitions and as under the Courtney-McKane-Boody patronage, now under the patronage of the police authorities and the same old gang of political toughs and gin-mill loafers. While there was a healthy, moral sentiment opposed to these degrading exhibitions and a manly, courageous public press to denounce them, there was still a sound basis for the hope of an ultimate return by Brooklyn to the high plane of morality and decency she exemplified when Beecher was her oracle and Seth Low her executive.

But since they have been lost to Brooklyn the city has grown so familiar with vice and political corruption that it has viewed with perfect composure not only the revival of these degrading Coney Island pugilistic contests, but the still sadder apology for them made by the Brooklyn *Eagle*. This paper, by an occasional spectacular, if tardy, championship of the cause of morality in municipal affairs, acquired an oracular authority to represent the moral sentiments of the community. How low must this moral sentiment have fallen, therefore, when the *Eagle* expresses editorially such sentiments as these:

"Brooklyn is not and does not claim to be a home of saints. It is not a goody-goody town. Its people neither hold stop watches on sermons nor read theological essays in the grand stand at a horse race. They believe in a minimum amount of hypocrisy and a maximum amount of manliness. There are some people and a few newspapers which hope to achieve a little cheap reputation by assuming a sanctimonious attitude toward this matter. We have no sympathy with them. We believe in all forms of sport, the tendency of which is to encourage a healthy, wholesome and manly spirit among our young men, boxing matches included, and we would hate to see the day when a finicky civilization attains the stage at which it produces nothing but physical weaklings."

Fortunately, such an outspoken declaration in favor of the criminal class is not of frequent occurrence. Our interest in this matter is not altogether of an ethical nature. Brooklyn real estate interests are deeply interested in it, seriously affected by it. Brooklyn has already such a superabundance of the tough and vulgar element in her population that property values are in many large sections seriously affected by it. It is no longer the city of quiet, orderly homes it used to be. The classes who patronize prize fights are in the numerical majority and their evil influence is extending to the youth of every household. When the *Eagle* gives utterance to such sentiments it makes the defence of the fireside more difficult, it allies itself with the worst elements in our population.

What Brooklyn needs more than anything else for the restoration of her shattered credit and fortunes just now is the subjugation of the tough, the exaltation of the moral elements in her population. She needs to do those things which will make her attractive to decent people. These are driven away by Coney Island prize fights and by official sanctions and *Eagle* apologies for them. The Superintendent of Police and the *Eagle* should about face on this matter and support the manful efforts which Mayor Schieren is making to restore to Brooklyn her good name and fame. In no other way could they do so much towards restoring prosperity to the real estate and building interests of Brooklyn. This article would be incomplete did we not report that notwithstanding the *Eagle's* stultification and the apology of Superintendent Welles, Mayor Schieren has set his face firmly against any more of the degrading exhibitions that have made the Coney Island brand of athletics a stench in the nostrils of decent people. There is no danger that any of the "forms of sport, the tendency of which is to encourage a healthy,

wholesome and manly spirit among our young men" will suffer by this exclusion. "Boxing matches," of the Coney Island stripe especially, do not belong in this classification. They are only degrading and demoralizing in their influence. They are in the class only with gambling, prostitution and sottishness.

THE notable increase in the world's production of gold during the last year or two, accompanied as that increase has been by a marked decline in prices, has brought bi-metallism to one of those crude, forcible tests which are the only sort the public mind is really capable of appreciating. The quantitative argument has been the part of the bi-metallic doctrine that has most securely "collared" the popular judgment. It sounds so reasonable. A mind with only one hook can catch hold of it. Like coarse material, it is suitable for the crudest intellectual apparatus to deal with and there is nothing that suits your crude apparatus so well as to find coarse stuff to deal with. It handles it vigorously, noisily. Now, there is a sophistical air of certainty about the theory that plenty of money means high prices and that high prices mean prosperity, and from these premises the conclusion seems inevitable that the nation that will increase its stock of money will promote its welfare. Of course, if the stock of gold be insufficient for the purpose of making prosperity the common every-day possession of mankind the argument is that the services of that even more beneficent, because more plentiful metal, silver, must be called upon.

THE foregoing is a rough statement of the quantitative theory as understood by the multitude who "believe there is something in that silver business." No wonder it takes. Pretty nearly everything mankind is striving for has been reduced to a monetary expression, so that it is well-nigh impossible for people with the ordinary view of things perpetually before them not to believe that money comprises by far the greater part of wealth if, indeed, wealth and money are not co-extensive terms. The argument controverting these views certainly has not the cocksure air about it that the mere assertion of these views possesses. It has not anything like an equal popular value. It is not easy to convince the ordinary mind that money is not the chief form of wealth, and that though a silver dollar performs in the economy of society a function differing from that performed by, say, a pair of shoes, the value of both is determined fundamentally by the same set of facts. Of recent years, particularly in this country, the advocates of silver and the quantitative theory have been unusually voluble. We have been warned that the world is traveling rapidly towards a varied but complete perdition, because, by the machinations of evil men, it has been led to worship the gold standard when—so the alarm ran—the production of gold is stationary and there is not enough money for the world's needs. "Under these circumstances," cried the adherents of the quantitative theory, "what can we expect but a continual fall in the prices of goods, the impoverishment of the people and an increase in the tyranny of the money power?"

TO smoke out all these crude deductions and sophistries will perhaps be a slow matter, but the process will be accelerated greatly by turning the attention of people to certain notorious facts of quite recent origin which very bluntly contradict the quantitative theory. We have had occasion to call attention more than once in these columns within the last two years to the remarkable increase which has occurred during that time in the world's production of gold. This increase, were the quantitative theory correct, should, of course, be accompanied by a rise in the price of commodities the world over. But such notoriously has not been the case. On the contrary, coincident with the greater production of gold there has been a very considerable fall in all markets, and to-day, when all the great banking institutions of the world are positively glutted with money, prices rule lower than perhaps they ever did. The force of this fact cannot but be felt by even the ordinary mind. If prices are governed by the abundance or scarcity of money why are prices so low as at present? If an increase in the world's stock of gold coin has not been accompanied by a rise in the price of commodities, why should we expect a rise to occur were silver to be coined in greater quantities than at present? Bi-metallists should address themselves to these questions.

THE public had almost forgotten the shameful record of official corruption uncovered for them by the Lexow Committee in the early part of the summer when Mr. Goff's disclosures this week force them again to consider the rotten condition of certain departments of our City Government. As the investigation broadens and penetrates deeper it reveals a fouler corruption with wider ramifications. The scope of the work which the Lexow Committee is performing may well be said to be shifted now, so that to-day it is more correct to say that it is pursuing an investigation into the condition of society than into the efficiency and uprightness of the Police Department.

Moreover, we may be sure that what has been shown to us is only a small part, the mere surface of what lies beneath. Like an iceberg, two-thirds remains hidden from sight. More than this, the longer Mr. Goff's investigations continue the more certain it appears that other branches of the administration are necessarily implicated in the dirty business which goes by the name of "Government" in this city. Unproven charges, when they are serious, should be received with great caution, but certainly the presumption is very strong that Dr. Parkhurst is not speaking wildly when he says that a "judicial ring" exists in this city quite as criminal in its practices and purposes as the Police Ring. The taint of corruption apparently is everywhere. The spectacle which the Metropolis presents when it stands uncovered must seem, to Anarchists and Revolutionists, to be a very forcible justification of their diatribes against society. In perusing the evidences given before the Lexow Committee even the most optimistic cannot but think of the legend that runs under "The New Boy" placards now pasted all over the city: "*What's the good of anything?—Nothing.*"

"WHAT is the good of anything?" There must be in a city like New York a saving remnant, but the disheartening fact at present is that apparently the degrading and disgraceful disclosures of the Lexow Committee have not created among our people anything like the moral indignation which one might reasonably expect. Such iniquity should bring, the entire community morally speaking, to arms. The mere production of proof of what has been going on in one of the most important departments of the City Government for years should be enough in itself to establish a new regime. Instead of that, people receive the news of Mr. Goff's disclosures very much as they receive any other sensational bit of news. The moral sense has not really been touched, despite the "Well! Well!" "They are a pretty bad lot, etc.," frequently heard. We do not say, we cannot bring ourselves to say, that the work of the Lexow Committee will be without reformatory results, but certainly there are not any indications yet that these results will be at all commensurate to the evils that need eradicating. People show no disposition to fairly face the situation. They don't care to recognize the fact that our government is corrupt because our people are corruptors. Also, the game of "politics" being so dear to them, they will not see that "politics" is the buttress and support of the corruption which has been going on in this city for years. So long as men prefer to dub themselves Republicans or Democrats, Tammany men or Mugwumps, and play "politics" for party advantage, efficient and honest administration is a clean impossibility. Reform is quite out of the question. One set of rascals may be forced to give room to another set. Names may be changed, but not things. The disheartening fact to-day is that, despite the evil which has been brought to the light of day in the last few months, we are all going to work on just the same old lines, not to shame the Devil, but to make one party cry prevail over all others. Partisanship has as reasonable a play in the conduct of this city as it has in the management of the affairs of a mercantile house, and no more. We have tried the thing. Judged by the results are we satisfied with it?

The Constitutional Convention.

SUMMARY OF WORK COMPLETED DURING THIS WEEK.

ALBANY, Sept. 13.—The Constitutional Convention this week finally passed upon some of the most important proposed amendments to the State Constitution which have been under consideration before it. These amendments, therefore, will be submitted to the people at the approaching November election, and henceforward will, therefore, become subjects of debate before the voters of the State.

Chief among the amendments adopted was the important Judiciary Article, which creates a new Appellate branch of the Supreme Court, composed of four courts of five judges each, to intercept a large proportion of the legal business which has heretofore gone to the Court of Appeals. The Court of Appeals under this Article hereafter will be limited to the decision of questions of law and will not consider questions of fact except where death is the judgment of the lower court. The Article was adopted by a vote of 113 to 33 (nearly all rural members), which leads one to think that while the lawyers generally will support it the former voters may oppose it because of its increase of the number of the judges and consequent increase of the State's expenses in this direction.

Another amendment adopted, of general interest, provides for the reapportionment of the Senate and Assembly Districts. This bill creates a Senate of fifty members and an Assembly of one hundred and fifty members. The Democrats unanimously opposed it on the ground that it gives too much representation to the rural parts of the State and too little to the cities and therefore will harm the Democratic party. One section of the bill especially objectionable to them was drawn to prevent New York City or Greater New York ever acquiring complete control of the Legislature. It reads:

"No county shall have more than one-third of all the Senators, and no two counties, on the territory thereof as now organized, which are adjoining counties, or which are separated only by public waters, shall have more than one-half the Senators."

The following amendments also have been adopted :

Requiring that foreigners must, in order to vote, take out their citizenship papers at least ninety days before election day. Vote, 102 to 54.

Requiring the Legislature to meet the first Wednesday in January instead of the first Tuesday of that month. Vote, 123 to 7.

Forbidding public officers to accept railway passes or telegraph franks from corporations. Vote, 96 to 14.

Prohibiting the employment of States prison or penitentiary convicts from competing with free labor. Vote, 91 to 51.

Requiring the appointment or election of non-partisan boards of election inspectors. Vote, 123 to 9.

Abolishing the office of Coroner. Vote, 97 to 13.

Declaring that every bill passed by the Legislature must have been at least three days printed and upon the desks of the members previous thereto. Vote, 107 to 9.

Providing that in case of the impeachment of the Lieutenant Governor that the President *pro tempore* of the Senate shall assume the office. Vote, 94 to 36.

Removing the statutory limitation of \$5,000 in actions to recover damages for injuries resulting in death. Vote, 106 to 40.

Authorizing the Senate to elect a President *pro tempore* in case of the refusal or inability of the Lieutenant Governor to act. Vote, 115 to 30.

Providing against the gain or loss of residence by confinement in any institution wholly or partly supported by charity. Vote, 98 to 53.

Authorizing the sale of the State's salt springs. Vote, 91 to 36.

Authorizing the use of ballot machines. Vote, 88 to 57.

Abolishing the Statutory Revision Commission. Vote, 124 to 17.

Prohibiting the putting of "riders" in appropriation bills. Vote, 119 to 3.

The term of the Governor has been put at two years; a reduction of one year. The terms of the Senators also will be for two years. The terms of the State officers will be for two years. The terms will be so arranged of all of these officers that they will expire in the even years. This will be done for the purpose of having the city elections held in the uneven years.

One section of the City Article now upon the order of third reading provides that the city elections shall be held upon the uneven years. The 5th and 6th sections of the City Article as originally reported by the City Committee have been detached from the remainder of the Article and amended in some important respects. The most important amendment provides that a bill may be passed over a mayor's veto by a majority vote in both houses of the Legislature. But the mayor is to have fifteen days in which to consider the proposed charter-tinkering bill. These sections of the City Article are now upon the order of third reading and will be considered probably to-morrow. They now read, as amended, as follows:

Article eight of the constitution is amended by inserting the following as a new section:

SECTION —. All cities are classified according to the latest state enumeration, as from time to time made, as follows: The first class includes all cities having a population of two hundred and fifty thousand, or more; the second class, all cities having a population of fifty thousand and less than two hundred and fifty thousand; the third class, all other cities. Laws relating to the property, affairs or government of cities, and the several departments thereof, are divided into general and special city laws; general city laws are those which relate to all the cities of one or more classes; special city laws are those which relate to a single city, or to less than all the cities of a class. Special city laws shall not be passed except in conformity with the provisions of this section. After any bill for a special city law, relating to a city, has been passed by both branches of the legislature, the house in which it originated shall immediately transmit a certified copy thereof to the mayor of such city, and within fifteen days thereafter the mayor shall return such bill to the house from which it was sent, or if the session of the legislature at which such bill was passed, has terminated, to the governor, with the mayor's certificate thereon, stating whether the city has or has not accepted the same.

In every city of the first class the mayor, and in every other city, the mayor and the legislative body thereof, concurrently, shall act for such city as to such bill; but the legislature may provide for the concurrence of the legislative body in cities of the first class. The legislature shall provide for a public notice and opportunity for a public hearing concerning any such bill in every city to which it relates, before action thereon. Such a bill, if it relates to more than one city, shall be transmitted to the mayor of each city to which it relates, and shall not be deemed accepted, unless accepted, as here provided, by every such city. Whenever any such bill is accepted, as herein provided, it shall be subject, as are other bills, to the action of the governor. Whenever, during the session at which it was passed, any such bill is returned without the acceptance of the city or cities to which it relates, or within such fifteen days is not returned, it may, nevertheless, again be passed by both branches of the legislature, and it shall then be subject, as are other bills, to the action of the governor. In every special city law which has been accepted by the city or cities to which it relates, the title shall be followed by the words "accepted by the city," or "cities," as the case may be; in every such law which is passed without such acceptance, by the words "passed without the acceptance of the city," or "cities," as the case may be.

Obituary.

James F. Chamberlain died at his summer home at Sabbath Day Point, Lake George, on Tuesday, at the age of eighty-one years. In 1852 he entered the real estate business and later formed the firm of Chamberlain & Ashforth. It was succeeded by George Ashforth and followed by the present firm of Ashforth & Co., at No. 1509 Broadway. Mr. Chamberlain, up to two years ago, was one of the trustees of the Henry Astor estate. He was the founder and first secretary of the Franklin Savings Bank, of which he afterward held the presidency for a number of years. Under his guidance the bank successfully weathered several troublous periods of financial depression and to him is chiefly due its present high standing in the community.

The Building of a Sky-Scraper.

Whatever may be said of the high building from the artistic, economic or hygienic standpoint, there is one view which excites wonder and admiration, and that is the way in which the materials contained in these architectural colossi are brought together and put in place under certain conditions, every one of which may be said to be an obstacle to rapid work. For instance, the space within which the work is limited is small indeed, and the time within which it must be done is very short. Its execution within these limits alone makes each high building a marvelous result of administrative and executive skill. The architect may have spent many anxious nights and days over his plans, but it is when they have been accepted that his real anxiety begins, which does not end until everything is done and the presentment of the building which he has thrown from his mind onto the paper stands forth an organized whole and challenges praise or blame, as the case may be. He has decided how his foundation shall be made, how the weights shall be distributed, what the design of the facade shall be, the height of the stories, the distribution of the floor spaces, how the building shall be lighted, ventilated and heated; but he has yet to decide who shall make the several parts, the precise materials and what appliances shall be used for making his building suitable for the purposes for which it is designed. In the course of the work, he has to meet new conditions that it was impossible to foresee and to devise means of overcoming difficulties that present themselves without warning from day to day. Only an architect is capable of saying what all these mean. He has no time for hesitation; the work must move rapidly and smoothly from the day clearing the site begins until the tenants move into the new building, because, for one thing, delays are very costly. The owner has had to pay out enormous sums of money for site and for material and work done from time to time, not one penny of which can become remunerative until rentals begin to come in and, as everyone knows, rentals cannot come without tenants or tenants without accommodations.

Now, it is safe to say that in almost every case at the time when the plans and specifications for a high building are submitted to intending contractors the materials of which the building is to be composed and of which its appliances are to be made are in either a raw or crude form. Much of the stone yet rests in the quarry and the brick in the clay bank, and even ore from which the iron and steel beams are to be made, if not in the mine, only just out of it. In buildings of such cost and importance as these, with very few exceptions, everything is of original design from foundations to door-knobs, the execution of which cannot be begun until the contracts are made. If the eye could overlook the working out of such an undertaking from its beginning to its end what a remarkable picture of activity it would see! Looking first at the place where the new building is to stand there would be the gangs of dusty laborers demolishing the buildings that had seen their day and had to make way for the new. Then, beyond, foundries and rolling mills starting up to supply the metal for the cage construction; quarries, brick yards, manufactories for terra cotta, tile, fire-proofing, and glass, lumber yards, cabinetmakers', carpenters' and stone-cutters' shops, not to mention the hundred and one departments of each of these, spread over a vast portion, not of this country alone, but of the industrial world, all starting into more or less activity to contribute to one work. During all the time of active building operations, stone, brick, wood, iron and glass furnishings and fittings are traveling in steady streams from every direction, by land, sea and river, to New York docks, to be thence hauled to the site and promptly seized and put in the place where they are to rest for the terms of their natural lives. Weight, dimensions and quantity are as naught; they must succumb to the superior pressure which human intelligence throws against them.

In the most prominent recent example, the Manhattan Life building, the difficulties were increased by the situation of its site. A similar case is now under treatment in the work on the American Surety Company's building and another very like it in the restrictions on what may be called elbow-room in the Tract Society building. Work on all these three buildings was or is being done on narrow and busy thoroughfares in which very little obstruction can be permitted so that the handling of material must be rapid and the supply continuous. One example is enough for the present, however. The Manhattan Life building fronts on Broadway and New street. On Broadway no storing of materials is allowed though the stone for that front was hoisted from the trucks from that thoroughfare. New street is so narrow that, while the authorities took a generous view of the case, the amount of reserve material that could be kept there was comparatively small. Now the weight of the different materials that were received and put in place after the foundations were finished was in the neighborhood of 30,000 tons, averaging about 1,000 tons a week, though, of course, actually very much more in the earlier parts when the heavy work was done. It had to be passed in with sufficient rapidity to keep a large force, numbering over a thousand men near the close, at work all the time. The architects of this building inaugurated the use of caisson foundations for such structures, and their example is being followed in the case of the Surety Company's building, though not in that of the Tract Society, which will have ordinary foundations of brick, stone and cement. The putting in of the latter foundations give a couple of months to the contractors for the superstructure to make their sub-contracts and get their material together. In the case of the caisson foundation the time for this preparation is very much more, but it follows, of course, that the period in which the superstructure must be put together is proportionately less, a year being

the space in which any office building apparently has to be put up, be the mechanical problem easy or difficult. The foundations of the Manhattan Life building, given a razed surface, meant the excavating to a depth of 70 feet below the sidewalk to make way for an ingenious combination of steel caisson and brick and stone piers to carry the intended weight of the building itself of 60,000,000 pounds, and of 5,000,000 pounds more that the floors of the building might possibly have to carry when finished. The making of these foundations were probably not nearly so difficult as the same engineers who did the work have often had to encounter in the course of their bridge-building experience, the new use for the system giving it most of its interest. The contract having been made, orders were given for the steel caissons which were made in New York. All the displaced matter, except a small quantity of building sand was carted to the city dump, any other disposition of it was impossible because a cleared space was absolutely essential to the progress of the work. The foundations consist of fifteen steel caissons sunk to rock and filled with cement and bearing an equal number of masonry piers upon which the thirty-two columns of the superstructure rest. The first caisson was delivered on April 13, 1893, and the last completed within a few days of four months thereafter. One of the caissons weighed over 32 tons. The substructure contains other material; 1,260 cubic yards of concrete, about 3,900 barrels; 3,400 cubic yards of brickwork, about 1,500,000 bricks. This material was obtained without delay or difficulty from merchants in the city. The cost of the foundations was about \$150,000, or ten per cent of the cost of the whole work.

So far the work had, comparatively speaking, been easy going, but the completion of the foundations brought to the front the problem of receiving and placing the 30,000 tons of iron, stone, brick, etc., of which the superstructure was to be composed. One of the difficulties of this problem and, yet one of the things that made it possible to erect a great work of this kind in the short space of a year, was that within a very short time so many different kinds of work had to be going on simultaneously, each department employing a considerable number of men and requiring the assistance of hoisting apparatus. First the immense girders forming the floor frame were laid down and the iron men then had a story under way and the mason-builder began his walls and finished off the cellar floor to accommodate steam machinery and have a place on which to store mortar, plaster and other materials which must soon come into play. The engineer went on with the erection of the steel cage construction, the masons following a couple of stories below, and as soon as the masons gave them room the plumbers put in the rough piping and the electricians the electric wires, the fire-proof material was put around the columns and filled into the floor beams, the latter besides forming a sort of scaffold on which men could work, at the same time offering a protection against accident from articles falling in the course of the work above. As soon as a floor was ready for them the plasterers set to work and were in a short time followed by the carpenters, who in their turn were followed by the cabinet-makers and the decorators, so that within a remarkably brief space of time all the different departments had made a beginning; even the elevator men were early on the ground at work in the shaft that had been built for them, because, as everyone knows, the elevators had to be ready as soon as the building was open for tenants. This suggests the question—how were the heavy materials raised to the floors above the ground? The answer is that the builder of the cage-construction carried his hoisting apparatus up with him as he went; the mason-builder rigged up two elevators inside the building, which were also carried up as he proceeded, through openings left in the floors for that purpose, and for more convenience and extra expedition another elevator was built on the outside. This latter was found particularly serviceable when the time came to receive the long flooring boards, when the inside elevators were very busy. The Postal Telegraph building was put up without the use of an outside elevator. There were two elevators inside the Postal building, carried up in the same way as in the Manhattan Life Building, and lowered as the holes in the floors had to be closed up. This building has imitation pavement floors, otherwise its flooring might, as has been the case with other buildings, have had to be sent up from hand to hand on the face of the building. It was in this way with the generous use of elevators, putting on as many men as could work with convenience and rushing things day and night that the roof was put on the last of the seventeen stories of the Manhattan Life building in three months from the time work was begun on the superstructure, which, be it borne in mind, contains 6,100 tons of iron-work, 8,750 tons of brick-work, 2,300 tons of stonework, 3,300 tons of fire-proof material, 800 tons of plastering, besides a steel smoke stack that weighs 600 tons and some 8,000 tons of other material, including woodwork, marble, glass, hardware and so many other things that it is impossible to record them within the space of an article that can from its nature only treat the case in a very superficial way.

The Gerard.

The Gerard, the newest and in many respects one of the most complete of New York's family apartment hotels is illustrated in this week's supplement and will open for guests to-day. Its location on 44th street, between Broadway and 6th avenue, could hardly be excelled for convenience. The hotel is a thirteen-story fire-proof structure containing 132 suites of apartments of from two to five rooms, with bath and 25 bachelors' apartments. Its equipment is perfect, every modern convenience and improvement having been utilized. The hotel will be conducted under the management of the

lessee, William B. Gerard, who, for a number of years, has been the proprietor of the Glenada, at Cold Spring Harbor, L. I.

The Auction Market.

An inquiry into the prospects of the auction market for this fall, and as to whether the present is a propitious time to offer real estate at voluntary sale in the auction rooms, reveals an interesting contention between rival auctioneers. It has arisen over an attempt by the executors of the estate of Benjamin Richardson, deceased, to sell a large quantity of Harlem property, and the efforts of the heirs or some of them to enjoin the sale, until, as they urge, the market shall be in a more favorable condition for such sales. There are fifteen lots on 3d avenue and 106th street, embracing all but the northwest corner lot, six fronting on the avenue, with five-story and basement brownstone flats with stores on each lot, and nine on 106th street with four-story and basement brownstone flats; also, five lots in a parcel, on the southwest corner of 4th avenue and 101st street, except the corner lot, two facing on the avenue and three on the street, and a four-story and basement brick flat and lot, 20x 125.11, No. 460 East 115th street.

The sale was first advertised for August 22d, but on application of the heirs was adjourned to September 19th. Richard V. Harnett & Co. are the auctioneers, and the sale is advertised to take place at the Real Estate Exchange Auction Room, Nos. 59 to 65 Liberty street. Early in the week the heirs made a new application before Surrogate Fitzgerald for a further adjournment of the sale, and presented as the basis for their motion the argument that the present is an unfavorable time of the year for the sale of real estate at auction. This was supported by an affidavit made at the request of the heirs by James L. Wells, who has been twenty-five years engaged in the real estate business in this city, and chiefly in the auctioning of property, its appraisal for park and other purposes, and in the sub-division and settlement of estates. After stating that he had examined the properties of the Richardson estate he says, in his affidavit:

"In connection with my business as such auctioneer, I have had during the present summer at least twenty parcels of valuable property placed in my hands for sale at public auction. In all such cases I have advised my customers that the present was a very unfavorable time for the sale of any such property at public auction, and that unless favorable prices could be obtained at private sale, it would be far more advisable in my opinion to defer such sales at public auction until the spring of the year 1895. During the present summer I have conducted fewer auction sales of real estate than in any summer for the past ten years, and in nearly all the public auction sales which have come within my experience and observation, more particularly during the past month of August, the prices realized have been far below the actual value of the property. I know from my observation of the property above mentioned, and of the adjacent property on 3d avenue and Lexington avenue, consisting chiefly of small stores and tenements and flat houses, together with small private residences, that an unusually large number of houses and stores of this description are at present unoccupied and such rent as is obtained therefor is lower than is usual. From my experience and observation, as above set forth, I am of the opinion that the class of purchasers who would buy property of the kind belonging to this estate and above set forth are either speculators buying for a rise with the probability of receiving sufficient rent meantime to cover their investment, or persons in moderate circumstances desiring to purchase homes, and I know from my experience, as above set forth, that at present, and especially in the month of August, that such purchasers do not attend auction sales in as large numbers as is usual, nor do they bid as high for the property as has been usual.

"Based upon my experience and observation as above set forth, I am of the opinion that if the property mentioned and described in the advertisement of sale hereto annexed, and made a part of this affidavit, and marked Exhibit A, had been sold on the 22d of August, as therein advertised, that a serious loss would have resulted to the sellers, and at that date the said property would have not brought anywhere near the sum which it would have brought if sold at a more favorable season, and I am of the opinion that the month of August is the worst time in the entire course of the year to sell property of the kind herein referred to. I am also of the opinion, based upon my experience and observation as aforesaid, that all the said property herein, both that described in the annexed Exhibit and that above referred to, would bring a larger sum if sold in the spring of 1895 than if sold now."

Although this affidavit specifies August as the worst month in the year in which to offer property at auction, it says in the closing sentence that the property "would bring a larger sum if sold in the spring of 1895 than if sold now"—and the affidavit was verified under date of September 14th, and used on the application for a postponement of the sale from the 19th inst.

For the executors of the estate counter affidavits were presented by Richard V. Harnett, Henry W. Donald, Geo. R. Read, John W. Boyd and Benjamin Hardwick. That by Mr. Read, who, as everybody knows, is the President of the Real Estate Exchange, is as follows, and is typical in its conclusions upon the main question of all the rest:

"I have been President of the Real Estate Exchange and Auction Room, Ltd., for five years, and have been engaged in the real estate business in the City of New York for twenty-seven years. I am familiar with the value of real estate in the City of New York and with the prices usually obtained for such property at public sales. In my opinion the pieces of property described in the bill annexed to this affidavit will bring as high a price at a sale on September 19,

1894, as at any other time in the year, or at a sale held in the spring of next year. It is also [my opinion that a further adjournment of this sale will decrease the number of bidders and will injure the chances of selling the property at a good price at any time in the near future."

This affidavit was verified on September 10th.

Without any purpose of starting a controversy among the auctioneers over the point involved, THE RECORD AND GUIDE continued its inquiry by asking Peter F. Meyer whether he regarded the present as a favorable time to offer real estate at auction. Mr. Meyer said: "I can best answer that question by telling you what I have done with regard to my own business. I have had several large sales submitted to my management with instructions to use my own judgment regarding the time for making them. One of them is a sale of over 150 lots in the city—yes, uptown, but below the Harlem. I have invariably advised my clients to postpone their sales until after election."

"Why until after election? Is it that you expect the results foreshadowed of the election to have a peculiarly favorable effect upon business in general?" (Mr. Meyer, it will be remembered, is a staunch Democrat.)

"Not at all, but because so very many people who do not ordinarily pay any attention to politics are already deeply engrossed with election work and are going to be so engrossed until the election is over and past. They will not be taken away from what they now consider their duty by any allurements of the auction market, and it would be hazarding the interests of my clients unnecessarily to offer their properties now."

"Does this judgment apply to all forms of real property?"

"Suburban lots in some sections might find a sale now, but if not offered soon they will have to go over until spring. Investment properties, however, will in my judgment sell much better after election than now."

"Do you look for a general revival of real estate business after election?"

"I do. Everybody expects a revival in all lines of business after election, and that fact will bring the revival. People are preparing for it. Yes, I think the fall and winter season will be a good one."

Wm. M. Ryan, of Smyth & Ryan, said in answer to the reporter's inquiries: "We have advised our clients not to make any preparations to sell until after the 1st of October. Of course, there is a difference in property, and each sale must be judged somewhat upon its own merits and characteristics. I would no more offer investment properties in August than I would seaside lots in January. The time to sell seaside lots is when the outing season is at its height, and the time to sell investment properties is when the investing class is in town and is giving its attention to business. We have a lot sale booked for the latter part of October, because we think the time is more favorable for the sale of that particular kind of property than it would be either now or a month later, or until next year. Generally I think September a poor month, really one of the poorest in which to offer investment property for sale. November would be better, and the spring is best of all the year."

A Handsome Investment Property.

A NEW AND CAPACIOUS BUSINESS STABLE, CENTRALLY LOCATED IN THE NEW DRY-GOODS DISTRICT FOR SALE, OR WILL BE LEASED FOR A TERM OF YEARS—ACCOMMODATIONS FOR OVER A HUNDRED HORSES AND VEHICLES.

A new six-story and basement brick and brownstone stable has just been completed at Nos. 121 and 123 Sullivan street, east side, just south of Prince street, for Mr. D. Steinfeld. It occupies a plot 42x75 feet in size, has accommodations for over one hundred horses, and is equipped with the most approved appliances for the business for which it is intended.

Its location is central to that great new section of the dry-goods district west of Broadway, and between Grand street and Washington place, in which the building of mercantile structures has been centralized during the last three or four years. With their large requirements in the way of trucking and light wagon traffic, this new building is bound to receive a patronage which will be limited only by its capacity.

The stable contains 101 stalls, thirty-four of which are in the basement. The first story is designed for the storage of wagons and carriages, with harness lockers, wash-room, repair-room, etc. The second and third floors are fitted with stalls, the fourth for storage, but it can also be furnished with stalls if more accommodation of this character is required. The fifth floor is calculated for the storage of trucks, wagons, carriages, feed or other property, and the sixth floor for carriages, light vehicles, harness, etc.

Among the elaborate equipments of the stable are a large elevator for the convenient and rapid hoisting of teams and vehicles from the basement to any of the upper stories, and an engine which supplies the necessary power for the elevator and for the feed-cutting machinery. The facilities for handling and storing hay, grain and other feed, and for supplying same to the stalls are unsurpassed in any similar establishment. Especial attention has been given to the ventilation and water supply, insuring thus the best sanitary conditions for the equine inhabitants of the structure. The construction is massive and of the best materials.

This fine property is now ready for the inspection of prospective lessees or purchasers. Some one will be on the premises at all times ready to show it to interested parties. It will be leased for a term of years and altered as may be desired to suit the lessee, or will be sold to any desiring investor at a figure which will show a handsome

profit upon the investment. Applications may be addressed to the owner, Mr. D. Steinfeld, at his office, No. 234 Broadway, or to Messrs. Adler & Herrmann, at Nos. 155 and 157 Broadway, between 1 and 4 o'clock.—(Communicated.)

Questions and Answers.

Correspondents who do not find answers to their communications in this paper must please refer to future issues.

SPECIFIC PERFORMANCE—BREACH OF CONTRACT.

To the Editor of THE RECORD AND GUIDE:

About two weeks ago A made a bargain to sell a piece of land for the sum of \$2,000 to B; B pays \$100 on account to bind the bargain and receives a receipt from A, the receipt states what the money was paid for, giving the binding line of the land. Now A sends back to B the \$100 and says that he cannot sell the land to B. He does not give any reason for the return of the money. B sends the money to A and says he wants the land, B keeping the receipt which A gave him. Can B make A keep to his bargain, or what can B do in the matter?

Answer.—B can bring an action for specific performance to compel A to convey the land to him, or, if it is impossible for A to convey it, for the return of the \$100, the reimbursement of any expense that B has been put to for search of title, etc., and for damage for the non-conveyance.—LAW EDITOR.

AGENT'S COMMISSION.

To the Editor of THE RECORD AND GUIDE:

Will you please let me know whether it is proper when leasing a house for a year and a-half (on a lease) to charge a commission on same for the full term of lease or only for one year?

Answer.—It is usual to charge 2½ per cent of the rental for the first year and 1 per cent for the rental for the remainder of the term, and perfectly proper.—LAW EDITOR.

BROKER'S COMMISSION.

To the Editor of THE RECORD AND GUIDE:

Please answer in your next issue: A had a piece of property which he left with B to sell, giving the price \$14,750. B got a buyer at that price, then A wanted \$250 more, but B's party would not give the \$250 above the price A offered to sell it for. A few days afterward A sold, through another agent, to another party for \$14,750. (1) Is B entitled to his commission? In the transfer I see it was his wife that gave the deed. (2) Would it make any difference, as he always represented himself to be the owner?

Answer.—We think B is entitled to his commission if he procured a purchaser able and willing to buy, if he did so within a reasonable time and before he had been notified that A held the property at \$15,000. (2) In any event he could recover the commission from A if so entitled. He could likewise recover from A's wife if he could show that A was her authorized agent in the matter.—LAW EDITOR.

September Meeting of the Sketch Club.

The regular monthly meeting and dinner of the New York Sketch Club was held at the club-rooms on Saturday last. About thirty-five members were present. President E. A. Josselyn occupied the chair. Mr. Ernest Flagg, who was the guest of the club, spoke interestingly on the methods of the "Beaux Arts" and the advantages of a thorough education for architects. Messrs. Frank Hays and Louis Hickman of the Philadelphia T Square Club were introduced. Mr. Hickman spoke of the advance made in the project of competitions between sketch clubs. The president announced that a programme would be issued this month of the above competitions; also that Mr. Flagg's studio would open this month and it would be free this term.

Mr. Clarence A. Fullerton was elected chairman of the house committee to succeed Mr. Pollard, resigned.

Personals.

Beverly Ward is spending the month of September at Morristown, N. J., coming to town Mondays, Wednesdays and Fridays.

Adrian H. Jackson, of the firm of Peter A. H. Jackson's Sons, sailed for Europe in the Lahn on Tuesday. He has gone on a business trip, involving a large transaction in New York City real estate, and will probably return in November after visiting Paris and London.

A. S. Kalisher was one of the home-returning passengers on the Augusta Victoria yesterday, after a vacation of about four months, spent in various parts of Europe and in a tour of Switzerland.

August W. Cordes, of the firm of De Lemos & Cordes, architects, has returned to business after a summer's sojourn in Europe.

D. H. Snelly has returned from his vacation, which was divided between Patchogue, L. I., and Liberty, N. Y.

Broker Samuel Walters will be married on Monday morning to Miss Bijou V. Jehl at St. Lawrence's Church. The wedding trip will embrace Washington and Niagara.

Chas. MacRae returned last week from Europe after an absence of two and a half months. He reports several inquiries for houses to rent in the 5th avenue section north of Madison square, but was not prepared to say what the outcome of present business prospects would be.

Trade Notes.

The Doehring Fire-proof Construction Co., of 289 4th avenue, has secured the contract for all partitions in the new Hoffman House,

corner Broadway and 25th street; also for the elevator shafts in the reconstructed part of the Hoffman House, for which J. B. Snook & Son drew the plans. The Doehring Co. will also supply the partitions in the new University Building, on Washington square, and some partitions in the American Surety Co.'s new building, corner of Broadway and Pine street.

METAL CEILINGS AND SIDE WALLS.

Owing to the demands of an increasing business Mr. W. Schiffman has removed from No. 393 to 397 Park avenue, near 51th street, where he occupies commodious quarters and displays a handsome line of metal ceilings and side walls, making a specialty of metal ceiling with mirror panels. Mr. Schiffman has executed contracts satisfactorily for Jacob Appell, of No. 271 West 23d street; R. Isaacs, of 557 and 559 Broadway; E. A. Cruikshank & Co., 176 Broadway, and many others. For the trustees of St. Patrick's Cathedral he completed a contract at the Calvary Cemetery Church. Mr. Schiffman guarantees all work, will cheerfully furnish estimates and send on application an illustrated catalogue containing much that is interesting about metal ceilings and side walls.

Theiss & Janssen have received the contract for the marble work in the American Surety Company's building, now in course of construction at the corner of Pine street and Broadway.

John H. Parker has received the contract as builder for the new Wool Exchange to be erected at West Broadway and Beach street. Mr. Parker also is the builder and contractor for the Coffee Exchange now being erected at Hanover square and Beaver street.

THE JARDEN BRICK COMPANY, OF PHILADELPHIA.

Pfotenbauer & Nesbit, of No. 1 Madison avenue, sole agents for the Jarden Brick Co., of Philadelphia, have recently completed and have now under way contracts for the brick for the new cable powerhouse, on East 25th and 26th streets; Sachs' buildings, on 10th street, near Broadway, and 23d and 24th streets, near 6th avenue; Nos. 704 and 706 Broadway; Schermerhorn houses, 3d avenue and 68th street; Hotel Savoy annex; Wolfe estate office building, William and Liberty streets; A. Jacob's flats, corner of 126th street and Columbus avenue; powerhouse at Newark, and several school-houses and many other structures. The Jarden Brick Co. has a capacity for turning out one hundred million bricks annually and manufactures high grade front and ornamental bricks in the various shades of buff, red, gray, Pompeian, mottled, old gold, brown, white, etc.

In the line of builders' iron-work Messrs. Neumann Bros., proprietors of the Fulton Iron Works, No. 302 East 114th street, have completed many orders promptly and to the satisfaction of pleased customers. They make a specialty of iron awnings, and also manufacture plain and ornamental iron-work, including railings, beams, girders, sky and vault lights, doors, shutters, sills, lintels, etc. Messrs. Neumann will gladly give estimates to architects, builders and others requiring work in their line.

REMOVAL NOTICE.

Wm. H. Davis, stair builder, has removed from 206 and 208 Walworth street to the junction of Wallabout and Walton streets, Brooklyn. Mr. Davis has been in the business for thirty-three years. He is well known to all the leading builders in trade, and receives a large share of the business done in this line in the city.

Real Estate Market.

Trades have largely contributed to the very respectable aggregate represented by the transactions brought to a successful issue by brokers since Monday. The bona fide sales for cash are, however, above recent weekly averages. House buyers have been fairly numerous and the reports indicate that some investors have been able to purchase to their liking. Would-be buyers are, as a general thing, looking to obtain greater value for their money than owners with a disposition to sell can possibly give them without unnecessary sacrifices. The result is a condition of tardy recuperation in the sales market which is likely to continue until prospective purchasers assume a more reasonable attitude. Brokers all agree that there are buyers in plenty with ready cash to invest in realty, but their views of what should be current prices based on the financial depression can be met in few instances only.

The auction market is without change. Legal offerings are the rule, and although several outside parties were able to outbid plaintiffs during the week there were still lacking the attendance and snap that are usually the forerunners of improved conditions. The initial sale of the season at the Real Estate Exchange was held on Tuesday by Auctioneer John T. Boyd, who disposed of two low-priced parcels for the estate of the late Dr. John Zorn. The judgments of foreclosure announced as settled by the respective auctioneers at the Broadway salesroom were those against the following properties: The westerly block front on 1st avenue, between 95th and 96th streets, the northwest corner of 7th avenue and 120th street and No. 183 Clinton street, all of which were withdrawn. On Wednesday, William Kennedy adjourned, to the 26th inst, the sale of the Imperial flats, Nos. 55 and 57 East 76th street, and to October 10th the sale of No. 352 West 16th street. On the same day B. L. Kennelly announced an adjournment of a sale of the southwest corner of 9th avenue and 59th street until the 23rd inst. James L. Wells, on

Thursday, adjourned the sale of No. 274 Lenox avenue to the 27th inst.

The building of another "L" road station on the 3rd avenue line, between 106th and 116th streets, is desired by residents of Harlem who find it inconvenient to travel to and from either of the stations located at the streets named. A petition has been in circulation for the last few days and when enough signatures have been secured it will be presented to the "L" officials and a strong effort will be made to induce them to give it favorable consideration.

WEST 71ST STREET TO BE PAVED WITH ASPHALT.

The Barber Asphalt Co. has been awarded the contract to pave West 71st street, from West End avenue to the Hudson River wall. The work is to be completed in five days from date of commencement of the work. About twenty fine houses have been built on this street during the past year. Messrs. Lindsay & Johnson are now putting the finishing touches to seven houses on the south side of the street, which are very attractive in appearance.

A BIG OFFERING OF INVESTMENT PROPERTIES.

On Wednesday next, September 17th, at the Real Estate Exchange Auction Room, Nos. 59 to 65 Liberty street, Richard V. Harnett & Co. will sell, by order of the executors of the estate of Benjamin Richardson, twenty-one properties in Harlem, embracing the six five-story and basement brownstone front double flats and stores, Nos. 1926 to 1936 3d avenue; the nine four-story and basement brownstone double flats, Nos. 153 to 169 East 106th street; the four-story and basement brick flat and lot, 20x78x125.11, No. 460 East 115th street, and five vacant lots, two of them 25x80 each, on 4th avenue, west side, 25.11 south of 101st street, and three, 25x100.11 each, on 101st street, south side, 80 west of 4th avenue. For diagrams and further particulars of the property and sale see our advertising columns and address the auctioneers at their offices, 71 and 73 Liberty street. This will be the first great sale of investment properties of the season, and ought in every consideration to receive the attention of investors and speculators.

On Wednesday next, September 19, on the premises, at White-stone, Long Island, at 2 p. m., James L. Wells will sell at auction, in partition proceedings, 85 acres of water-front property adjoining Cedar Cliff Park, and, at the same time and place, 10 acres of excel-lent woodland on Fresh Meadow road, in the town of Flushing. For diagrams and further particulars apply to the auctioneer at his office, No. 59 Liberty street.

Gossip of the Week.

SOUTH OF 59TH STREET.

S. B. Steinmann has purchased of Jeremiah C. Lyons, for about \$127,000, No. 143 Bleeker street, northwest corner of South 5th avenue, a six-story brick building containing stores on ground floor with lofts above for light manufacturing and occupying the entire lot, 32.8x100. M. H. Raubitschek is said to be the broker.

Isaac Bitterman has bought of Mrs. Elizabeth Peshize, the two five-story flats, Nos. 313 and 315 West 17th street, 25x75x98.9, for about \$75,000. This sale is also reported to have been negotiated through Broker Raubitschek.

Albert E. Wesslan has sold through Julius Trattner No. 52 Barrow street, a five-story and basement brick flat, on lot 25x100, to A. Edger for \$37,000.

We are reliably informed that William Frank Hall has entered into an agreement for the sale of the Mystic, a seven-story brick apartment house, 75x98.9, on the north side of 39th street, east of Broadway. No particulars are as yet obtainable, but as Mr. Hall purchased the property last year for a consideration of \$200,000, partly represented by Brooklyn real estate, the presumption is that the latest sale, which is said to be also a trade in part, is at an advance on that figure.

Ames & Co. have sold for Builder James McWalters the two five-story flats, Nos. 142 and 144 West 31st street, on plot 50x90.9x54x 98.9, to a member of a piano manufacturing firm for investment at

about \$80,000. Mr. McWalters paid \$38,000 for the vacant lots in February.

William J. Roome has sold for Gilbert T. Reeder, No. 253 West 22d street, a three-story dwelling, on lot 18x98.9, to Susie Kirwin, of Proctor's Theatre, for \$16,000.

The sale is reported of the new six-story store, No. 248 West 23d street, built by A. Hoffstadt. The terms and buyer's name are withheld.

J. N. Kalley & Son have figured as the brokers in two large trades recently. The most important was closed on Friday of last week, and would have been reported in THE RECORD AND GUIDE of the following day had it been possible to have obtained reliable particu-lars. It was the sale by John T. Williams to Prest. F. A. Palmer of the Broadway National Bank, of Nos. 32 and 34 Lafayette place and the northwest corner of Laight and Varick streets. The former property consists of a new nine-story store and office building, on plot 50x150. It rents at \$33,000, including the store at \$7,000, which has not as yet secured a tenant. The Laight street corner is 62.3x85, with a six-story building. It is rented to two tenants, at about \$15,700. The consideration agreed upon for both parcels is \$715,000, of which \$200,000 is the value of Mr. Palmer's country seat at Stamford, Conn., to be taken in exchange, \$155,000 is in cash and the balance is represented by mortgages for \$240,000, on the Lafayette place property, and \$120,000 on the other.

The other trade put through by the same brokers conjointly with E. P. Hamilton & Co. is a sale of the five-story office building, No. 45 Maiden lane, lot 21.8x132x20.6x135, for Boehm & Coon, to Henry B. Auchincloss for about \$200,000. The property rents at \$14,000 per year. The buyer gives as part consideration his property at Llewellyn Park, Orange, N. J., which is accepted at a valuation of \$100,000.

Folsom Bros. have sold for Antonio, more familiarly known as "Tony" Pastor, the three-story brick tenement, No. 520 Broome street, lot 20x50, to Thomas H. Bell, for \$10,500.

The four-story stone front dwelling, No. 43 East 57th street, 21x60x100.5, has been sold for the estate of the late Charles D. Cooke for about \$52,000.

The firm of L. J. Carpenter has sold for William C. Schermerhorn No. 64 Beaver street, a four-story brick building adjoining the Cot-ton Exchange, lot 24.6x36.7x24.8x37.8, to Kahuan Haas for \$40,000.

Samuel Louis requests us to deny a report—one of several false ones lately published in daily papers—that he had sold the four-story building No. 165 West 23d street.

Arthur H. Masten is the purchaser of No. 115 East 39th street, the sale of which was reported last week.

NORTH OF 59TH STREET.

Editor of THE RECORD AND GUIDE: I

The lien filed against my premises, 10th avenue,
 140th to 141st street, by one named Peter Otto, is
 an act of injustice. The lien itself shows that he
 never performed any work on the buildings, but
 simply claims to have had a contract. The facts
 are that some time in August, 1891, he, with
 others, submitted an estimate to do work on
 those buildings; his references not being satis-
 factory I did not take any notice of his bid. My
 contract to do this work was given Messrs. Knack
 & Fisher for \$1,800 and they are now doing the
 work.

I have this day bonded the lien and instructed
 my attorney to begin criminal proceedings against
 Peter Otto.

REVIEW AND RECORD.

BROOKLYN, SEPTEMBER 15, 1894.

Notes Gathered Here and There.

Notice is given that the Common Council has declared by resolution its intention to repave Columbia Heights, from Middagh to Pierrepont street, excepting the block between Orange and Pineapple streets, already done, with asphalt. Objections must be filed with the Clerk of the Common Council on or before the 8th day of October.

At the meeting of the Board of Aldermen, held on Monday, a protest was received from Nelson J. Gates and twenty-eight other property-holders in Dean street, between Rogers and Nostrand avenues, against repaving that part of Dean street with asphalt pavement at the cost of the property-holders.

Fire-Commissioner Wurster sent to the board a communication directing the Comptroller to transfer to the custody of the Fire Department the lots of the two sites for engine houses, as follows: One, 50x100, on the east side of 1th avenue, between 18th and 19th streets, the other consisting of two lots, irregular in size, on the southeast corner of 4th avenue and Garfield place.

Mayor Schieren has appointed Geo. W. Chauncey, L. Rogers Maxwell, Albion J. Newton, Richard Young and Col. Wm. Hester a committee to inquire into the feasibility and report upon the expense of cutting Flatbush avenue through from Fulton street to the bridge. The general opinion of property-owners is that the improvement would be of vast benefit to the city. Fulton street is the only arterial thoroughfare leading to the bridge, and it is in a constantly congested condition, dangerous to the lives of pedestrians and insufficient for the purposes for which it is used.

Designs for two new engine houses, one to be erected in the 22d Ward and the other in the 8th Ward, were submitted to Fire Commissioner Wurster, on Thursday, by Architect P. J. Lauritzen, of New York. The Commissioner will go over the plans, which embrace many new features.

PROPOSALS FOR CITY WORK.

Sealed proposals will be received at the Department of City Works, until Monday, September 17, at 12 M., for erecting a station house, cells building and patrol stable on the northwest corner of Hamburg and De Kalb avenues.

Brooklyn Real Estate.

Wm. Cole will sell at auction on Monday next, Sept. 17th, at the Brooklyn Real Estate Exchange, No. 189 Montague street, the three two-story and cellar brick houses, Nos. 619, 621 and 623 Franklin avenue, and two vacant lots, 25x126.9 each, on Grant street, north side, between Rogers and Nostrand avenues, in the 29th Ward (Flatbush); and the five vacant lots, 20x100 each, on Martense avenue, south side, between Rogers and Nostrand avenues. Sixty per cent of the purchase price may remain on the houses and 50 per cent on the lots. For diagrams and further particulars address the auctioneer at his offices, 7 and 8 Court square, Brooklyn.

The following are the comparative tables for Kings County Conveyances, Mortgages and Projected Buildings for the corresponding weeks of 1893 and 1894.

JUDGMENTS.

In these lists of judgments the names alphabetically arranged, and which are first on each line, are those of the judgment debtor. The letter (D) means judgment for deficiency. () means not summoned. (f) signifies that the first name is fictitious, real name being unknown. Judgments entered during the week, and satisfied before day of publication, do not appear in this column, but in list of Satisfied Judgments.*

BUILDING MATERIAL MARKET
NEW YORK.

BRICKS.—Aside from few minor variations, there is a deal of ancient history in this week's reports upon the condition of market for Common Bricks. At the time this report is written the accumulation of cargoes at the depot has run down somewhat lower than for a long while past, but nevertheless there were still some goods unsold and no doubt seemed to be entertained that as soon as manufacturers learned of the shrinkage of first hand supply here they would simply nisten forward additional amounts. There is plenty of stock to ship from, and some people among the local trade express the opinion that even now enough brick are made to last until the commencement of next production, unless demand very unexpectedly and decidedly improves, and the remarkably favorable weather this season insures a high average of condition. Prices on the general range stand as last quoted. Most of the demand has come from consumers intending to use up the stock promptly, but there are some dealers who are gradually stacking up supplies as from time to time they can pick up a cheap cargo from the fine offering of brick available. A little more demand for Pales induced sellers to hint at higher prices, but it is not known that an advance was paid. The suspension of an old and popular New Jersey manufacturing concern has been announced during the week, and much regret is expressed among our local operators. The greatly depressed condition of market was no doubt the direct cause of trouble, although the location of the plant was thought to be something of a handicap.

LATH.—It has been a slow and not particularly interesting market. Further arrivals were reported, but nothing of magnitude, and receivers managed to take care of the stock without much difficulty, and to obtain former rates. They appeared very well pleased, however, that the quantity was not greater, and hope that reports of light amounts coming along are true. Dealers, in great majority of cases, are thoroughly well stocked, and will have to encounter a much better trade before talking about additional investments.

LIME.—Conditions are irregular, but the general pitch of the market continues in buyers' favor. That will apply even to finishing stock of which custom seems to be getting fairly well supplied, but is most decided on the poorer grade only salable under pressure. Arrivals have not been particularly large, but the demand was decidedly scanty and indifferent compared with the number of sellers ready to meet it, and a depressing influence upon the value line was natural. Quotations are quite irregular, the very best claiming old figures or, say, \$1.00 for lump and 80¢ a bush for common, but the impression seems to be that goods billed on that basis are allowed a discount in settlement, especially if for cash, and we have straight report of sales at 75¢ for common Thomaston.

LUMBER.—It is a good sign that pretty much all hands are endeavoring to find something cheerful to say of the market. It is a difficult matter in many cases to prove any actual gain, but that further deterioration in conditions has been checked is accepted as a cheering feature, and all hands are hopeful of good results. Local stocks are accumulating, and some of the yards commence to show extensive piles of new lumber, not a few of which represent bargains picked up from cheap offerings during the season, but there are plenty of dealers who still need stock to give them working assortments, and they are negotiating for them, if not with spirit, with at least a more general showing of interest than during the summer months. Cost as yet shows few quotable changes, and transportation charges keep low for the season.

In a general way there still appears a disposition to view the removal of import duty with a certain measure of indifference, although here and there buyers have found evidence that they may obtain greater benefit than at first expected, as the Canadians feel anxious to secure some orders and make a partial balance against the long period of dull trade before winter sets in. In this connection it may be well to record that the investigation of the Treasury Department has removed previously existing doubts regarding prevailing conditions in Canada, and there will be no necessity for retaliatory duties on timber and lumber.

The Canadian Government, it appears, under the Dominion Customs Act, in force July 26, 1891, provides that on certain forest products, the Governor-General may, by proclamation in council, impose an export duty, or reduce or remove it after it is imposed, in like manner. But no action has been taken under the authority of the Act alluded to, and there being no export duties now in force, the entire list of lumber and timber products under that part of the wood schedule in the free list will come in free. The Governor-General at Ottawa states that there are no discriminating stumpage dues in force.

White Pine remains about steady and for the finer qualities is dull. Demand for export parcels is also somewhat slow, as most of the leading shippers control pretty good stocks, but in boxing the deal has been fair with promise of further increase as the direct result of gain in general business conditions and an increase in movements of merchandise, dry goods and kindred articles in particular. The influence upon values of box has been strengthening and some of the agents are predicting an early advance in cost on the plea of scant supplies. It is said that a considerable quantity of stock heretofore held at mills and interior storing points is being moved forward to this market in order to take advantage of low transportation charges.

Yellow Pine has much the old character of demand. Now and then there might be an opportunity to pick a few stray orders for flooring, but generally the business is confined to special bills, with the usual scramble of sellers and the fine

paring of prices when customers are known to be ready to talk business. Advice from the South report considerable shutting down of mills. Carolina pine is reported upon quite irregularly, but on the whole the comments are not cheerful. An increased demand for boxing is already felt, and is quite likely to expand, but the offerings ample, sellers anxious to secure trade, and prices ruling easy in consequence.

Spruce may be considered firm through the support of features previously noted. Of State stock there are scarcely any offerings, the Virginia make is kept well in hand and understood to be selling only on orders, and the Eastern manufacturers have kept good their promise to abstain from any free offering of random. There is, however, considerable soliciting of special orders and frequently at prices so low that dealers are tempted to close upon the opportunity for getting just such stocks as they want and at practically their own price. Advice from the Eastward report that some operators, unable to sell their logs, either have or propose leasing mills and taking orders for lumber in hopes of in that way getting some money out of their stock.

Piling is getting into somewhat better shape. It has had quite an irregular season, and at times when it became necessary to sell a cargo hurriedly the price was extremely low. A very considerable portion of the arrivals, however, came to hand on contract, and with no serious accumulation of stock receivers now make a firmer general stand.

Shingles have been suffering this season under the influences of depressed trade, and at times an excessive offering. That will apply to all grades, but especially so to express, which for a while forced forward very freely. Of late, however, arrivals have been moderate, the report comes that mills are shutting down, and the market so shapes as to induce a feeling of considerable hopefulness among receivers.

Hardwoods are doing very well in getting an increased call from consumers, and, while there is no real activity, operators generally appear inclined to assume a hopeful attitude for all leading descriptions. There has been a larger number of agents looking around for custom, but contrary to calculations the pressure to realize was far less than anticipated, and it is intimated there will be no heavy amounts coming forward. Some of the popular people are particularly sanguine of scant offerings in consequence of reiterated reports of a scant supply of logs. Export trade is fair, but without specially new features.

The Treasury Department has issued a circular to officials on the Canadian border directing them to dispense hereafter with all inspection or certification of American lumber, or any of the manufactures thereof included in paragraphs 672 to 683, inclusive, of the free list, which goes through Canada in transit to another point in the United States. Very cumbersome regulations have been in force up to this time in certifying the country of origin, and the removal of the inspection and marking regulations will be a great relief to the American lumber trade, especially on the Maine and New Brunswick frontier.

GENERAL LUMBER NOTES.
STATE.

The Albany Argus reports as follows:

Matters did not have a very brisk appearance about the district the past week and there has been no further growth in trade. A fair number of orders were received by mail, but shipping was slack after the first day or two. Receipts of pine are expected to continue light until next month. A prominent spruce house denies that the abrogation of the tariff on Canadian lumber has had any adverse influence. Prices on spruce have been too low lately to permit the bringing over of the Canadian product. Freight on the canals and on the lakes continue unchanged.

CANADA.

The Toronto Monetary Times reports the following: Last week nearly one hundred lumbermen gathered in the rotunda of the Board of Trade in this city for the Ontario Government's sale of timber limits. The area of timber offered was 1,864 square miles. Of this 817 miles was in Ontario, and the balance in the Province of Quebec. Notwithstanding that the limits were the most extensive ever offered at one time in this market, the bidding was anything but animating. Only in one instance was the upset price reached, when Mr. N. Garland bid \$140 per mile for 36 square miles in Caldwell township. The best bids made were \$2,000 per mile on berths 181 and 182 of the Barnett and Mackie limits; \$31,000 for berth 71 in Snider; \$600 per mile for the Lake Expause limit; \$1,500 per mile for berth 1, township of Prince, and \$10,000 for Blind River Mill, and 28 1/2 miles in Striker township. Many and varied reasons were assigned for the lack of spirit in the would-be purchasers. The prevailing opinion, however, seemed to be that the owners of limits who hold for use only have quite enough to keep them cutting for a good while yet; and then again the speculators are not realizing on former investments in a manner to encourage them to invest again.

THE WEST.

The Northwestern Lumberman as follows:

The reaction from extreme market dullness is now pronounced. It can be seen that the movement of lumber in all lines is increasing, and that manufacturers and dealers have more confidence in the future than early in the season. But reaction and gradual rise of demand and movement does not necessarily mean that the tide is to swell to the fullness characteristic of late prosperous years. We should not forget that conditions now are very different from those prevalent before the panic and subsequent excessively dull period, and that new forces and new absences of forces have supervened. The tariff on Canadian lumber has been abrogated, and it is evident that this has stimulated effort to increase product in the provinces and place it on the markets of the States. Say what we may, by an ingenious construction of argument, about this new factor in supply and demand, the truth will remain that the increased amount of provincial product which will be thrown on American markets will displace that much produced on this side our northern boundary. Prices are now unpleasantly near the producing

cost line, and the prospective influx of Canadian lumber will not help to widen this margin.

Recent developments should help the fall and winter market for northern pine to some degree. The late forest fires have consumed as much as 62,000,000 feet of lumber and 8,000,000 to 10,000,000 feet of logs, and probably much more, could full data reveal the full extent of destruction. This, added to the 250,000,000 feet previously burned in mill and market yards this season, swells the total of lumber which has vanished in flame and smoke since last spring to fully 310,000,000 feet, and probably the amount is nearer 350,000,000 feet. This vast loss of product has mainly occurred in Wisconsin, Minnesota and this city, and thus directly affects the northwestern markets and, more remotely, the markets of the entire country.

If so much lumber as that were thrust suddenly into the supply it certainly would have the effect to weaken values; why should not the extinguishment of as much force values upward? Besides, the sweeping forest fires, covering a large portion of northern Wisconsin and much of upper Michigan have checked production more than can be estimated. Lumber under contract has been wiped out. Further output of the mills must fill up the gap. Delay in meeting contracts and a late filling up of stocks in the markets will be the result. This will induce new inquiry for lumber to meet the fall trade. It is the same as creating a new and unexpected demand for a large amount of lumber and should have a strengthening influence on prices.

At Chicago:

Offerings have moved off with fair facility at practically unchanged prices. Short piece stuff is selling at \$9 for short green stuff and dry when of indifferent tally, and \$9.25 for lots of desirable tally or strictly dry stuff. The piece stuff arriving is mostly short lengths, with a sprinkling of long. The demand for slum-puns is not active, and prices on such lumber are not as firm as on long wide, which is in relatively better demand.

In inch lumber the call is for 12-inch boards, strips and some thicknesses of select. Carcasses which contain a large percentage of such lumber sell readily, while those which run largely to 2x6 and 2x8 piece stuff are not of very ready sale. Controversy between seller and buyer is general about such stuff. Some hemlock is arriving, but it is rather sticky on the market, and prices on it are rather uncertain.

There is not much change in the poplar market this week, though a firmer feeling continues to prevail. Prices are not much higher than they were a month ago, improvement in this respect awaiting an increased demand. Stocks of dry lumber are scarce, and with the short supply of logs there is certain to be a decided shortage in stocks of lumber on hand January 1st.

The Mississippi Valley Lumberman furnishes the following:

Michigan, Wisconsin and Minnesota have been scourged with fire as never before in their history. From Saginaw on the east to the Red River valley, a distance of nearly 800 miles, comprising the white pine belt of the United States, the destruction of timber commenced last spring, has continued each week, extending over new territory until now it has reached the proportion of a wholesale calamity. Untold millions of pine have been killed. Thousands of farms and camps have been burned, scores of villages scorched, and several literally wiped out by the fires. At this writing no estimate can be made of the destruction of white pine, but the fact that a heavy percent of all the pine in the three states is killed by fire and must be cut in a matter of the greatest significance to the entire trade. Every acre of this burned timber must be cut this winter or it is absolutely worthless for lumber. No matter whether the market price be much or little it must be marketed or at least converted into lumber.

A careful study of the fire reports seems to point to the doubling of the log crop of the coming winter and then a vast quantity will be lost. The manufacturers' association might be utilized to ascertain the amount of timber thus to be forced on the market and the logs distributed so as to save a large amount of green pine and thus still limit the cut to the reasonable demands of the trade. Unless some such plan as this is adopted it is almost certain that logs and lumber will be a drag on the market at any price in 1895.

Let all the burned timber be cut and only the deficiency if any be made up from the live timber and comparatively little harm will accrue to the lumber makers.

From throughout the white pine section reports come to *The Lumberman* of a slight revival in the consumption and likewise the demand for lumber, but beneath it all there is an undercurrent of feeling that is not encouraging. It is caused by the extreme low prices at which lumber is being sold to-day. With the present volume of trade and fair prices only, smiles would wreath the face of every lumberman in the northwest. The rock on which trade is now breaking is low prices and here and there lumbermen are waking up to a realization of this fact and are endeavoring to take steps accordingly. Minneapolis has already taken the lead and will advance prices fifty cents on dimension and on other grades correspondingly. This is not an advance on the list of last February but an advance on actual selling prices at present, and will take effect the 10th of this month. It was no doubt true that the Minneapolis market was as weak if not weaker than any and it needed to take such action. Lumbermen along the river below this point are hopeful for stiffer prices and feel relieved now that a movement in the right direction has been made in this market.

The Columbia Standard Bicycle of the World.

Graceful, light and strong, this product of the oldest bicycle establishment in America still retains its place at the head. Always well up to the times or a little in advance, its well deserved and ever increasing popularity is a source of pride and gratification to its makers. To ride a bicycle and not to ride a Columbia is to fall short of the fullest enjoyment of a noble sport.

METALS.—COPPER.—Ingot meets with a slow and unimportant market. The demand is principally for small lots wanted by regular custom for immediate use, and there seems to be a general refusal to negotiate upon any kind of stock for future delivery. Offerings, however, are moderate, and holders appear disposed to ask a trifle more money. On the average range of valuation we quote at 9.51 a lb. for Lake and 8.9 a lb. for casting brands. Manufactured copper selling fairly, but without any special increase of demand of late, and producers experience no difficulty in satisfying the outlet. Prices remain steady. We quote as follows: Sheet, not above 30x72 in., 16 oz. and over, 11c; do, 11 to 16 oz., 15c; do, 12 to 14 oz., 16c; do, 10 to 12 oz., 17c; do, 8 to 10 oz., 20c; do, under 8 oz., 22c. Sheets longer than 72 inches 11c. for 12x16 oz., 19c. for 10x12 oz., and 25c. for 8x10 oz. Sheets not above 36x96 in., 16 oz. and over, 11c; do, 11 to 16 oz., 15c; do, 12 to 14 oz., 16c; do, 10 to 12 oz., 17c; do, 8 to 10 oz., 20c. Sheets longer than 96 inches 11c. for over 32 oz., 15c. for 16 to 32 oz., 23c. 14 to 16 oz., 19c. 12 to 14 oz., 23c. for 10 to 12 oz. and 27c. for 8 to 10 oz. Sheets not above 18x96, 32 to 61 oz., 11c; do, 16 to 32 oz., 16c; do, 14 to 16 oz., 18c; do, 12 to 14 oz., 20c; do, 10 to 12 oz., 21c. Sheets under 18x96 and longer, 14x17c. for 32 to 61 oz.; 19x26c. for 16 to 32 oz.; 21x26c. for 14 to 16 oz. and 25x26c. for 12 to 14 oz. Bolt copper, 3/4 inch diameter and over, 14c. Circles, segments and pattern sheets, 60 diameter and less, 3c. above price of sheets of same thickness; circles, 60 to 96 do, 4c. do; circles, 96 do and over, 5c. do. Cold or hard rolled copper, 1 1/2 c. per lb. above the foregoing prices. Copper bottoms, 18x24c. per lb. Iron—American Pig has not reached a point of animation, but a fair trade is doing, and the movement tends to increase somewhat. Some operators assert the gain to be only seasonal and natural, without reaching the average of former years, yet much more satisfactory than a month ago. Prices are well supported and the offering of stock under control. We quote at \$12.00 a 13.00 per ton for No. 1 X foundry; \$11.00 a 12.00 for No. 2 X do., and \$10.00 a 11.00 for Gray Forge; Scotch pig iron, \$20.50 a 22.50. Old material remains fairly steady in price for pretty much all descriptions of stock, but the demand not liberal and runs principally to jobbing parcels. Supplies ample. We quote at \$11.00 a 11.50 for old iron rails; \$10.00 a 10.50 for No. 1 wrought scrap; \$8.50 a 10.00 for cast scrap; \$10.00 a 10.50 for old car wheels, and \$6.50 a 9.00 for borings, stove plate, etc. Manufactured iron presents little in the way of new features, except that in a few cases additional orders have been placed for structural work. Prices continue steady as a result of competition among makers. The following quotations are made f. o. b. at Pittsburgh: Angles, 1.20 a 1.25c; tees, 1.35 a 1.40c; beams and channels, 1.30 a 1.35c; base; sheared bridge plate, steel, 1.25c; Universal mill plates, steel, 1.25c; iron 1.35c; refined bars, 1.35c. base. Steel rails are neglected, and the market develops rumors of a probable early disintegration of the manufacturers' association, which would, it is thought, lead to lower rates, and old figures are now more or less nominal. We quote standard sections \$24 per ton at mill, with usual advances for delivery at tide water. Pig lead has been selling along in ear lots to some extent, but buyers manifested no inclination to enter upon extensive negotiations and business in general was dull. Prices eased off a trifle, too, closing however about steady. We quote at 3 1/2 a 3.35c. per lb. The manufactures of lead are quoted at 5 1/2c. for Pipe, 6 1/2c. for Sheet, 15c. for tin-lined Pipe, and 37 1/2c. for Block Tin Pipe. Pig Tin has continued quite irregular, and although recovered somewhat from former low figures, does not as yet show much solid strength. Offerings are gradually increasing. We quote at about 16.25 a 16.30c. for round lots, and 16 1/2 a 16.40c. for jobbing parcels. Tin plate has a steady, small spot business, and there is occasionally some interest shown in futures, but generally business proves light, and the tone on values is easy. Supplies of staple goods prove ample. We quote as follows: L. C. Charcoal, Melyn grade, \$6.00 a 6.05; Charcoal, Melyn grade, crosses, \$7.75; L. C. Charcoal, Allaway grade, \$5.30 a 5.35; Allaway grade, crosses, \$6.40; Charcoal terms, M. F. grade, 11x20, \$7.20 a 7.25; M. F. grade, 20x28, \$11.10 a 11.15; Worcester, 11x20, \$5.70 a 5.75; Worcester, 20x28, \$11.00 a 11.05; Allyn grade, 14x20, \$5.05 a 5.10; Allyn grade, 20x28, \$10.00 a 10.25; D. R. D. grade, 11x20, \$1.85 a 1.90; D. R. D. grade, 20x28, \$9.70 a 9.75; L. C.

Life seems so vulgar, so easily content with the commonplace things of every day; and yet it always nurses and cherishes certain higher claims in secret, and looks about for the means of satisfying them.

GOETHE.

THE course of events lately indicates pretty clearly that the more thoughtful of the industrial community, that part of it which is in closest touch with the centre, is revising or at least reconsidering its judgment about the probable immediate course of mercantile affairs. The curious thing about the present depression has been that from the very first our people have persisted in regarding it as an accidental misfortune which would speedily pass away when one or two small matters had been righted. At one time it was thought that if the silver question was disposed of business would be resumed instantly as though nothing had happened, and when these anticipations were proved false every one said the tariff agitation was the source of bad times, and that matter settled one way or another it would leave the country free to immediately return to its former state of prosperity. When the last of these impediments was removed a few weeks ago by the new tariff act going into operation it was confidently asserted that fall trade would be marked by very great activity. Disappointment in realizing these hopes is perhaps accountable for the slightly gloomier views which the public have come to hold within the last couple of weeks. Every one admits that there has been, upon the whole, considerable improvement, but the improvement has not been anything like as great as was looked for. The opinion current now is that the coming election is the lion in the path, and we must wait until the political wrangle is finished before the business of the country can resume its old state. The trouble with all these views is that they are fundamentally wrong. In the first place the disasters which overtook us last year were not by any means accidental. They were not caused by unwise monetary laws, nor were they in any real sense continued by the tariff agitation, though undoubtedly both of these matters were factors which contributed to bring about financial disaster. There was nothing at all adventitious about the panic and depression of 1893. It arose from adverse economic conditions which had been creating for some time, and just as our anticipations concerning the salutary effect of the repeal of the Sherman Act, and the settlement of the tariff agitation were exaggerated and falsely based, so we shall find that all anticipations as to immediate great increase of commercial activity are erroneous. We cannot jump back into prosperity. The country must grow into it. Our affairs have improved within the last few months, and the prospect is that they will continue to improve, but improvement will be slow and steady. In the meantime, so long as people indulge in wild hopes, there will be reactions, and reactions will occasion despondency. The situation, however, is and will be encouraging, but it is unreasonable to expect any very sudden stroke of good fortune to happen to us. Like the man whom the waves washed out of the boat, we must trust to our swimming to gain our former position. It is foolish to think that another wave is coming to wash us back to where we were.

IMPROVEMENT in trade conditions in European markets continues to be more an affair of symptoms than of actual transactions. The plethora of idle funds prevails in all the financial centres, and as yet there are no indications of any activity in demand to stir rates from the almost nominal point that has ruled of late. It is evident that people are not yet thoroughly convinced of the reality of the much talked of "revival of trade." There need be no doubt, however, that things gen-

erally are in a much better shape than they were a few months ago. The greater activity in the iron trade is one indication of this fact; the larger receipts reported by railroads is another. Upon the whole, however, the feeling abroad to-day is somewhat more conservative than it was a week or two ago, when slight activities were regarded as promises for more than has actually been realized so far. Investors are evincing a degree of caution that precludes expansion, particularly with classes of securities that have been distinguished by "financiering" and other methods of manipulating certain peoples' property into the pockets of "insiders." This tardy caution on the part of the investor is rather broad than finely discriminating, and it would be idle to deny that even reputable American securities will labor for some time to come under the odium which has been created by not a few criminally managed enterprises which reached the end of their rope lately on this side of the water. Indeed, the commercial world at large is in bad repute; and that fact undoubtedly is one impediment to the realization of the better times which conditions appear to warrant. Among the indications that trade is slightly better than a year ago, the increase in the receipts from shipping on the Suez Canal deserves to be noticed. The tolls received in August of this year amounted to 6,110,000 francs, against 5,840,000 francs in the same month of 1893 and 5,420,000 in 1892. In Germany, bear operators are reported to be again on the aggressive, and though the improvement in business continues, there is something, it is said, in the general position which goes to support their efforts. In Austria, in iron production, there was during the first seven months of 1894 an improvement of 660,000 cwts. compared with the same period a year ago. The reduction of the United States tariff on pearl buttons from 140 per cent. ad valorem under the McKinley act to 84 per cent. has been received with mixed feelings. It renders a limited exportation of this article possible again. The McKinley tariff, it will be remembered, practically ruined the button industry in Austria. It deprived 3,600 turners of work. Our former high protective duties were particularly disastrous to Austria, which country exported to the United States in 1893 only about \$1,500,000 worth of merchandise.

THERE are predictions which people continue to reiterate in spite of the fact that none of them has ever been verified. One of these is to the effect that the limit of the production of gold has been reached. Whenever the output of that metal becomes stationary or begins to fall off, the world is assured that it is drawing upon a supply which has reached its maximum point and which must thereafter continue to diminish. There is always something plausible to these vaticinations, because their falsity cannot be demonstrated by an actual appeal to facts. A year or two ago it did not seem to some people to be at all questionable that the greatest production of gold had been reached. No new sources of supply were in sight, and the old fields were apparently evidently giving out. To those who held this view, figures recently made public by the Director of the United States Mint must be a surprise. In his last report the director estimated that the world's gold production for the year 1894 would be about \$169,000,000—greater than in any previous year. This was enough in its way; but since issuing that report Mr. Preston has found it necessary to even increase his estimate, and now he says that he sees gold to the value of \$174,000,000 in sight, and adds that the prospect is that even this amount will be below the fact. He estimates that the United States will yield \$42,000,000 or \$43,000,000 of gold, against \$36,000,000 last year. South Africa will produce \$10,000,000, against \$29,000,000 last year, and Australia \$38,000,000, against \$35,680,000.

OBSERVERS of our weekly reports of the statistics of building cannot fail to have noted the continuous improvement, indicated by these reports, in the building industry of Brooklyn since the first of August. Compared with the records for the corresponding weeks of last year, when the panic was still hot upon us, the figures for the last eight weeks are even more encouraging. In tabular form they make the following showing:

1893			1894		
Week of.	No. of bldgs.	Amount.	No. of bldgs.	Amount.	
Aug. 4	29	\$113,100	50	\$177,885	
11	51	183,410	29	208,250	
18	23	71,865	66	139,595	
25	16	109,550	56	389,111	
Sept. 1	18	61,520	68	283,370	
8	23	79,975	70	224,225	
15	22	151,810	97	274,683	
Totals.....	182	\$801,230	436	\$1,697,119	

Part of this remarkable increase is due, it is true, to the extension of Brooklyn's supervision of buildings over the newly annexed territory. But it ought further to be remembered that many of the projects for which plans were filed a year ago were not carried out at that time because of the financial stringency then prevalent. So that, remarkable as these figures are, they do not express the whole fact as regards the improvement in building operations

this fall over last fall. What is of nearly equal importance is the further fact that business is advancing at nearly equal rate in the other branches of real estate. As far as may be judged from these indications, Brooklyn real estate is improving in every direction.

Rapid Transit.

WILLIAM BARCLAY PARSONS, Chief Engineer of the Rapid Transit Commission, is back from Europe, where he was sent early in the summer by the Commission to investigate and report upon the municipal transit systems of Europe. Mr. Parsons was a passenger in the New York on her record-breaking trip from Southampton three weeks ago to-day. During his sojourn abroad he visited London, Paris, Edinburgh, Liverpool and other cities, and collected a great mass of information embraced in correspondence, pamphlets, reports, photographs, etc., which he is now engaged in collating and putting into shape for a report to the Commission.

He will probably have ready at least a preliminary report when the commission meets in its first session next Tuesday, to be followed probably a month or so later by a more detailed and elaborate presentation of his findings and recommendations. On the subject of electric traction Mr. Parsons said he had not the least doubt now, if ever he did have, that it would be practically available for the rapid transit road that the present commission is charged with providing for New York City.

Nothing of a decisive character will be determined by the commission upon this question until the voters shall have decided whether the city shall build and own the road or whether more valuable time shall be lost in the effort to find some corporation which will be kind enough to accept a gift of the franchise and then take its time about building the road and putting it in operation. This they will be called upon to do at the forthcoming election, now only a little over seven weeks distant. Among the many ballots they will then be called to give their electoral attention to will be two, one of them reading:

"FOR MUNICIPAL CONSTRUCTION,"

and the other:

"AGAINST MUNICIPAL CONSTRUCTION."

There ought not to be any doubt how the portion of this community that is interested in real estate and building will vote on this question. A favorable determination of it will go a long way toward restoring prosperity to all branches of the business.

Boycotting the Lumpers.

"SORRY" MEN PREVAIL IN THE COUNCILS OF THE TRADES' UNIONS, AND A BOYCOTT IS ORDERED AGAINST CONTRACTING CARPENTERS—WILL BE EXTENDED TO OTHER TRADES IF SUCCESSFUL NOW.

A conflict of serious import to the building trades is in progress between the trades' unions and the contracting carpenters of this city. It is known in the trades as a strike against the lumpers, and though directed now only against the carpenters it will in logical sequence, if successful now, be directed against all other branches of the building trades until either the strike is broken or the strikers achieve their ends.

How threatening the matter is to all these branches will be understood when the demands of the strikers, as expressed in their actions, are clearly understood. The contention is a new one only in action. For more than six years a body of malcontents among the union workmen has been agitating for a strike on it. Last spring they nearly persuaded the bricklayers to begin the attack and the latter were restrained only by their admirable contract with the master builders, under which they were bound not to engage in any sympathetic strikes.

The motive for the strike so far as can be ascertained, after allowance has been made for obvious exaggerations on both sides, is as follows: Long years ago, when building was a comparatively simple art, the construction of a building used to be let to a single contractor, generally termed a master-builder. He took the entire contract, purchased or made all of his own materials, hired all his own men, and as many foremen for the different branches as the magnitude of the job would demand. The changed conditions, the vast increase in the assortment and character of materials and the introduction of new and intricate improvements has led to the specialization of the industry to such an extent that in recent years it has been the exception for the contracts for a new building to be let in bulk. The rule is for the owner to let separate contracts to separate contractors for each division of the work. The contractors have come to be known among the trades' unions as lumpers, because they take lump contracts for special parts of the work.

Now the complaint against these lumpers is that they discriminate in favor of good workmen and against incompetents, "bums" and other descriptions of "sorry" men. The lumpers have generally grown up from the ranks of the journeymen, and from long familiarity with the work and the men, are able to determine whether a man is a skillful workman and whether he is doing an honest day's work. To men who fill these conditions full union rates are ungrudgingly paid, and they are kept at work as steadily as the exigencies of the business will allow. When, however, a workman shows himself incompetent

or negligent or lazy or unreliable, as so many are declared to do who come as faithful hangers-on to the trades' unions, the lumper gives him work only when better men are unobtainable, and pays him only in proportion to his effectiveness. It is from this class of men that the complaint against the lumper has arisen.

After long agitation they have at last succeeded in moving the Board of Walking Delegates of the Building Trades to espouse their cause. The latter have begun their attack, through one of the best organized unions, on the lumping or contracting carpenters. On the 5th inst. they called out their men on about a dozen jobs in the residence sections of the city, including, among others, four double flats for J. Livingston & Son, in 89th street, between 3d and Lexington avenues; four flats on 133d street, between Lenox and 7th avenues; ten flats for John Casey on 98th street, between 9th and 10th avenues; three flats for Charles Lowen, covering half the block front on Amsterdam avenue, southeast corner of 85th street; a row of fine houses for Walker & Lawson on Riverside Drive, between 103d and 104th streets; an apartment house at No. 329 West 85th street, on which Paul B. Pugh was the carpenter; three flats for Gordon Bros. on Amsterdam avenue, between 82d and 83d streets; and the row of American basement houses, which Horgan & Slattery are building, on 71st street, near Riverside Drive. There are many others, of course, but the particulars about them are not at hand.

The Walking Delegates in all of these instances demanded that the owners should cancel their contracts with the carpenter contractors, hire their own men and engage foremen satisfactory to the unions. One of their rules is said to be that no man should be engaged as a foreman who had been lumping within the last year. Thus far the Walking Delegates have already carried their orders. Some of the contractors say that they have freely declared that their next move will be to boycott all trim made outside the City of New York and the lumping framers at the same time.

Most of the jobs struck were in a poor condition to withstand the demands of the Walking Delegates and various sorts of compromises were at first made, some of them with disastrous results. The completion of the buildings in time for the fall market was in nearly every instance dependent on the forwarding of the carpenter work. Most of the lumpers, therefore, out of regard for the interests of the owners, surrendered their contracts upon agreed payments for work done and the carpenter work was taken in hand by the owners themselves. They in turn found new troubles on their hands, and in some instances have split completely with the trades' unions. Where the contracting carpenters refused to surrender their contracts and went on with non-union men, or with their old men, who refused to obey the orders to strike, other trades were called off the job—the plasterers, gas and steam fitters, varnishers, plumbers, painters and grainers among them—and the owner was thus forced to terms. Since their concessions, however, some of the owners have found it impossible to conform to the unions' demands and have gone on with their work with such men as they could obtain without regard to the unions.

A typical case was that of John Livingston & Son. Stephen Ball was his contracting carpenter. Mr. Ball was paying the union scale, but because he had committed the sin of taking the contract and because he was one of those who preferred competent and reliable workmen above "sorry" men, his carpenters were called out. In order not to embarrass Mr. Livingston, Mr. Ball threw up his contract. Mr. Livingston engaged a foreman whom he had never seen before—a man who stood all right in his union. Yesterday the Walking Delegates came to Mr. Livingston and told him he would have to discharge that foreman, because it had been discovered that he had worked as a lumper for some other man some time during the last year. Then Mr. Livingston gave up trying to placate the unions, and told the Walking Delegates that he would try and finish his houses without the aid or interference of the unions. Last night he authorized Mr. Ball to advertise for men, union or non-union, and go ahead with the job. Mr. Ball said he had no doubt but that he could get all the men he needed, and that he had received assurances from the plumbers, varnishers, brownstone men and painters that they would stand by him. He said there were too many men anxious to work while the opportunity is afforded—union men as well as non-union men—to make the success of the Walking Delegates and their "sorry" men a possibility if only the owners would present a firm front against them.

Of course, the business men most deeply affected have not been lying supinely idle and allowing the "sorry" men's strike to win by default. Three meetings have been held—a handful at first, at the Building Trades' Club, about ten days ago; then about sixty, at the Renwick Hall, 3d avenue and 86th street, on Saturday night last, and one hundred and twenty, by even count, last night at the same place. Among those who were present at last night's meeting were Francis J. Schunngg, Arthur Gorsch, John P. Leo, Horgan & Slattery, John Livingston & Son, Gordon Brothers, Louis Wirth, Bingham Bros., Thomas Molony, John Hallahan, John W. Livingston, Watkins Bros., Alphonse Hogenauer, August Jacobs, George Hibbelles, Wm. Sauer, Coons & Bradbury, Stephen Ball, Paul B. Pugh, Patrick Prendergast, Philip Braender, James Hartley, James Brady, W. E. Thompson, Wm. Saunders, James McIntosh, Chas. W. Bahr, Wm. Stebbins, Wm. McKenzie, John Eyfe, Roach & Hartnett, Matthew C. Kernan, Platt & Marie, Wm. Schlosser, Wm. Lawben, Thos. A. Cordler, August Gansmuller, Joseph Schwarzle, Geo. G. Bauzer, Terrence Gannon, Stanhouse & McIntyre, James Bradley, John Gould, John J. Farley, W. E. Thompson, Chas. Lowen and Wm. Stephens.

Architect and Builder John P. Leo, who officiated as chairman, opened the proceedings with an address, in which there was little or no reference to existing troubles, but a logical argument for organi-

zation of all of the building trades for mutual protection. He said it was time for a new declaration of independence. They were all acquainted with the troubles of the last two weeks in the trades, and at a meeting last Saturday it had been resolved to call this meeting of all the employers of skilled labor in the building trades and see what could be done in their mutual interests. There were 100,000 men and millions of dollars engaged in the industry in this city, and yet there was a rational agreement with only one of the trades' unions—the bricklayers. When troubles like the present came upon the trades there was no effort made to agree, but one side got hot and the other hotter and then came strikes, mechanics' liens and loss of profits to both sides. It had been suggested that they form a union for warfare; if that suggestion were adopted they might better disband at once. But if they would organize for mutual benefit and protection, making the workman's interest their interest as well, they could not do it too soon.

This speech was entirely too conservative to suit many of those present, and inquiries began to be fired at the chair asking what they were going to do in the present emergency: why prompt action was not taken at once, etc. Then C. A. DuBois offered this preamble and resolutions, which, after it was repeatedly explained that without organization they could do nothing effectively, was unanimously adopted:

"Whereas, The interests of all engaged in the building business, both employers and employed, have been sadly injured by the lack of intelligent co-operation, and the result has been a tendency to array the employers against the employed and vice versa, and knowing full well that the present lack of system has resulted in great injury to all, therefore be it

"Resolved, That the interests of the mechanic and employer are mutual, and there should be between them a most cordial feeling, and be it further

"Resolved, That for the protection of our mutual interests we band ourselves together in an association, which association shall be known as the Employers' and Builders' League of the Building Trades of New York City. In this body all reputable employers and builders shall be welcome. They shall adopt such rules as shall be for the best interests of all, and by careful conservative action preserve the interests of the owners, contractor and journeyman, and by arbitration avoid all necessity for liens, strikes and lockouts, reference, etc."

Then Francis J. Schnugg moved that a committee of seven be appointed to draft a constitution and enroll all those who were willing to join the organization. This prevailed, and Mr. Schnugg, James Gordon, Chas. A. Du Bois, Paul B. Pugh, A. Schwerer, A. C. Babcock and John Fyfe were appointed such committee. The newspapers were requested to notify all employers in sympathy with the movement to send their names for enrollment to Secretary Arthur Gorsh, at No. 1444 3d avenue.

Many of the builders hereupon renewed their demands for immediate action upon the lumpers' boycott, urging that by united action at this time in opposition to the demands of the trades' unions they could break the boycott within a week. These sentiments were stimulated by the addresses of Messrs. Slattery, Livingston, Farley, Ball and Lowen. Mr. Lowen, who is building the three large flats on the southeast corner of 85th street and Amsterdam avenue, related how he had stood out against the strike of all the workmen on his building, and, advertising for new men, had got all he needed, except a few stair-builders, and these were coming in. After the Walking Delegates saw that so far as his buildings were concerned their boycott had practically failed, they came around and offered to open negotiations with him, but he said it was too late; he could get along without them. He was paying the union rate for union hours. He believed that if others would follow his example the boycott would be broken by this time next week.

Mr. Schnugg now moved that a committee, to be composed of one representative of each trade, be appointed to act as an executive committee on the present boycott. After a prolonged discussion, in which a score or so took part, a substitute motion was offered by Capt. Leo, resolving that all contractors go on with the work now in hand, using all lawful means to protect themselves and each other, and in the meantime to drum up as large an attendance as possible for the next meeting, which will be held on Monday night next, the 24th instant, at 8 o'clock, at the same place—Renwick Hall, corner 3d avenue and 86th street.

Messrs. Coons & Bradbury, who are doing the gas and steam-fitting on John Casey's ten flats in 98th street, reported that when their men were ordered to strike they conferred among themselves, and then informed their employers that they were ready to continue the work if so desired. Of course they were kept at work.

Big Sales—On Paper.

"Have you noticed," said a broker the other day, "that several of the daily papers appear to have gone crazy on the subject of real estate? Look at this list of ridiculous reports that have been published during the past week and I think you will agree with me that there must be something loose about the management of our 'great' dailies." The list submitted by the broker included the report of a sale for about \$550,000 of a Broadway and 6th avenue property, north of 36th street, which was qualified the next day by the publication of the statement that the report was premature, whereas there never was any foundation for it; another of a Chicago syndicate's probable purchase at \$1,200,000 of a Broadway and Mercer street property, presumably the old New York Hotel site; a long story of negotiations looking to a sale of the valuable block bounded by Broadway and 5th avenue, 25th and 26th streets;

an announcement of a purchase for a theatre and hotel site by Thomas Canary of the northwest corner of 42d street and 7th avenue, a property which every tyro knows is not purchasable at any price, and several other "reports" of lesser moment. In every instance an opportunity could easily have been had for a verification of the reports referred to, but verifying anything relating to real estate transactions would seem to be considered an unnecessary precaution in the conduct of the average daily.

Dissolution of the National Mahogany and Cedar Co.

The five firms composing the National Mahogany and Cedar Company have mutually agreed to withdraw from the company and thus dissolve it and to again resume their individual plants and business. This is not done from any embarrassment or any want of harmony in the company. On the contrary, the company owes nothing, having paid cash for everything, and there has been nothing but the utmost good feeling between the ten individuals composing the five firms to the consolidation. The company was not a trust, as has been said, but merely a close corporation composed of eleven stockholders. The organization has been doing business about fifteen months, and notwithstanding the panic and depression in business circles during the past year it made money, although not a large amount, but that it held its own was quite satisfactory to those interested.

The mahogany and cedar business is a rather peculiar one, and we have all failed to find any great advantage in a large organization such as ours was, and at times have found it cumbersome and unwieldy. So far from oppressing small firms, as has been reported, the contrary is true. The company has fostered the business of the dealers, and has retained the trade of most of them. The opposition has of course endeavored to create dissatisfaction, and it was only natural that they should do this, but it has been practically without result.

The company was not organized with the idea of controlling the mahogany and cedar business, as there were more firms outside of the company than there were in it. The dissolution simply represents that as the result of our experience we all feel that individual effort is what wins in business.

We assume our firm names on October 1st.

WILLIAM CRUIKSHANK.

William Cruikshank, for many years a director of the Real Estate Exchange and Auction Room, died yesterday morning of heart failure. He was born in this city, about fifty-five years ago, and before attaining his majority began his business career as a clerk in the office of his uncle, James Cruikshank, whose sons at present compose the firm of E. A. Cruikshank & Co. In 1865 he opened an office for himself and in time became one of the most prominent of the agents who have made a specialty of the management of estates. The deceased was intrusted with the control of many such properties, among them being extensive holdings of the Schermerhorn estate, the Langdon estate and of the late Mrs. William Astor as well. In the will left by William Astor at his death, about three years ago, Mr. Cruikshank was named as one of the trustees of the property bequeathed to John Jacob Astor, and filled the office satisfactorily up to the day of his death. He is survived by a widow, two daughters and two sons, one of whom, William Morris Cruikshank, has been his business associate for some years. The Directors of the Real Estate Exchange gave expression yesterday to their regret at his unexpected death in an appropriate resolution, acknowledging his valuable services to the Exchange as a director since 1887, as second vice-president and as chairman of the Exchange and Auction Room Committee.

CHANGE OF FIRM.

The brokerage and renting firm of McMonagal & Eckerson has dissolved. J. Remsen Eckerson & Co. retain possession of the office at No. 695 Columbus avenue, between 93d and 94th streets, and will continue the business. Mr. Eckerson's associate in the new firm is Jacob Eckerson, his father.

The "Castleton."

IMPORTANT ADDITION TO NEW YORK'S LIST OF HIGH-CLASS APARTMENT DWELLINGS—CONVENIENT OF LOCATION AND NOW READY FOR OCCUPANCY.

The Castleton apartment building, just finished, is one of the most complete in appointments ever erected in this city and has many new and novel features. It is at Nos. 110 to 116 West 57th street, where it covers three city lots and contains twelve apartments of nine and thirteen rooms each, some of the suites being 50 feet wide and others 25 feet, there being only two suites on each floor. Electric elevators, gas and electric light, steam heat, superb bath-rooms with Roman tubs and open plumbing work, abundant closet room, artistic decorations and all the modern improvements are supplied. All the rooms open on a private hallway, which is entered from a spacious foyer. A feature of the suites is that the rooms are all of unusual size. This is particularly so with the principal reception-rooms, which communicate with each other by portiere openings, and thus give a large clear space for receptions and entertainments.

The Castleton is a first-class structure in every detail and has been erected and is owned by Mr. C. H. Bliss, a builder who has had many years' experience in erecting high-class apartment houses, the Rutland, Brandon and others of a fine type being among the number.

The location is unsurpassed, 57th street being the finest cross-town street in the city. The Castleton is near Central Park, 5th avenue, the elevated railroad station and the principal surface roads, and convenient to churches, hotels, clubs and theatres.

Real Estate Market.

After making allowance for two days of constant and heavy rain it will be found that the reports of the week indicate that an average business has been transacted. No sales of unusual significance have been closed, but the buying movement gives stronger evidence of becoming more general, inasmuch as the parcels for which buyers have been secured are located in nearly every section of the city. An increased demand has been felt for residence property west of Central Park and a number of houses are booked to change hands. Brokers in that favorite locality claim that their experience of the past ten days has shown that the prospective house buyers greatly outnumber the West Side dwellings offered for sale, numerous as they are. As a consequence they look for the closing of many additional purchases in the near future. In other parts of the city the sales have been satisfactory as a whole and yet embrace but two transactions in which six figures are involved.

The following are the comparative tables for New York Conveyances, Mortgages and Projected Buildings for the corresponding weeks of 1893 and 1894.

The sale of property owned by the estate of Benjamin Richardson, announced to be held by Richard V. Harnett & Co. at the Real Estate Exchange on Wednesday, was adjourned sine die, owing to an injunction having been granted by Surrogate Frank T. Fitzgerald. The action taken by some of the heirs of the estate to have the sale delayed was referred to last week. The order of Surrogate Fitzgerald acts as a stay until his associate, Surrogate Arnold, shall decide an action brought before him by the same heirs for the revocation of the letters testamentary heretofore issued to W. T. Washburn and E. Richardson and their removal as executors and trustees of the estate.

At the Broadway Salesroom Peter F. Meyer & Co., on Wednesday, adjourned until October 3 the foreclosure sale of the southeast corner of 2d avenue and 19th street, and on Thursday adjourned the partition sale of Nos. 398 and 400 Water street to October 15. On the same day William Keenelly again announced an adjournment of the sale of property on Kingsbridge road, north of 184th street. This time it has been put off to October 4.

Three members of the Real Estate Exchange Honest Government Club are represented on the new Committee of Seventy, recently organized. They are Richard Deeves, C. W. Luyster and Henry W. Swords. The club held its first fall meeting on Tuesday in the board room of the Exchange and appointed John C. Eckerson, John J. Claney, Andrew Powell, W. H. Whiting and S. Elwood May a committee, to which all matters connected with the coming political campaign will be referred.

On Thursday next, September 27, Richard V. Harnett & Co. will sell at auction, at the Real Estate Exchange Auction Room, 59-65 Liberty street, forty-two lots on Kingsbridge road, 188th street, Wadsworth avenue, 11th avenue and 187th street, and five two-story and cellar brick dwellings, Nos. 227, 229, 231, 235 and 237 Wadsworth avenue. Also, at the same time and place, they will sell the ten four-story and cellar brick flats and lots, 17.6x55.6x99.11 each, Nos. 524-542 West 133d street. Maps and particulars may be obtained of the auctioneers, at 71 and 73 Liberty street.

James L. Wells sold on Wednesday, under a decree of partition, on the premises at Whitestone, L. I., a tract of eighty-five acres of water front property, fronting on Long Island Sound and adjoining Cedar Cliff Park, to the Jere. Johnson Company, for \$60,000, and ten acres of woodland at Flushing, to Gus. A. Von Scholly, for \$1,800.

Gossip of the Week.

SOUTH OF 59TH STREET.

Several sales have been closed this week of down-town properties, of which no definite information can be learned. They include a parcel on West Broadway, purchased for about \$100,000, another on Front street, still another on Mott street and an exchange in which two parcels are said to figure at \$175,000.

Joseph Byk has disposed of No. 127 Crosby street, on the southeast corner of Jersey street, a five-story brick factory, with lot 21.1x75.7 x21.3x74.1. Mr. Byk took title to the property on August 28.

Schrag & Richtberg have sold for Sigmund Goldberg No. 211 West 34th street, a three-story dwelling on lot 24x98.9.

Lespinasse, Brooke & Georger have sold for ex-Judge Horace Russell, the four-story stone front dwelling, No. 44 West 34th street, lot 25x98.9, to William C. Adams, for something over \$100,000. The transfer by Mr. Adams of No. 38 West 34th street to Austen G. Fox, owner of the house and lot adjoining in the rear and fronting on 33d street, appeared in last week's list of "Conveyances."

Charles Martin has sold for Philip Westenfelder to John N. Zecker the five-story double tenement, 25x65x100.5, No. 535 West 50th street.

Emanuel Perlis has sold for the Dugro estate, No. 75 Division street, a five-story brick tenement, on lot 25x65, to Julius Adelson, for \$25,000.

Mandelbaum & Lewine have bought No. 39 Forsyth street, a brick church on lot 32.3x100, from Deborah J., wife of Rev. James Millett, for \$21,000. M. Rosenzweig is the broker. The property was sold under foreclosure in June, for \$26,000. It was reported yesterday that the parcel had been resold to a building firm, probably Fay & Stacom, for improvement.

The four and five-story store buildings, Nos. 51 and 52 South street, southwest corner of, and Nos. 5 and 7 Jones lane, with plot 40.4x107 x40.8x108.3, are reported to have been sold by Lawrence Martin to B. Mahon, for over \$100,000, the seller taking as part payment a residence with twenty acres of land at Branchport, N. J.

We note in the list of conveyances filed on Tuesday a deed of the four-story dwelling, No. 12 East 55th street, 17x75x100.5, by Mrs. Fannie B. Homans, to Joseph Pulitzer, proprietor of the *World*, who owns and occupies No. 10, the adjoining residence. The consideration paid was \$58,000. The sale was negotiated by the Columbus avenue office of J. Romaine Brown & Co.

NORTH OF 59TH STREET.

Robert S. Jordan has sold for Builder Edward Tipping, No. 146 West 76th street, a four-story stone front dwelling, 20x58x102.2, to Mrs. Smith, wife of Judge Abel I. Smith, of Jersey City, for \$38,500. This is the third house sold of a row recently completed.

The four-story single flat, No. 226 West 121st street, lot 18x100.11, owned by Mrs. Jean F. K. Wilson, has been traded at a valuation of \$25,000, for property at Plainfield and Netherwood, N. J.

John N. Golding has negotiated an exchange for Samuel Q. Brown, of the four-story stone front dwelling, No. 243 Central Park West, 22.6x90x100, with Mrs. H. C. Martin, who gives in trade a country place at Whitehouse, Hunterdon County, N. J., consisting of a farm of about 112 acres and residence, etc. The value of the city house is put at about \$60,000, and the Whitehouse property at about \$20,000. No. 243 Central Park West is one of the row known as the Noble houses built some years ago between 84th and 85th streets. There have been frequent changes of ownership in the row and strange to say they have with hardly an exception been brought about by trades.

Builder Edward Kilpatrick has sold No. 81 West 68th street, a four-story stone front dwelling, on lot 22x100.5, for \$40,000.

D. H. Hyman has sold for Donald Nicoll the four-story dwelling, No. 62 East 80th street, 18x55x102.2, to Henry W. Cane, for about \$35,000.

Barnett, Davis & Co. have sold for Catharine Boltz the three-story stone front dwelling, No. 276 West 132d street, 16.8x50x99.11.

Max Simon has sold for E. Warner No. 110 West 106th street, a five-story double tenement, 25x87x100.11.

Frank L. Fisher has sold for Builder John Casey No. 45 West 88th street, a four-story stone front dwelling, 20x55x100.8, to Mrs. H. Morgenstern for about \$40,000. The same broker has sold for J. W. & A. A. Teets the three-story dwelling, No. 343 West 121st street, 16x56x100.11, to Mrs. Jackson for \$17,500, and for C. M. Stewart to Mrs. Fox, the four-story dwelling, 20x55x102.2, No. 327 West 77th street, for \$38,500.

The three-story English basement dwelling, No. 2288 7th avenue, between 134th and 135th streets, 17.9x45x100, has been sold by William Orniston for \$13,500.

F. Zittel has sold for Mrs. Elizabeth J. Arkenburgh the four-story

stone front dwelling, No. 129 West 75th street, 20x56x102.2, for about \$36,000.

Ames & Co. have sold for C. Dobbs a plot, 52x145x irregular, on the north side of 98th street, 84 feet west of Columbus avenue, for about \$30,000, and for Thomas Bell the four-story dwelling, No. 43 West 95th street, 20 feet front, at \$28,000.

Barnett & Co. have sold for Robert Murray to Michael K. O'Neill the three-story stone front dwelling, No. 119 East 128th street, 16x 60x99.11.

Adler & Herrmann have sold with a building loan for immediate improvement the plot, 100x100, on the northeast corner of 143d street and Amsterdam avenue, to Builder Charles G. Judson, for \$43,000.

According to a plan filed with the Department of Building last week, Adam E. Fischer would appear to have purchased from Dock Commissioner James J. Phelan, the southeast corner of Columbus avenue and 85th street, upon which a seven-story apartment house, 40x98, is to be erected. No record, however, has yet been made of such a conveyance.

James R. Breen & Son object to the term "defunct building firm," which was applied to them in an item published last week. They request us to inform our readers that the firm is still very much alive and we can only express our regret that the word defunct was used in connection with the item referred to.

NORTH SIDE.

Kaepfel & Brooker have sold for Ewald Biele and Bertha Erdman, a plot 84x112, on the east side of Grant avenue, near 164th street, to John Somerville & Co., at \$8,400, for improvement, and for John J. O'Brien, the two-story cottage with ground, 24x171, No. 2253 Bathgate avenue, near 183d street, to Otto Hamburger, for \$6,500.

J. Clarence Davies has sold for John A. Knox the two-story brick house, with lot 18.9x100, on the south side of 156th street, 50 feet east of Westchester avenue, to William A. Savage for about \$6,000.

WESTCHESTER COUNTY.

Geo. R. Read has sold to John Jacob Astor for the Pearsall estate about 100 acres of land fronting on the Bronx and Pelham Parkway, and the road from Williamsbridge to Westchester village, and opposite the Morris Park race track, for about \$350,000.

The report published in the daily papers on Wednesday of a sale by Lewis S. Samuel of his property at Hunt's Point is untrue. Mr. Samuel is still the owner of 217 lots at Hunt's Point, and has made but one sale of property there, and that was recorded in July. It comprised a house and sixteen lots, purchased by William L. Evans.

LEASES.

The four-story, 25-foot dwelling, No. 38 West 72d street, has been leased, furnished, for the owner and present occupant, John Anderson, to Mr. Steinway, one of the junior members of the firm of Steinway & Sons, for three years, at \$6,500 per annum.

News of the Building Trade.

MERCANTILE.—6th avenue, southwest corner 17th street, seven or eight-story brick and stone fire-proof mercantile building. Condition—preliminary plans under way. Owner, George H. Beyer, 658 8th avenue; architects, Julius Boeckel & Son, 54 Bond street. The specifications will include structural and architectural iron-work, electric lighting, electric elevators, plate glass and fire-proof material. Briefly noted in THE RECORD AND GUIDE, September 15, 1894.

Walker street, northeast corner West Broadway.—Joseph Beck, of the firm of Joseph Beck & Co., wholesale liquor dealers, 133 Reade street, will have plans prepared for a large brick and stone fire-proof mercantile building, about 50x75. The tenants of the buildings now on the site hold leases which expire May 1, 1895.

McKim, Mead & White have been appointed supervising architects for the new building for the New York Life Insurance Co., in course of construction at Leonard and Centre streets and Catharine lane, in place of Stephen Hatch, deceased.

FLATS.—Amsterdam avenue, west side, 74.11 south 130th street, five-story brick and brownstone-trim store and flat building, 25x88; estimated cost, \$26,000. Condition—plans just started; no contracts let. Owner and builder, Emil Roessert, 332 East 84th street; architect, John Hauser, 1441 3d avenue. The specifications will include tin roofing, galvanized iron cornices, structural and architectural

iron-work, electric bells, speaking tubes, ranges, skylights, sanitary plumbing, inside blinds, gas fixtures, bath and laundry fittings, concrete and pine floors, tiled vestibule, plate glass, oak and whitewood finish. The owner buys all materials.

On the two lots, 50x100, Nos. 342 and 344 West 56th street, adjoining the Garfield apartment house, and which, with the latter, were sold to Gordon Pier by Col. S. V. R. Cruger, last week, a seven-story apartment house will be erected at once, from plans by Kafka & Mott. Architect Thomas Graham has been retained to supervise the construction and he will have the letting of the contracts. The plans will call for limestone, terra cotta and light brick (probably Roman), and common brick, iron beams and girders, fire-proofing, floor timber and flooring, hardwood trim, tin roof, electric elevators, encaustic and floor tiling, mosaic pavements, electric and gas fixtures, steam heat, sanitary plumbing, porcelain baths, ceramic laundry tubs and sinks, dumb-waiters, stained and plate glass, wood mantles and first-class finish throughout. The cost is estimated at \$80,000. It is said the two lots figured in the transaction at \$45,000.

One Hundred and Seventy-fifth street, south side, 150 west of Vanderbilt avenue, three-story frame tenement with brick foundation, 21x60; estimated cost, \$6,000. Condition—plans just started; no contracts let. Owner, Frank B. Lockwood, 180th street and Washington avenue; architect, J. J. Vreeland, No. 715 Tremont avenue. The specifications will call for tin roofing, galvanized iron skylights, bath fittings, dumb-waiter, slate tubs, concrete and North Carolina pine floors, ranges, cabinet or polished slate mantles, gas fixtures, sanitary plumbing and white pine or whitewood finish.

One Hundred and Sixtieth street, southeast corner of Courtlandt avenue, three five-story brick flats, two 25x79.6 each and the corner house 25x88; cost, \$40,000. Condition—plans under way; no contracts let. Owner, Philip Eckel; architect, Herman Horenburger, 686 East 159th street. The specifications will call for terra cotta brick fronts, with Connecticut brownstone or New Jersey freestone trimmings, galvanized iron cornices, steam heating, dumb-waiters, sanitary plumbing, tiling, concrete and pine floors, cabinet mantles and trim, electric wiring and fixtures, bath and laundry fittings, inside blinds and tin or slate roof. Address the architect.

DWELLINGS.—11th avenue, east side, 100 north of 181st street, two-story and basement mottled brick and brownstone dwelling, 20 x47; cost, \$8,000. Condition—plans completed; no contracts let. Owner, Henry Purvis; architect, Henry Fonchaux, 162d street and Western Boulevard. The specifications include tin roofing, hot-air heating, gas lighting, bath and laundry fittings, tiling, concrete and pine floors, electric bells, wood mantles, range, inside blinds and pine and hardwood finish. Address the architect.

One Hundred and Forty-third street, northeast corner Amsterdam avenue, four brick and stone dwellings, on plot 70x100, and on corner a five-story brick and stone flat, on plot 30x100. Condition—plans started; no contracts let. Owner and builder, Charles G. Judson, 102 West 81st street; architect, Clarence Trne, 102 West 81st street.

Eighty-seventh street, south side, 50 east of Columbus avenue.—H. Ives Smith, No. 321 West 75th street, will erect two four-story brick and stone dwellings, about 25x102, on the above plot just purchased. The buildings will contain all conveniences.

PLAY-HOUSE.—164th street, west of 11th avenue, one-story brick play-house, 40x62; cost, \$7,000. Condition—plans completed; no contracts let. Owner, New York Institution for the Deaf and Dumb; architect, Henry Fonchaux, 162d street and Western Boulevard. The specifications include a slate roof, cement floor, steam heat, gas fixtures, skylights and iron-work.

Seventy-seventh street, north side, 100 feet west of Amsterdam avenue, two-story brick and stone stable, 25x99; estimated cost, \$8,000. Condition—plans under way; no contracts let. Owner, W. B. Baldwin, 211 West 76th street; architect, George F. Pelham, 503 5th avenue. The specifications include tin roofing, concrete and pine floors, sanitary plumbing, structural iron-work, gas fixtures, stable fittings and partly hardwood finish. Address the architect.

NEW SCHOOL WORK.

The School Trustees of the 12th Ward will receive bids until 4 o'clock p. m., Thursday, October 4, 1894, at the Hall of the Board of Education, 146 Grand street, for supplying the heating and ventilating apparatus for the additions to Grammar School Building No. 57.

CONVEYANCES.

Wherever the letters Q. C., C. a. G. and B. & S. occur, preceded by the name of the grantee, they mean as follows:

1st—Q. C. is an abbreviation for Quit Claim deed, i. e., a deed in which all the right, title and interest of the grantor is conveyed, omitting all covenants or warranties.

2d—C. a. G. means a deed containing Covenant against Grantor only, in which he covenants that he hath not done any act whereby the estate conveyed may be impeached, charged or encumbered.

3d—B. & S. is an abbreviation for Bargain and Sale deed, wherein, although the seller makes no express covenants, he really grants or conveys the property for a valuable consideration, and thus impliedly claims to be the owner of it.

MORTGAGES.

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given, and the amount. The general dates used as headings are the dates when the mortgage was handed into the Register's office to be recorded.

Whenever letters "P. M." occur, preceded by the name of a street, in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date. Whenever the rate is not given, read as 6 per cent.

Mortgages against 23d and 24th Ward properties will be found all together at foot of this list.

JUDGMENTS.

In these lists of judgments the names alphabetically arranged, and which are first on each line, are those of the judgment debtor. The letter (D) means judgment for deficiency. (C) means not summoned. (F) signifies that the first name is fictitious, real name being unknown. Judgments entered during the week, and satisfied before day of publication, do not appear in this column, but in list of satisfied judgments.

REVIEW AND RECORD.

BROOKLYN, SEPTEMBER 22, 1894.

Notes Gathered Here and There.

Another attempt is to be made to open 2d avenue, from Hamilton avenue to 39th street. Two years ago the Legislature passed a law authorizing the opening with the consent of the Common Council. Preliminary steps were taken to open the street and then they were suddenly abandoned. It is said that the Board of Aldermen will be requested to take the matter up at their meeting on Monday.

Before Chief Judge Clement, of the City Court, on Tuesday, the Hon. W. C. DeWitt moved for an injunction to restrain the city from selling for arrears the Litchfield property, which extends from Gowanus to Prospect Park, and is owned by Edwin C. Litchfield. The plaintiff claims that under the arrears law of 1880, a just and legal tender was made of arrearages and refused by the city, and that other tenders were made and refused on the ground that interest should be paid on the amounts due. From time to time parcels of the property were sold for arrears, and Mr. Litchfield claims that to save it he had to pay \$750,000. The charges, he claims, were illegal, being in some cases as high as 12 per cent a year interest; now it is proposed to sell the property for the arrears still said to be due. The city takes the position that an injunction cannot lie to restrain the collection of taxes on the property, unless it is shown that they were fraudulently imposed, and that the plaintiff is without remedy at law. Decision was reserved.

Notice is given that the assessment rolls in the following entitled matter has been completed and placed in the hands of the Collector of Taxes and Assessments for collection: Repaving McDonough street, from Lewis to Stayvesant avenue.

A feature of the Twenty-third Regiment Fair (which is to be held in the new armory November 14 to 29), which promises to develop a good deal of popular interest, will be a competitive exhibition by amateur photographers of photographic prints and lantern slides. Silver medals, not to exceed twenty-five altogether, and certificates of merit, not to exceed fifty, will be awarded. Entries must be declared not later than October 15, and all exhibits must be at the armory by November 1. G. E. Hall, G. W. Wundram, Henry S. Chapin and Allen Ormsbee are the Committee of Arrangements, and will send explanatory circulars on application.

Inquiry was made at the office of the clerk of the Board of Supervisors on Thursday when the tax rate for Brooklyn for the ensuing year would be determined. The clerk answered that he thought it might be several weeks before the rate could be announced, but he had reason to believe it would be less than the present rate.

Allan Bros. & Co., builders and contractors, made a general assignment on Monday last, for the benefit of creditors, to George O. Walbridge. The firm consisted of John T. Allan, of No. 300 Union street; James G. Allan, of No. 311 Union street; and Nathaniel Proskey, of 323 Clinton street.

Builders—Brooklyn.

William B. Tubby, of New York, has prepared plans for the new station house to be erected on the northeast corner of De Kalb and Hamburg avenues. It will be constructed of brick, with Indiana limestone trimmings, three stories high and 82x100 feet in size, with a tower on the corner and a clock on the Hamburg avenue side. The interior will be trimmed in hardwood; cost, about \$46,000.

Henry Roth will build at the northwest corner of Willoughby and Marcy avenues, a four-story brick and Nova Scotia stone flat, 28x72, to cost \$15,000; and on the west side of Hart street, 200 feet east of Stuyvesant avenue, a similar building, both in size and material, to cost \$12,000. H. Vollweiler is the architect.

S. Gold will erect two four-story brick flats, 25x77.6 each, on the west side of Marcy avenue, north of Myrtle avenue. They will contain all improvements, dumb-waiters, electric bells, tiled vestibules, etc., and cost \$10,000 each.

O. W. Humphrey is about to erect five three-story frame double flats, 25x56 feet each, on the east side of Sutton avenue, 153 feet north of Driggs avenue. They are to have all improvements, dumb-waiters, electric bells, tiled vestibules, etc.; cost, \$1,700 each.

Horenburger & Straub, of New York, have plans for a four-story brick apartment house, with pile foundation, 25x80 feet, to be erected at No. 199 Dupont street. It will contain all improvements and have a gravel roof; cost, \$10,000. Also plans for alterations to the dwelling, 25x75 feet, No. 201 Dupont street. Partitions in the first story will be altered and another story added above, making it a four-story dwelling; cost, \$2,500.

Long Island—Gossip.

Springfield.—Henry A. Van Allen has sold the Remsen Lamberson property, consisting of 31¼ acres of land, with dwelling, etc., to the Long Island Railroad Company for \$5,750. The company will erect buildings on the property for the storage of cars.

Huntington.—George W. Longbotham is about to erect a two-story brick dwelling, containing all improvements, on Carver place.

Roslyn.—M. Pease, of New York, is having a two-story frame Colonial dwelling, 25x35 feet, with extension, 12x16 feet, and a two-story frame stable to match, 20x33 feet, on the west shore. The dwelling will contain all improvements; the trim will be partly hardwood, with open fireplaces, cabinet mantles, etc.

Rockaway.—Henry Schonke will erect two two-story and attic frame cottages at the corner of Waverly avenue and the Boulevard. They will contain all improvements and hot-air heating; total cost, \$7,000.

Springfield.—A two-story and attic frame cottage is under way on Springfield avenue for Mrs. Sprague.

Seaford.—Joseph Raynor is building a two-story and attic frame cottage on Washington avenue for John C. Baylis. It will contain all improvements.

Shelter Island.—Architect George H. Skidmore is preparing plans for a two-story and attic frame cottage to be erected on the bluff for I. M. Bonn.—Work has been commenced on the two-story and attic frame cottage, near Winyah Manor, for Gilbert C. Terry.—William H. Thompson is making preparations for the erection of a two-story and attic frame cottage.

CHURCHES.—Centreport.—Ground will be broken for the new Methodist church at this place. It will be constructed of frame and shingle.

Oyster Bay.—Hoppen & Kean, of New York, have completed plans for the new St. Paul's M. E. Church, to be erected on South street. It will be 51x92 feet in size and contain all the latest church improvements; cost, \$12,000. Lundy & Mailler have the contract.

Westbury.—E. J. Coles, of Hempstead, has the contract to erect the new St. Bridget's Roman Catholic Church, here. The structure will be Gothic in design, 40x97 feet, with an addition 12x45 feet, and will have a tower sixty-two feet high. It will contain all the latest church improvements, stained glass windows, etc., and cost \$7,500.

FIRE STATIONS.—Long Island City.—The Astoria Homestead Company have awarded the contract for building the new 5th Ward fire house to Peter N. Phillips. It will be located on Flushing avenue, near Steinway avenue, and be two stories in height, 50x65 feet in size, containing quarters for an engine and truck company.

Woodhaven.—At a special meeting of Union Course Hook and Ladder Co. No. 1, it was decided to erect a new fire house. A lot has been purchased on Suediker avenue, on which they will erect a two-story frame building, 25x80 feet, with a large hall on the second story for public meetings, etc.

CLUB-HOUSES.—Seaford.—Gilbert Seaman has the contract to erect the two-story and attic frame club-house on Jackson avenue for the Y. M. I. Club.

Winfield.—Christian Tymann has the contract for the new club-house to be erected on Henry street, between Madison and Fisk avenues, for the Winfield Athletic Club. The building will be constructed of frame, one-story high and 35x50 feet in size, with eighteen foot ceiling. The interior will be wainscoted and fitted with the latest gymnasium appliances.

STABLE.—Commack.—Hubbs Bros. are erecting another two-story frame stable at the country seat of H. O. Havenmeyer. It will be 108x24 feet in size.

WAREHOUSE.—Hicksville.—R. & J. H. Seaman have purchased four lots east of the depot and will erect a two-story frame seed warehouse.

MORTGAGES.

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given, and the amount. The general dates used as headings are the dates when the mortgage was handed into the Register's office to be recorded.

Whenever the letters "P. M." occur, preceded by the name of a street, in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date. Whenever the rate is not given, read as 6 per cent.

JUDGMENTS.

In these lists of judgments the names alphabetically arranged, and which are first on each line, are those of the judgment debtor. The letter (D) means judgment for deficiency. (*) means not summoned. (f) signifies that the first name is fictitious, real name being unknown. Judgments entered during the week, and satisfied before day of publication, do not appear in this column, but in list of Satisfied Judgments.

BUILDING MATERIAL MARKET.

NEW YORK.

BRICKS.—On the market for Common Bricks the weather has played quite an important part during the current week, unusually heavy rain storms for a time bringing everything to a stand still except shipments. The result was that when sunshine returned a heavy accumulation of stock was on hand, with no corresponding increase of consuming wants and sellers remained at a disadvantage. They, however, refused to make any further modification of cost, standing to \$1.50 for the best lots, although the continuation of universally fine quality takes off the ordinary premium position of a great many makes of stock and a liberal percentage of the business continues to be done at about \$1.00 a 4.25 per M. A portion of the current demand may still be placed to credit of dealers who have room for piling and do not hesitate about picking out a nice cargo now and then and putting it away for winter and early spring use. Of course any stock that may have been on the yards during the deluge of this week was simply ruined, but we are informed that not many makers were caught and the losses will be unimportant. Considerable production is still under way, but manufacturers drop out one by one and there is a chance that work will generally cease this season much earlier than usual. The slight flurry of demand for Pales noted last week has disappeared.

GLASS.—So far as consumption is concerned there does not appear to be any great gain. Here and there, at interior points, the movement has been sufficient to induce jobbers and retailers to add somewhat to their orders, but, as a rule, the call runs for ordinary assortments and average quantities, against which the offering has been fair. Imported stock is getting more attention as the cost is a little easier than before the change in duty, and holders, who have been carrying for sometime in bond, are anxious to realize upon a portion of their stock. It has been calculated that the difference in cost on foreign glass under the new import tariff is 16 1/2 to 17 per cent lower. The wage question has been pretty generally settled upon a basis of 22 1/2 per cent reduction, and there is a steady addition to the number of pots going into operation. Current prices on glass are unsettled, with a tendency in buyers' favor.

LATH.—Beyond the natural effort of receivers to put in a good word for the market there was no evidence of much tone. A little fresh stock has come along, and, although it did not always find a waiting demand, was mostly disposed of at a slight modification on cost. Some business was done at \$1.65, a few lots under specially favorable circumstances a fraction higher, and there have also been sales at \$1.60 with indications that the latter was about the best cargo rate available at the close. Actual consumption is fair, but dealers in most cases have a supply sufficient to promptly meet the wants of their customers.

LIME.—The market continues unsettled and reports are in some cases contradictory, but the general tendency continues in buyers' favor. There is still enough special demand for lump to keep the quotation at \$1, but even from that a discount is becoming somewhat more frequent. Common is quoted at 85c, for Rockland and 75c, for Thomaston, but it is a sort of open secret that those figures are modified by extra allowances in way of discounts and straight sales at 70c, for Thomaston are hinted at. St. John lime is quoted at 70c 75c, for common and 90c 95c, for finishing. In general business is slow, and while the claim is that not much stock can be expected forward there are more kilns burning than previous to the break up of combination among Maine manufacturers.

LUMBER.—A fair and possibly increasing run of business is suggested by the reports from dealers. In some localities builders assortment are wanted, in others stuff for repairs and alterations is being turned out and in others, the manufacturing interest is represented making altogether a general sort of call which gives pretty much all kinds of lumber a chance. The movement is hardly large enough to be dignified as active except in comparison with the stagnation of the summer months but is promising so far as it goes and some operators have hopes of considerable broadening out before the end of the year. As a rule dealers are very well fortified with stock and assortment to meet the call made upon them.

Indeed in matter of supplies a great many of the yards are more nearly filled out than common at this season of the year, and still getting receipts from old purchases. This has a tendency to make the market in a wholesale way somewhat dull, yet there is no doubt of improvement in the negotiations over bulk lots of stock, enough to keep prices about steady, and in some instances stillen them a trifle. That appears to be particularly the case on boxing lumber of which only the large manufacturers held much of a supply, and now that general merchandise is commencing to move with greater freedom the sale of boxes is larger and a greater number of makers are compelled to secure a working stock.

Eastern spruce has found no additional natural demand and receivers have to do all the work of negotiation. Reports have been current of random selling up to \$13.50 but investigations show that while the cargoes disposed of were random in the sense of having been cut without direct orders and

brought here to take open market chances, they were nevertheless turned out on a carefully prepared schedule and to all intents and purposes special. They therefore possessed extra attractions, and, that considered the rate obtained was by no means full. Piling is still coming along in fair quantity but most of it already provided for and rates ruling steady. Some of the eastern mills are said to be starting up, but mainly on low priced special and will not probably cut much if any random.

White Pine has some demand and of slightly more general character, including even a call for finer qualities. There has been an offering sufficient to satisfy the wants of the market and at about former cost, but no special bargains and with the recent advances recently reported at some points in the interior. Selling agents are commencing to talk with greater confidence over the situation. It is claimed that desirable box is sure to be scarce.

Yellow Pine has been arriving to some extent but the stuff coming along passes either directly into hands of consumers or goes into yard round up the special accumulations which some of the shrewd dealers are making while prices are so very low. Random stuff would hardly find a bid if offered.

Hemlock has been selling with greater freedom but to an irregular run of custom. Some local buyers order a little and there is also trade with other near-by cities, but the greatest success in securing custom seems to be with the suburban run of dealers who are commencing to fill out for winter. They obtain all the stock wanted and are promised reasonably prompt deliveries. There seems to be a discrepancy in statements regarding prices, but the average claim is for greater steadiness.

Carolina Pine can be obtained in quantities sufficient to promptly satisfy all calls that are making, and competition does not appear to have become modified to an extent that will permit the bringing of values to a uniform level. Demand however is increasing to some extent and that is an encouraging feature.

Hardwoods undergo no important change. Consumption is fuller than it was a few weeks ago and of a reasonably general character but can be promptly met from the supplies in hands of dealers and occasionally there is quite a little competition for anything in way of good sized order. There is not much in the way of a direct or open call for bulk parcels of stock, yet agents who have anything of a really attractive quality to offer find that they receive a greater amount of attention than heretofore and occasionally succeed in placing fair sized orders, for staple grades of woods provided they ask no addition to line of valuation.

The latest developments upon tariff matters are embodied in the following: The Quebec Crown Lands Department proposes to raise timber dues on pulp wood, and has given notice as follows in the official "Gazette": "Whereas, the present rate of dues chargeable on Spruce logs for paper pulp is 2 cents per cord of 128 cubic feet; and, whereas, it is advisable to raise it, while allowing a reduction when pulp is to be manufactured in this Province—it is ordered that the rate of dues on spruce logs for paper pulp be fixed at 40 cents per cord of 120 cubic feet, but that a reduction of 15 cents per cord be allowed when the pulp wood is to be manufactured in this Province." The New Brunswick Government is also putting restrictions on cutting lumber by the following regulations, which apply to all timber logs cut on crown lands: "No spruce or pine trees shall be cut by any licensee, under any license, not even for piling, which will not make a log at least 18 feet long and 10 inches at the small, and if any such shall be cut the lumber shall be liable to double stumpage and the license be forfeited."

As outcome of the above a local journal has received the following special from Washington: Some inquiry having been made at the Treasury Department whether the imposition of an export duty by Canada on wood pulp might not affect the question of retaliatory McKinley duties on manufactured or mechanically ground wood pulp from Canada, or other retaliatory duties on the lumber schedule, the State Department has been requested to inform the Treasury at the earliest moment whether such conditions would affect their recent reply as to Canadian lumber being free. The view at the Treasury is that as wood pulp is specially included in schedule M, "pulp papers and books," as dutiable at 10 per cent ad valorem, that it would not affect the duties on wood in paragraphs 672 to 683. The question having been raised in semi-official inquiries, however, will be investigated.

No reply has yet been received to the query whether the province of Quebec imposes stumpage dues. It has been ascertained that Ontario does not.

GENERAL LUMBER NOTES.

STATE.

The Albany *Argus* reports as follows:

Dealers in pine lumber had larger orders last week and did a better business, although the first day or two was quiet. Shipping was more lively, giving an appearance of activity along the docks. Prices and freights were unchanged, and if there be a change in the latter very soon it is likely to be in the way of higher rates on the lakes. In spruce and hemlock a moderate amount of stock is working off, and 9-inch spruce stock is getting scarce. The Canadian mills will be through sawing this month.

MAINE.

A correspondent of Northwestern *Lumberman* writes from Portland, Me., as follows:

Whether on account of the tariff, or in spite of it, there is an improvement in business and a better feeling. The general impression is that the settlement of the vexed question is the cause, and that beyond this the tariff has nothing to do with it. The fact that spruce is firmer, and has actually advanced 50 cents in the face of the removal of the duty, is a hard nut for the calamity shriekers, who predicted absolute disintegration if the \$2 were taken off. Frames, which a month ago were \$12.50, and even in some cases \$12, are now firm at \$13, and mills that had shut down rather than cut at a loss are starting up again. Other mills that in desperation took orders at the low figures and have considerable sawing ahead, find themselves in some cases unable to take advantage of

the advance; others, although full, are squeezing in some at \$13. Yard sizes and random are quoted \$12.50 to \$13 for the former, and \$12 for the latter. Covering boards are 50 cents stronger at \$12. Lath have accumulated in large quantities, and while the price is nominally \$2 a good many are placed at \$1.90.

In clapboards there is a little more demand. Prices are: Extra, \$29; clear, \$27; second clear, \$23. Shingles are active at \$2.75, \$2.25; and \$1.70 to \$1.85, respectively, for extra, clear and extra No. 1, a considerable improvement in the last named.

The export people have been busy canceling their bonds at the custom house and putting their lumber on the free list under the provisions of the new tariff bill. There is no change in price, and the only difference the new order of things makes to them is freedom from the work of passing entries and the expense of the United States storekeepers. There is considerable inquiry for cargo lots, and the prospects are for a fair fall trade. Two vessels are loading for the West Indies, and three more are chartered, all of which carry a considerable quantity of lumber. For South America two vessels are loading.

Freight rates are struggling hard to rise. One vessel gets \$7.25, an advance of 25 cents, but \$7 is still the prevailing rate.

OREGON.

A well-known and prosperous operator of Portland, Ore., has the following to say upon the tariff question:

"The bad effects resulting from the tariff bill will be felt mainly by mills at Portland and on the Columbia river that ship to California. From time to time, even with the former duty, British Columbia mills have occasionally competed in California with this district and Puget Sound, and therefore I think with the removal of the duty they will put in a much larger quantity of lumber than heretofore. I do not believe the effect will be the same with mills that depend on the Eastern car shipping trade. There are several reasons why British Columbia can put lumber in the American market cheaper than we can. In America, when a company or individual decides to go into the manufacture of lumber on a large scale he must purchase a large tract of timber land and make a great outlay of capital. In British Columbia the government gives him the logs and he merely pays stumpage. Then again, in shipping to California, the American can ship only in American bottoms, while his northern neighbor can use any kind of vessel, and there he has the advantage. Wages north of the line are less than in the United States by 10 or 15 per cent, and much of the work is done by Chinese or Indians. Therefore, what the mills lose here must come off of labor. Companies that have been paying \$2 and \$2.50 a day will be forced to cut down to \$1.50 and \$2 for the same labor."

THE WEST.

The Northwestern Lumberman as follows:

The observation made last week to the effect that reaction toward a better market condition had become so pronounced as to be clearly recognized can be reiterated this week with added emphasis. It is reported from nearly every important market that the demand is enlarging and the movement of lumber of all sorts increasing. At the same time dealers are cautious about letting their spirits and anticipations rise too rapidly or lead them into over-confidence as to the immediate future.

At Chicago receipts have moderated during the week. The stuff arrived has been sold without much effort, though commission men say there is no snap in the market. The recent large fleets

seemed to have had a slightly depressing effect. The market this year is weak in its digestive economy, so that an overload in the seed has a cloying effect. Yet there is a demand, and the cargo trade has probably worked through more stock than last year. The dealers whose yards were recently burned out are buying considerable lumber, for they say they can procure it here as cheaply as they can anywhere. Thus the utility of the local market is being recognized late in this memorable year 1894.

The demand is for cargoes which run to strips, boards of stock width and dimension 12 feet and 22 feet long. Timbers have also recently been inquired for more than in the recent past.

Piece stuff is still selling at \$9 to \$9.25 a thousand. It is not likely that lower prices will be realized this season. There is not a vast amount to come out of Lake Superior this season, and lake rates have advanced a shilling to a quarter a thousand, with the probability that they will go higher later on.

Reviewing the hardwood situation the Lumberman says:

The yard dealer, since the panic, has been able to put in a full stock of cheap lumber. When he sells out of this low-priced supply he can make a profit, though it may be small. He is counting on this for recompense from the loss experienced on the higher priced lumber bought before the panic, a portion of which remained on his hands at the beginning of this year. The greater share of the lumber he now has on hand has been purchased at low prices, and even should there be no advance, within a year he will be able to make something on it. There is a possibility of higher prices within the year, in which event he will make a handsome profit on stocks in yard. Thus it is seen that the yard man has a long span which enables him to bridge over wide and deep depressions in demand.

A change from existing conditions will not occur until the consuming industries shall so far revive as to require a large amount of lumber. While the output of the mills shall be greatly in excess of demand, and operators are urgently seeking every possible outlet for their lumber, so much of it will get into the hands of the consumer through the medium of the broker and scalper that it will be impossible to secure an advance of prices. When the demand shall enlarge sufficiently to force the larger dealers, including the yard men, to seek product at the mills, an improved condition will be the result. All depends on the revival of the industries which consume lumber.

The Mississippi Valley Lumberman as follows:

It wouldn't be a bad guess to estimate that about one-third of the logs in the rivers throughout the white pine section are high and dry along the banks, where they afford an excellent opportunity for the festive mud turtle to sun himself and take his daily constitutional.

The losses to the lumber interests of the Northwest by forest fires have been greatly augmented the past month. It seems that this season is destined to go down in history as one of the most disastrous in the annals of the lumber business in the white pine section. Timber has been greatly damaged, which will necessitate much logging being done the coming winter that would not otherwise have been attempted. There are vast areas in northern and northeastern Minnesota, northern Wisconsin and northern Michigan that will next winter be the busy home of the loggers, which, had it not been for the disastrous fires, would have remained unmolested by the woodman's axes for many years yet to come. In fact, crews of men are already being put into the woods, and hardly before the ashes have cooled and even before the smoke has left the burned region the wise lumberman has his men on hand with axe and cant hook ready to reclaim all of the burned over timber possible and thus cheat the hungry worms of much material for devastation before another season has gone by. This will make next summer's log supply

much larger than it would otherwise be, but the indications are that the needs of the country in the way of lumber will be adequate to any average output. But that's looking a long ways ahead, and this fall's trade has yet to be realized. What it will be will have a bearing on future development. Its nature is somewhat of an unknown quantity, but the outlook is each day getting much more hopeful.

The reports from all points in the white pine section are encouraging this week. While actual sales may not be quite up to the standpoint of expectation, there is a strong tendency toward improvement, and the inquiries that are floating around are indicative of a growing demand and better feeling generally. The tariff problem is something which is greatly agitating the manufacturers of the Saginaw district. Since the new tariff law has gone into effect the lumbermen on the American shores of the great lakes are brought into direct competition with the Georgian Bay product, as it is easy to see that every foot of lumber that comes from the opposite shore under free duty competes with the sale of a like amount of American product. At the present time, when lumber in this country is sold so dangerously near its actual cost of producing, this disturbance in values is greatly to be regretted.

NAILS.—Demand has been good and on the increase. Some jobbers complain a little at times over a paucity of orders, but it is only where they may not happen to be catching their natural run of trade. At the manufacturing end of the market there is certainly an increase of work and that probably is the best test of ruling conditions. Prices remain firm and especially so on wire nails. We quote Cut at \$1.00 a 1.05 per keg for car lots and \$1.10 a 1.20 per keg for parcels from store for iron, and add 3c per keg for steel; Wire, \$1.00 a 1.15 for car lots, and \$1.25 a 1.35 from store.

PAINTS, OILS, ETC.—Business is working along in fair shape, a little fuller if anything and operators incline to speak cheerfully accordingly. Occasionally reports are made of very good consumption and in the country districts it is said that where the paint brush can be made to do service for temporary "repairs" it is being resorted to with considerable freedom. Small dealers in consequence find it necessary to renew stocks with some expedition and the reflection is felt throughout the entire market. No one however complains of overwork in attending to any class of custom and investments are rarely made against any distant want, buyers exhibiting a measure of caution that is noticeable. It is however quite likely that few favors are entertained in regard to cost and that induces a policy of letting goods remain in first hand until they are wanted. Prices retain a measure of irregularity and few of the leading staple lines of stock are yet fully settled upon a uniform working basis, but as a rule no important advances are looked for.

For leads, corrodors' quotations stand as follows: Lead in oil in kegs and lead in kegs in lots of less than 500 lbs., 6 1/2c net; in lots of 500 lbs. to 5 tons at one purchase, 6c; 5 tons to 12 tons, one purchase, 5 1/2c; 12 tons and over, one purchase, 5 1/4c. Lead in oil in 12 1/2 lb. tin pails, add 1c; in 25 and 50 lb. tin pails, add 2c, and in 1 to 5 lb. tin cans, assorted (100 lbs. in case), add 2 1/2c per lb. to keg price. Tars on lots of 500 lbs. and over, net or acceptance at sixty days, or 2 1/2 per cent discount will be allowed for cash paid within fifteen days of invoice date. To make either of the above required quantities any assortment of packages of white lead, red lead and litharge may be counted. The above quotations are free on board cars or boat at corrodors' point. Linseed Oil shows continued irregularity. The demand is not particularly snappish or broad, but the principal difficulty is in the more or less acute competition between the manufacturing interests, and of which buyers manage to extract considerable advantage until the close when a firmer feeling prevails. We quote at 50 a 51c. for Western, 52 a 53c. for City from domestic seed and 54 a 55c. for do. from California seed. Spirits Turpentine shows about former general features a moderate demand prevailing and prices favoring buyers. We quote at 28 a 28 1/4 c. per gallon, according to quality, quantity, delivery, etc.

TAR AND PITCH. Business for actual consumption is keeping up very well and about the average run of trade is represented. Buyers have obtained such stock as required without much difficulty but found no surplus and cost remained practically unchanged. We quote Tar at \$1.85 a 1.90 in pine or Wilmington bids., \$2.50 a 2.55 in pork bids., and \$3.50 a 3.55 in oil bids.; Pitch \$1.50 a 1.70.

ALL despondency about the commercial condition of the country is unphilosophic, and most of it unreasonable. That which characterises the reports from the different trade-centers just now is of the latter kind. If a comparison is made with this time last year the improvement is very great indeed, and so far none has been lost; the dullness that has characterized certain lines in the past few weeks cannot be taken as a set-back. While immediate market reports indicate little doing, the larger view obtained through returns of railroad earnings is more encouraging. From these it appears that the bettering of conditions which began in the South is now extending to the North-eastern States, and the last Burlington and St. Paul statements disclose a much more encouraging state of things in the Northwest than was thought could possibly be the case when so much alarm was created about the condition of the corn crop. The fact of the matter is that the great markets, where speculation is most rife, have too much influence in forming the general opinion of the whole situation. When the stock and grain markets become disorganized they are too often taken to represent the whole situation, when they very often only represent the mistakes of rash speculators. Even while it must be admitted that the grain market continues in a very unsatisfactory condition, what is most apparent in the stock market is not as important as it seems. The decline in sugar, cordage, Chicago gas and other industrials does not surprise any one who knows how some are manipulated and what others represent. A careful examination of the list discloses the fact that their movements do not affect securities that have any merit at all which the public is permitted to see, and that prices of these are very firm, notwithstanding the break in others whose condition is bad or uncertain. Examined in their proper light these and other things show that this is a time for the exercise of patience and courage and not for indulgence in despondency.

WHILE money continues to pile up in the vaults of the great depositories of Europe, and as a consequence discount rates are low, the reports from the commercial and financial centres are not altogether uncheerful in tone. One fact is of considerable import and that is the approaching completion of the Baring liquidation, begun nearly four years ago. The liabilities are now only about a tenth of what they were originally and the remaining assets are estimated to cover them and leave a considerable margin for the estate itself. This has been brought about largely by the appreciation in the value of the securities turned over to the liquidator as a result of the more favorable view taken of the situation by the buying public. That such securities maintain the advances they have made is proof of a confirmed belief in the reasonable permanence of the improvement that has been so far attained and offsets an occasional set-back here and there. Considerable unreasonable disappointment is being expressed because European trade in certain lines favorably affected by recent legislation in Congress has not become as active as was expected. This is due to the overlooking of two things: One the amount of goods ordered in advance of the adoption of the new tariff and subsequently cleared, which has to be absorbed before new orders can be given, and the other that the reduced duties do not in some important instances take effect until January next. This latter is the case, for instance, with worsted coatings which formed the bulk of the exports to this country from the Yorkshire wool regions. The Bourses are in the main occupied with trading in government securities, a clear indication that business revival is only moderately perfected, but this exclusiveness in trading is likely to be short-lived, because of the advance that has been made in the prices of such issues and

of the chances for more profitable uses for money that will from time to time be offered in trade and in other classes of securities. This opinion is supported by the explanation given by the Governor of the Bank of England to its shareholders for keeping so large a portion of the bank's surplus in cash and bullion instead of in investment securities. This explanation was, that in the opinion of the directors there was a good chance of consols falling again because of the enlarging uses for money. The large London joint-stock banks are also holding their funds in hand apparently for similar reasons.

IT is difficult to be really very enthusiastic over the choice between Hill and Morton which the despotism of "politics" has offered to the voters of this State. Possibly there are differences distinguishing the two notorious candidates, but the dissimilarities are not of the right sort, extreme and important as undoubtedly they are regarded by the merely political eye. According to rumor, this fall promised to be a great and notable occasion for "decency" and "respectability," and all that kind of high-sounding things. We were assured that the public mind was in such a morally touched and sensitive condition that one party, if not both, would certainly feel constrained to go to the length of pandering to cleanliness and righteousness and play the old game of "politics," if at all, sheltered behind the back of some indubitably reputable citizen free from "machine" affiliations. "Hill and Morton" is scarcely the symbol of the realization of these expectations. The candidacy of these men means "politics"—the simon-pure thing—and a campaign of political methods for political ends. No one can regard it as indicating any weak concessions to the moral sentiments or to the iridescent dream of purifying public life. "Decency" and "respectability" have been knocked out; or, more strictly speaking, again it has been demonstrated that they are mere sawdust figures of small account, either in conventions or at the polls. It is said that the nominations are distasteful to the "better element" in both parties. This disgust, however, will not be an effective quantity on election day. We may be sure of that. The "better element" is a very elusive constituent in our political life. It reminds one of the hypothetical or theoretical elements which physicists speak of. It has never been fixed and endowed with tangible existence. In the laboratories of certain publicists, this better element is much counted upon, but it doesn't manifest itself in the clear indubitable manner which one may rightly expect of an important reality. It vanishes under pressure, and, like some political spook, is not to be found when it is most carefully searched for. Perhaps our politicians are acting only as sensible men when they ignore it in their calculations, treat it as something quite incalculable—if existent. Whatever evidences there may be to-day of any agitation on the part of this better element over Hill and Morton, there will be none visible early in November. The major part of the "element" with Democratic leanings, will by that time have assured itself that party and party principles are of greater moment than men, and, viewed from this high standpoint, even Hill is a superior person to Platt's man, Morton. Whereas, on the other side, "decency" with strong Republican predilections, will quiet any sensations of touching unclean things by thoughts of the sacredness of Republican doctrines, and the support which these doctrines will receive from a vote for Levi P. Morton, instead of for that obnoxious demagogue, David B. Hill. It is an old story, and one likely to be repeated for many a year yet to come.

THE powers of the savings banks in this State to erect buildings for their own use have recently been the subject of discussion in several of the daily papers, which have volunteered reasons pro and con concerning the preferableness of large or small buildings for headquarters, but without stating the facts of the case exactly or explicitly. The law provides that a savings bank shall not expend more than one-half of its surplus in a building for its own use, without the consent of the Superintendent of the Bank Department, which there are reasons for believing would be refused in any but a very exceptional case, and which, at any rate, has never been applied for. With this limitation a savings bank may build either for its own use exclusively, as has recently been done by the Bowery Savings Bank and the Bank for Savings, or for its own use and revenue in addition by providing for tenants, as has more remotely been done by the Emigrants' Savings Bank, the Seamen's Savings Bank and others. This is entirely a matter of policy, to be decided by the trustees. It can easily be understood that many considerations may enter into the formation of this policy. The question of locality and the probable class of tenants that could be obtained is a very important one, it being, of course, absolutely necessary that the tenants should be unquestionably good. The older banks, which have never admitted tenants into their buildings, and have a large surplus, can afford to maintain that policy and keep their new quarters for their own use, especially where the values of sites are moderate and prospective tenants not all that would be required. On the other hand, where the

savings banks are located in prominent downtown business thoroughfares and on expensive sites, and where, by judicious selection from applicants, the tenants may be of the best class, there is no reason why they should not avail themselves of the opportunity presented for the profitable employment of part of their surplus by putting up a commercial building, as has been satisfactorily done in a number of cases. The point has been made that building operations might interfere with the claim of depositors to a special dividend in the condition provided by section 123 of chapter 689 of the Laws of 1892 relating to savings banks; that "the trustees of any such corporation whose surplus amounts to 15 per cent. of its deposits, at least once in three years, shall divide equitably the accumulation beyond such authorized surplus as an extra dividend to depositors in excess of the regular dividends authorized." This objection has not much force, because the savings banks do not carry any such surplus. The policy of these banks, as well as the legal requirements under which they carry on their business, does not favor the rapid growth of the surplus. Every investment they make is of the very best class, and consequently the interest return low, so that the ordinary dividends represent nearly all the depositors are entitled to receive, while, of course, the surplus is kept at respectable proportions, with the additional margin of safety that the investments generally stand on the books at their par value. But the important point is that, with the restriction previously mentioned, the question of building is one entirely within the discretion of the trustees of the savings banks, and is decided according to the circumstances of the several cases.

The Lumper Strike.

EVEN sympathisers with Labor and the Labor programme in the abstract find it impossible to approve of the recent attempt at ignorant tyranny known as the "Lumper" strike. The character and purposes of this attack upon the employer are particularly unjust and iniquitous. Usually in contests between employers and the employed there is, on both sides, at least an appearance of justification for a difference of opinion. A fight may be due to the clash of irreconcilable claims, but generally the demands of the two combatants are of a character which honest, if selfish, men can advance without planting themselves well in the category of pirates. With all desire to be fair, we do not see upon what ground this "Lumper" strike can be justified, save upon the pot-house theory that the "bum" and the "loafer" must be taken care of and treated at the expense of the employer as though they were clean, industrious members of society. The most dangerous defect of the labor movement is its utter unwillingness to discriminate between the good and the bad within its membership. Inside the fold all are sheep. The "shirk" and "bummer" are placed on the same plane as the industrious, conscientious workmen, and the activity and power of the Union is employed in advancing the interests of the one as much as in promoting the welfare of the other. Of course, the "bum" desires to make "Labor" stand for something in many respects different from what the industrious and ambitious workman would have it represent. He wants not only high wages and reasonable conditions of life, but, more particularly, he would possess immunity from any unpleasant consequences of his defects. The Union for him is to be a shelter. This "Lumper" strike, to characterize it broadly, is an uprising of, or on behalf of, the shirk and bummer element. The best evidence of its character is that, so far as we can see, no competent and industrious workman can possibly gain anything from its success. The strike is not for higher wages, or shorter hours, or reasonable privileges. Its purpose in effect is to make the Union not only the source of the labor performed on buildings, but, as well, the superintendent of the work performed by its members. The individual who pays the men their wages and is most interested in the performance of their work is to be removed and replaced by one of the workmen themselves. Who would be the beneficiary of this revolutionary change? The owner of the building? Scarcely; the contractor is responsible to him for the exact fulfillment of a definite contract. Is it the sub-contractor or the "lumper"? Hardly; for no one is likely to understand so well the work to be done or to superintend it so closely as the man whose interests are directly concerned. Perhaps, then, the industrious workman will be the gainer? Difficult to see how. He will not get a cent more a day because one of his own fraternity supervises his work. Nor will any leniency due to the bond of fellowship between himself and his temporary overseer advantage him, because if he be an honest workman he will not shirk nor scamp. But in the case of the "loafer" or the incompetent, how differently the proposed change would work! One of his fellows would be over him, and the fraternal spirit would preclude the workman-superintendent from holding to a too nice or rigorous sense of the rights of the contractor. This is the nigger in the wood-pile and an utterly vicious and shameless darkey he is. He has no

business in the company of honest men. This Lumper strike is a demand upon the builders of this city to stand and deliver. If this be a proper request, then logically there is no right that we can conceive left to the builder except to cease from his enterprise. If the builders of New York do not resist this outrageous demand they deserve no consideration from the hands of labor but that which the tyrannous may safely be trusted to mete out to the pusillanimous. Our builders must organize themselves into a solid, compact, unanimous body. Sooner or later—each step further at greater cost—they will be forced to do so. Their present condition, due in no small measure to selfish distrust of one another, and to disinclination here and there to subordinate somewhat individual interests to the general good and to forego chance advantages to be gained over one another, invites, promotes outrages of the character of this "Lumper" strike.

THE trend of immigration from country to town which has been so rapid of late years is producing new social conditions quite revolutionary in their character. This country has always boasted with pride that its people, in the main, live under roofs owned by themselves, and undoubtedly the fact that we have really been a nation of home-owners has had an enormous influence upon our social life in the past. A recent census bulletin, however, shows that this condition is changing. Though two families out of three still own their own farms in the agricultural districts, in cities the majority are merely tenants of one sort or another. For instance, in New York City only six in one hundred families own their own homes, and in Boston eighteen of every hundred.

THE appointment of an English Committee to investigate lynching in our Southern States is another justification of Lowell's remark that the English are a society for minding other people's business. International criticism is all very well in its way, and undoubtedly has on more than one occasion produced the good result of stirring up torpid national conscience. Carried, however, to the limit of an invasion by an investigating committee it savors of impudence, and would be, we should judge, unfortunate in its results. But though the South has a right to resent an invasion of English officiousness, it is not warranted in continuing to outrage those feelings of humanity which occasioned the proposal to send an investigation committee over here. How fine the line is that divides civilization from barbarity is demonstrated with painful vividness, not only by the inhuman outrages which are perpetrated in the South in the name of justice, but by the callousness of the people who not only commit these barbarities but stoutly attempt to justify them. We only make ourselves ridiculous as a people when we protest against Russian atrocities in Siberia, the brutalities of English landlordism in Ireland, or the inhumanities of the slave trade in Africa, if at the same time we permit on our own soil, among our own people, barbarities even more shocking than those we condemn.

CHICAGO advices come opportunely to hand to confirm what we said recently of the blessing of a clear atmosphere and further to point out how unnecessary it is in anyone's interest, apart from the public's rights in the premises, that factory chimneys should belch forth befoulment over the city. During the recent coal famine in that city its citizens remarked that they could see farther down the street than was usual, and that across the way the doings of their neighbors were distinctly visible. Some of the more curious and venturesome, not to say reckless, climbed to the top of several of the high buildings and obtained, as a reward for their daring, a view of prominent objects in the stockyards and other areas of salubrity, sights that have never before been seen from such a distance. Such remarkable events naturally created a sensation and an inquiry into their cause. It was finally discovered that, owing to the scarcity of coal, it was used so as to obtain the best combusive results and the furnaces instead of being loaded up at long intervals with great quantities of fuel were sparingly fed at frequent intervals, and this careful stoking combined with the use of the smoke consumers gave off through the smoke-stacks, instead of the great black clouds that have so long enshrouded the city, only thin gray spirals of smoke. "The result," says the Chicago reporter, piously and fervently, "was like a Sunday," yet the factories were running without any diminution of their normal producing power. It having been thus demonstrated that the smoke nuisance was largely due to the selfishness and parsimony of the manufacturer some vigorous measures are to be taken to stop it, though owing to this abomination having been sanctioned by long usage it is admitted that the task will not be an easy one. New York's position is a very simple one compared with that of the western city on this question. With proof of its necessity in the operation of a furnace and its known unlawfulness all that is necessary here is vigilance to see that the smoke nuisance has no established beginning.

The Lumpers' Boycott

ORGANIZATION OF THE EMPLOYERS' AND BUILDERS' LEAGUE, AND OPENING OF PERMANENT HEADQUARTERS, THE UNION SIDE OF THE CONTROVERSY PRESENTED.

This has been a week of anxiety with the builders who have become involved with the trades' unions in the strike against the so called lumpers. But those who have stood together against the Board of Delegates are better supplied with men now than they were at the first of the week and having effected an organization, through which they will be able to render each other much valuable assistance, they are looking forward now to an early victory.

The Monday night meeting, announced in last week's RECORD AND GUIDE, resulted in the adoption of a constitution and by-laws and the organization of the Employers and Builders' League of the Building Trades. The objects and purposes of the League are fully set forth in the following sections of the constitution:

Section 2. The purpose of its formation is that by careful, conservative action we may preserve the interests of owners, contractors and journeymen; also by arbitration and discussion avoid all necessity of strikes, lock-outs, liens and disputes.

Sec. 4. As we recognize the fact that the interests of the employer and the employed are mutual, the cardinal principle of the association shall be equal justice to all.

Sec. 5. The officers of the association shall consist of a president, first and second vice-presidents, secretary, assistant secretary, treasurer and board of directors, which latter shall consist of three representatives of each of the different crafts actively engaged in the building trades, and this body shall have the general supervision of the affairs of the association.

How the League proposes to deal with the labor problem is indicated by this paragraph from the by-laws:

"They (the directors) may nominate, appoint, and remove when expedient, four journeymen in each craft who shall be representative conservative men to be known as master stewards, and these men shall be the recognized medium of communication between the Board of Directors and the journeymen."

No definite line of action has yet been laid out with respect to the labor question beyond the foregoing, but if the counsels of those who have been active in the formation of the League are followed, the League will refuse to deal with Walking Delegates or trades' unions as at present organized, and will endeavor to classify workmen in three grades, according to ability and fidelity, giving to the most efficient the highest rate of wages, to those who are either less skillful or less efficient the second rate and to mere rough workmen the third rate. The classification is to be made by the League and the Stewards acting jointly, and the scale once fixed will be rigidly maintained by the League, making provision, of course, for promotions from the lower to the higher grades. The League also purposes to establish a labor exchange, where employers may make their wants known and where workmen may learn where work is obtainable.

Organization of the League was effected by the election of John P. Leo, president; Francis J. Schunzger and Richard G. Platt, vice-presidents; Arthur Gersch, secretary, and C. A. Du Bois, treasurer. A committee was appointed to secure a temporary headquarters and the books were opened for enrollment. The League will open permanent offices and headquarters in the United Charities building, at 1th avenue and 22d street, at once. They will be kept open every day for the convenience of members, the reception of mail for the League and its members and the information of mechanics about places of employment. The larger meetings of the League will probably be held in the Central Turn Verein Hall, in 67th street, and here the next general meeting of the League will be held next Wednesday evening. The exact locations of the offices in the United Charities building will not be determined until to-day, two suites being available, but the matter will be determined in time to open the offices next week.

Generally, all the jobs that were struck last week have made some progress this week, with non-union men or with men who refused to obey the orders to strike. The lumpers had many of the better class of men at work for them and these, especially were free in denunciation of the action of the delegates, while at the same time they did not feel strong enough to disregard their orders. They have made it plain to their employers that if they could be protected against the unions and could be insured continuous and steady work they would break loose from the unions at a moment's notice, for they are at the point of rebellion against what they consider the tyranny of the Walking Delegate. This assurance the League will endeavor to give them. It will endeavor to not only establish among its members a co-operative system in contract work, but through its labor exchange give the preference on all their jobs to mechanics who carry the League's card. But most of the jobs were short of men, or at least of just the sort of men they want, and this, notwithstanding that over half the carpenters of the city are out of work and have been so for a year. An authentic case is reported of one who has been out of work seventeen months, and who refused an offer of work at \$3 a day, which is 50 cents below the union scale. In this case the offer was not made by a lumper. Several members of the League reported on Thursday that they had received assurances from their former workmen that led them to believe that next week they would have all the workmen available that they could handle.

On Thursday the Walking Delegates called out about fifteen carpenters on Walker & Lawson's houses, on Riverside Drive, between 103d and 104th streets. Walker & Lawson had contracted with Paul B. Pugh for their carpenter work, they furnishing the materials. When two weeks ago the general strike was ordered against the lumpers Mr. Pugh surrendered his contract and Walker & Lawson hired a foreman and themselves tried to go on with the work. Mr. Pugh paid them a friendly visit on Wednesday and at

the solicitation of one of the men he helped to rig a tackle and fall for hoisting some oak ceilings into place. This was reported to the Walking Delegates who came around the next morning and complained to Mr. Lawson about it. He had already found reason to regret his first surrender to the Walking Delegates and it took but little of their dictation now to provoke him past further endurance, when he bluntly told them he would suffer their interference with his men no longer. They waited until noon, when they met the men on their way to their luncheons and ordered them to quit. Later they said they would strike all the other union men on the job to-day. When the union carpenters quit, Walker & Lawson reinstalled Mr. Pugh as lumper of the carpenter work, and he began to bestir himself to get a corps of workmen together. Some of the men who quit did so manifestly against their inclinations. One seasoned old jackplane spit out to the Walking Delegate thus, timorously: "That's always the way. No sooner do I get a good job—now there was a good job, them panels; I was just getting them panels up in first-class style—no sooner do I get a good job than *somethin'* comes along and—here I am ag'in knocked out of a good job." Then, as if he had said too much on that string: "Damn 'em, they can go to hell with their damn job!" A more pitiful or pathetic display of contending indignation, anger and fear is not often seen. All these men were working union hours for union pay. Only in the immediate presence of the Walking Delegates did they have any manner of complaint to make against the builders or the carpenter contractor and these referred only to the fact that the latter had made his appearance on the work after the strike against him had once been settled by his surrender of his contract. Some of the men who quit had worked for Mr. Pugh five years or more.

An effort was made to secure from the Walking Delegates who ordered the strike on the Walker & Lawson job, some sort of connected statement of the motives of the strike. They were disposed to refer the inquirer to the Board of Delegates for answers, but finally answered to the following general effect: The boycott is directed against the lumping system in its entirety. It has been ordered against the carpenters because they are the only lumpers in the trades now under the control of the Board of Delegates of the Building Trades. If the Board of Delegates could reach the bricklayers it would include them in the boycott, but the bricklayers' union is not under their jurisdiction. If the boycott shall prove successful against the carpenters, it will then be extended to out-of-town trim, so that none but New York City-made trim shall be used on New York houses. After that, if the bricklayers do not sooner declare against the lumping system, their work will be boycotted.

The basis of complaint against the lumpers is founded in the following allegations: That they do not conform to the union scale of wages, which fixes \$3.50 a day as the *minimum* rate for all journeymen carpenters, the lumpers taking this as a *maximum* rate, or, in perhaps a few isolated instances, paying 25 or 50 cents a day more to a particularly effective man whom they make a "pace-maker" on the job, while the majority of their men are paid less than \$3.50 per day; that a system of slave-driving is pursued by them, under which the men are required to do two days' work for one day's pay; that the system is thoroughly akin to that of the "sweater" system in East Side clothing manufacture, and that its tendency is to the degradation of the men and the lowering of their wage. It is also alleged that the lumpers discriminate in favor of the best men, and that their work is inferior to that done by "contractors." But this last charge contains its own contradiction.

It was intimated to the Walking Delegates, who were courteous and moderate in their manners, that in this boycott against the lumpers they were receiving the sympathy and encouragement of the contracting carpenters, in reply to which one of them said: "We have been offered financial assistance by some of the largest contracting carpenters in the city, but we have declined to take their money and are making this fight on our own resources."

"What difference should it make to you, as an individual workman, whether you were employed by a lumper or a contractor?" the delegate was asked.

"It would make this difference to all journeymen carpenters," he replied: "they would be working under a foreman chosen from their own ranks and alert in their interests and in the interests of their organization, who would treat them as human beings with human feelings, if they were working for a general contractor, and there would be no question about conforming to the union scale at all times. Whereas, if they were working for a lumper it would be whip and drive under a taskmaster all the time and they who could not keep up to the pace-maker would be paid less than the union scale. I do not say that this is always so, but it is most generally so. And how could it be different? The lumper is nothing more than a padrone—he contracts for nothing but human labor and he runs no chances on that. Look at this man Pugh, he has accumulated thirty or forty thousand dollars out of the system in the last six years."

It was suggested to them, in the words of Mr. C. W. Luyster, that in trying to put an end to the lumping system they were closing the door to advancement from their journeyman condition to that of the master builder; that it was through the condition of a lumper that a man rose to higher standing in his trade. "Yes, rising by crawling over our backs and grinding the faces of his fellows in the dust of their labors, from which he is free!" was the answer.

There is a manifest difference of opinion among the large builders and contractors over the merits of this controversy. Mr. C. W. Luyster is known wherever New York houses are known as one of the best professional builders in the city. He talked freely about the lumper's boycott for he had been made one of its victims, saying, among other things: "I think the unions have made a mistake in this case and have undertaken a fight which can only end in their

defeat. The lumping system is too thoroughly established; it is too completely in accordance with the natural development in recent years of all industries and professions in which the "all-around" man has had to give way to the specialist and in which all industries are more thoroughly and highly organized than they ever were before. The unions are having the sympathy and support of the old line contracting carpenters because their interests are the same. Formerly the carpenter took the plans and specifications and got out and supplied all the material and put it in place. Then the sash, door and blind factories began to make these items by machinery and followed them with mouldings and finally all manner of trim. Now all the finishing woodwork in a building is made near the bases of supply of the raw materials—near Buffalo, and in Ohio, Indiana and Michigan, and hardly any of it is made in the city. Now, the contracting carpenters, even if they get the contract for a building, they buy their trim of these manufacturers and only put it up the same as a lumper, only they make a profit, not only on the labor, but on the material as well. I can buy the materials myself and award to a lumper the contract for putting it in place, or the manufacturer will not only sell me the trim for my house, but he will put it in place for me beside. Now, why do I prefer to deal with a lumper? Because he is a man with whose work I have become thoroughly acquainted, and who does his work in a satisfactory manner; because he knows his gang of men thoroughly, and having nothing to do but supervise their work, he learns the things in which each of them excels, and is thus able to direct them to the highest point of efficiency. No, it is no question of slave-driving; but as there are no two men exactly alike in this world, so there are no two men of exactly equal proficiency in their work. But in every gang of men there are men who will excel all their fellows in particular parts of the work, and when that work comes to be done the best man is put upon it. Now, is there any ethical reason why I, as an owner, should not purchase my own materials and contract with specialists—lumbers, if you please—for putting it in?"

Mr. Chas. A. Cowen, a builder and contractor, voiced the sentiments of the old line established builders and contractors, when he said: "My sympathies are all with the men in this contest. The lumping system is in my judgment degrading to the building industry and to labor as well. It refines the life out of the industry, sets impossible tasks, and results in inferior work. The lumper is generally an irresponsible person, without capital in his business, and whose success depends upon slamming his work together in the most expeditious way without regard to thoroughness or stability, but just so that it will stick together. They are the product of the speculative builder, who builds houses to sell, and whose work always shows best on the surface. It is to the interest of the workmen and to the legitimate and responsible builder that the lumping system should be done away with."

Office Space and Office Renting.

The unfortunate conjunction of a large addition to the down-town office space and a condition of business that lessens the demand for offices is affecting all office renting more or less, and that of the older buildings seriously; as one broker put it recently they are undoubtedly getting it between the eyes. Not only have the owners of the old buildings reduced their rents and improved the conditions for the tenants, but they cannot get the tenants even on better terms. The losses increase as the property extends away from certain centres, or lines of thoroughfare, by reason of people taking the opportunities presented by the times to get up closer to those centres and lines. Thus while the older buildings on Broadway, as was generally admitted by their agents on being questioned, have only been able to keep their tenants by modifying the terms of tenancy in the tenants favor, sometimes only to the extent of abolishing extra charges and at others much more, the buildings back of Broadway, unless touching the Produce and Stock Exchanges, have been unable to make any conditions that would keep tenants at all, as shown by the plentiful "to let" notices to be found on all sides. Of course people do not leave their offices except for cause and while the extended business depression is responsible for a great many vacancies, the attractions of the new buildings are responsible for many more removals.

The new buildings themselves, with all the advantages they have to offer, are not by any means full, but it is not fair to expect that buildings which were not completed until after the renting season had closed would be filled in the first half year of their experience. The Manhattan Life Building, notwithstanding its proximity to the Stock Exchange has, according to Mr. John S. Stokes, its agent, let about 50,000 of 72,000 square feet it has available to tenants outside of that occupied by the company that owns it. At the same time Mr. Stokes was frank enough to own that he was ready to meet concessions elsewhere made in the cases of good people. The Home Life and the Postal Telegraph buildings have both a good deal of unoccupied space. The results in these first cases are regarded as satisfactory as will be seen in the remarks of Mr. George R. Read, given below. Mr. Edgar L. Pierson was equally satisfied with the Postal Telegraph building, regarding which he said: "I have fulfilled my verbal contract with Mr. John W. Mackie that I would get sufficient money out of the rents of this building, first, to pay the ground rent; second, to pay the running expenses; third, to give him a large rate of interest on the money invested in the erection of the building, which cost \$1,000,000, and, fourth, to establish a sinking fund to pay for this building in a certain number of years."

The Havemeyer Building is filling up, having now only sixty vacant offices out of 370, a result comparing very favorably with last year. These facts and the remarks of three of the most prominent brokers and agents in the city following, accurately reflect the situation as

regards the result of the dull times and the increase of the office space:

Mr. George R. Read said: "I do not find that there is either too much office space or that any concessions have to be made to secure or keep tenants. Where the building is modern and contains all improvements and the rents are reasonable there has been no difficulty in getting or keeping tenants for them. The Corn Exchange Bank building was filled last spring, tenants have been coming into the Home Life Building all summer long, a most unusual thing, and we are receiving applications every day for offices in the new Coffee Exchange building which is not yet completed. The cases of cutting talk about are due to rates being fixed too high at the outset and they have necessarily to be readjusted. The vacancies in new buildings are explained by their not being ready at the renting season and to the antipathy tenants have to go into offices while the mechanics are still around. No doubt the old buildings suffer, because tenants are attracted to the new ones by reason of the change in the sentiment and temper of the business public, which requires comforts and conveniences in their offices and opportunities for making their places of business attractive in appearance which they can only find in the new building. Janitor charges and other extras that are required to be paid in many of the old buildings were abolished from first-class buildings five years ago, and as far as such buildings are concerned are a thing of the past. In buildings answering modern requirements rates are as firm as they were two or three years ago."

The head of one of the oldest and best known real estate houses in New York said: "The report that there has been a great reduction in office rents is not confirmed in our experience. In a few cases where it was desirable to keep tenants, of course, we have made some concessions on short leases, but as a general rule every effort has been made to maintain prices, and where rentings have been made they have been at pretty nearly the old prices. In a few cases where parties have determined to fill up their buildings they have done so by not holding to their terms of rental closely. There is a great deal of office space vacant, but the causes for this are temporary in their nature: In the general business depression people are full of caution, desirous of cutting down expenses and reluctant to go into new undertakings. Consequently there is a good deal of doubling-up and the making of temporary arrangements proportionate to the business that is being done and no new firms are coming to take the places vacated by the old ones. These causes will all disappear with a revival of business. There is nothing in the amount of available office spaces to cause apprehension. The change in the methods of doing business remove that. Twenty years ago the space of one modern building would suffice for a large part of the people doing business in offices, but to-day iron, building, grocery men all do business in offices. These and others, such as importers, do not any longer have a small office at the end of a warehouse, but a large down-town office where they sell from samples. Some people, for instance, who used to do business in John and Cliff streets now have offices in the United States Trust Building on Wall street. This change in the manner of doing business has increased the demand for office space, and as it is a change that is permanent, the custom will spread and keep all the office space in demand.

An equally prominent broker said: "So far, at least, we have held our own remarkably well. The high buildings have not affected us to any extent, nor have we made any concessions, except in a few special cases. I have been somewhat astonished myself at the fact, but it seems that where good tenants are acceptably served they are willing to remain, even if tempted elsewhere by offers of lower rents, because they do not know but what the reduction is made to get them to change and when they are fixed in the new place the rents may be shoved up on them. Moreover, men who have been long established are loth to change, because of the disturbance it makes in their business, and they contemplate with less pleasure still a probability of having to make a second change in the event of the first becoming unsatisfactory by reason of the terms under which they make them being altered to their disadvantage. The dull times have naturally had their effect, but with the improvement of the times and the certain growth of the business populations, there will be a better demand for offices and better results from renting."

Agents engaged in the renting of down-town offices say that prices for accommodations in a well-known Broadway building, owned by a prominent insurance company, have been reduced of late, in the hope of securing tenants for offices now vacant.

The vacancies in the *World*, or Pulitzer, building represent an annual loss in rentals of \$60,000. Paternal management has not proved profitable there any more than it has elsewhere in the case of big office structures. On the principle that "a shoemaker should stick to his last," would it not be more satisfactory to intrust the renting of the building to some firm of reputation and experience? The income of the *World* from its real estate advertisers must be very large, and it looks unfair for the owner of the paper to act as agent and still continue to persistently solicit patronage from renting firms.

Architects and builders will find in THE RECORD AND GUIDE edition of the Building Laws and Ordinances of Brooklyn a time and labor-saving volume worth many times its price. It is illustrated and indexed so that the reader can find in a moment any regulation for which he may be seeking without having to read the whole volume. It is ready for delivery now at the offices of THE RECORD AND GUIDE, 14 and 16 Vesey street, New York, and 276 Washington street, Brooklyn. The price is \$2.

American Basement Houses.

SIX NEW DWELLINGS ON WEST 87TH STREET, NOS. 5 TO 15.

When THE RECORD AND GUIDE nearly two years ago in a series of special articles advocated the construction of the style of town-house that has since come to be quite generally known as the American Basement House, it did not expect so large and early a compliance with its views on the part of the New York builders. These gentlemen are conservatives of the conservative and are exceedingly slow to depart from tried and approved methods, no matter how well the novelty may approve itself to their individual judgments.

But in recommending the American basement house this journal struck a strong popular chord, which the builders themselves have been quick to respond to, and it is with extreme satisfaction that it may be said that since the first of this new style of houses was built they have steadily grown in popular favor, have been the best selling style of house in the market and have been much improved upon in their later examples.

How readily they yield to a refined architectural treatment of their facades will be easily perceived from the accompanying illustration.

of attention from prospective purchasers, though until now they have hardly been sufficiently advanced to make the merits of their interior construction, arrangements and finish apparent. People have been attracted chiefly by their peculiarly light and handsome fronts, which are of buff brick and Indiana limestone, and the suggestion of interior brightness and comfort that beams from every story. Of course, interested parties will want to visit the houses for their own satisfaction—nothing else will ever convey to them any adequate notion of their many good points. Nevertheless a word or two about these may be hazarded.

There are varieties in the designs, as may be seen from the photographic illustrations. Some have right, some left entrances; all have separate entrances and hallways for service and trades-people, but these vary also, in that some go straight through to the kitchen, while others pass through the sub-basement, or cellar, and thence to the kitchen, and in others there is a descent of a few steps in the hall and side-passage to the cellar, and an ascent a few steps further on, to the kitchen. All, however, are convenient and all have their advantages.

In some of the houses the main entrance is direct to a spacious

which is of six houses on the north side of 87th street, 150 feet west of Central Park West, and known as Nos. 5 to 15. They were designed have been built and are owned by Mr. Charles Buck, a man whose houses have always commanded the very best patronage. Just a word here about the builder. When a real estate agent wants to say the best thing that can be said about a house on Murray Hill or in the section around the southeast corner of Central Park and along 5th Avenue as far south as Madison Square, he tells you it was built by Duggin & Crossman, men who stood at the head of their profession twenty-five years ago. Well, Mr. Buck grew up with them, was manager of their construction work several years and finally succeeded to their business. When the West Side began, only about fifteen years ago, to take form as the most beautiful and exclusive residence section in New York city Mr. Buck was one of the first to appreciate its many advantages and to correctly estimate its brilliant future. He has been a very extensive builder, and always of only the best style of house, and now his work is so well and widely known that what Duggin & Crossman's name is to an East Side house Charles Buck's name is to a West Side house.

As to these particular houses, after a careful examination of them, made while yet the finishing touches had not been applied, and while all the secrets of construction and hidden recesses were exposed to view, it can be said that more thorough or substantial workmanship and better materials of every class were never put into a row of houses in this city. Already the houses have attracted a great deal

reception hall, and in others to a staircase hall from which there is a side entrance to a cosy reception room or office. The main staircase is in every house located in the central part, some of them having balcony landings, some highly-ornamental archways. In all of them the parlors and dining-rooms, unbroken by narrow side halls, extend across the full width of the house and enjoy a measure of natural light and ventilation that are impossible in a high-stoop house, while they are at the same time perfectly shut off from the possible intrusion of casual callers. There are twelve rooms in each house, besides store-rooms, baths, closets and pantries. In every detail and particular of the furnishings and finish the houses are up to the highest standard. The plumbing is of the best quality known to the art. The wood-work is not merely varnished, it is finished in full cabinet style, to last forever. In this respect alone the houses are far superior to the average. All the best woods are well represented—mahogany, prima vera, maple, hazel, oak, birch, ash and hard and white pine. In the dressing-saloons the trim is of matching kind with that of the adjoining bedrooms.

Mr. Buck has spared no expense in making these houses as much better intrinsically as the advancing art of town-house building could make them over all previous productions. With ample financial resources and a conviction born of long experience that the best is only good enough for the New York taste in houses, he has done all that can be done to produce a group of houses that are, architecturally and intrinsically, a credit to the city and to the great West Side. The

block upon which they are situated is one of the finest on the West Side. It has the best pavement in the city; it is convenient to beautiful Central Park; and soon the Columbus avenue cable cars and the underground electric road through the Boulevard will make it as easily and pleasantly accessible as is any section below 59th street now.

One Way to "Boom" Prices.

If reliability is attached to considerations given in deeds, it will occasionally be found that real estate values undergo a sudden enhancement that must seem little short of phenomenal to the uninitiated. In *THE RECORD AND GUIDE* of the 8th inst. there appeared a conveyance of the westerly block front on Gouverneur street extending from East Broadway to Division street, a plot about 100.11 x 64.1, on which there is an eight-story brick factory. The property has been juggled with for some time, according to the weekly lists of transfers, but seems at last to have found a genuine buyer in William B. Waldron, of Richmond, Va. The consideration given by him is expressed at \$300,000. That amount is so preposterous as to appear ludicrous. Two-thirds of that sum would be a very extreme price for the property, on which there is a mortgage for about \$137,000. Another case in point is Nos. 60 and 62 Lispenard street. A conveyance of the plot and old buildings from Julia A. Chase to Louis Partelli, of Brooklyn, was recorded on the last day in February, the consideration being \$100,000, the buyer giving a purchase money mortgage for the whole amount. Mr. Partelli is known to be a dummy who acts in the interest of Builder A. E. Benson, and it was therefore not surprising to find the property afterward conveyed to a Morris Benson by a deed of March 17 for a consideration of \$25,000 additional. It appears that when the parcel was bought from Mrs. Chase it was understood that it would be improved as soon as possible by the erection of a modern building. The material of the old structures was removed for use elsewhere, it is said, and, that much accomplished, the prospective builder's active interest in the property came to a standstill. In self-defense, the original owner, at that time the mortgagee, threatened to again secure possession through foreclosure, but the matter was compromised by Benson giving her a conveyance, on June 12, for a nominal consideration. A new buyer, William H. Ferguson, appeared during the same month, and title passed to him in July, the consideration being expressed as nominal. Mr. Ferguson gave a purchase money mortgage for \$93,000, and it was then reported that the long delayed building project would be carried out by Homer Beaudet. This must have been an error, as a deed of the property was recorded in the last week of August by which it was conveyed to the "New York Building and Improvement Co." for a consideration of \$150,000. The question naturally arises, why should the lots be worth that sum in August when they were sold with the old buildings in February for \$100,000, which was then and would be now \$20,000 more than their cash value? It may be that indications of the existence of a gold mine have been discovered on the site, but if so that fact has yet to be brought to the knowledge of the public. It is misleading official records like those above mentioned that frequently become a stumbling block in the way of prospective sales. They cause timidity on the part of would-be buyers who do not enjoy the intimacy that leads to confidence in one or more brokerage firms. The figures given are so palpably inconsistent that they cause not only other figures of record to be discredited but the statements as well of those who represent owners in pending transactions. The result is often the withdrawal of overtures made by intending investors that might have been followed by sales, the possible buyer fearing that the apparent fairness of the price under consideration may be due only to unscrupulous manipulation of considerations previously expressed in deeds conveying adjoining or nearby parcels.

Rapid Transit.

A meeting of the Rapid Transit Commission was held on Tuesday, at which formal resolutions were adopted calling on the Police Commission to prepare ballots for the forthcoming election, for a vote "for" and "against" municipal construction of a rapid transit railroad." Not all the commissioners were present and Chief-Engineer Parsons was not quite ready with his preliminary report. Mr. Parsons was instructed to obtain the data and prepare a plan for an East Side route and report the same to the commission. Another meeting will be held on Tuesday at which Mr. Parsons' provisional report of his European investigations will be made. The meetings are held in the Home Life Insurance Building, where the commission has its offices.

OUR BUILDING LAWS.

Architects, builders, building operators and others interested in the building trades in Brooklyn, will be glad to learn that *THE RECORD AND GUIDE* edition of the new Building Laws of Brooklyn is now issued and for sale. Those who are familiar with the manner in which *THE RECORD AND GUIDE* editions of the Building Laws of New York have been compiled know what to expect—a handy volume, containing everything embraced within the State laws, municipal ordinances, and departmental regulations, with illustrations wherever they are helpful to declare the meaning of the text, and a directory of the Building Department. The laws and ordinances embrace those governing sanitation, drainage, water and other street connections, and the regulations of the Health Department also. Finally there is a complete index—a labor and time-saving convenience that is alone worth twice the price of the book, which is ready for delivery from the offices of *THE RECORD AND GUIDE*, Nos. 14 and 16 Vesey street, New York, and 276 Washington street, Brooklyn, at the uniform price of \$2.

A Choice for Mayor.

Some important real estate, building and allied interests found voice to mention their wishes in the matter of the Mayoralty contest when, on Tuesday last, the Municipal Organization of the City of New York was organized in the Manhattan Athletic Club Theatre, at a meeting of which Mr. William J. Fryer was chairman and Warren A. Conover secretary. The organization selected Mr. Samuel McMillan, president of the New York Building and Land Appraisal Company and the representative of the Real Estate Exchange in the Board of Examiners of the Department of Buildings in this city, as its choice for Mayor, and appointed the following committee to urge the selection of Mr. McMillan by other political organizations also: Cornelius O'Reilly, James Thomson, Edward Kilpatrick, Andrew Powell, Aaron Buchsbaum, Thomas Graham, George Waddington, Jacob Cohen, George Crawford, Fred. Dietz, Peter A. Cassidy, William S. Miller, Thomas Dimond, Henry Hanson, Alexander Brown, Jr., John E. Tuomey, James D. Lindsay, L. J. Adams, Luke A. Burke, Stephen McPartland, S. A. Mason, William Campbell, Hugo Bartholomae, William Brady, George Just, Thomas O'Reilly, Fred Van Cort.

Drain These Street Crossings.

There are several street crossings in the most densely thronged of the down-town districts that in the severer rains become rushing torrents, impassable to the pedestrian who is not provided with rubber boots. The worst of these are probably the two crossings on either side of the entrance to the Brooklyn Bridge; another is the sidewalk on Park row in front of the Register's office; another is the crossings of the esplanade in front of the City Hall at the Broadway and Park row ends; still another is the crossing of Park row and Ann street, and another is the easterly crossing of Broadway at Chambers street. Who has not seen women and children, and even able-bodied men, bring up with a sharp stop on the verge of the whirlpools that rush around these corners and over these crossings at such a time? The gutters for twenty feet on either side of these corners, or at least on the upper side, ought to be provided with iron gratings, through which the water would fall into drains of sufficient capacity to carry off the water as fast as it would flow into them. It bespeaks a poverty of resources and a barbarous ignorance of what ought to constitute good municipal engineering to leave these crossings in their present condition.

Obituary.

Ex-Civil Justice Joseph McGuire died on the 13th inst., after an illness of brief duration. He was born in Ireland and came to this country in early boyhood. When twenty-one years of age he was appointed a School Commissioner, and shortly after began to take an active interest in New York real estate. Prior to his election in 1870, as Civil Justice of the Seventh Judicial Court, he was the senior member of a firm that up to that time had practically controlled for several years the auction sales of realty held under Court orders. The services of the deceased as a lawyer were frequently sought in cases relating to real estate law and practice. He was a prominent member and at one time a manager of the Catholic Club. A widow and four adult children survive him.

Hardwick—Golf.

Manager Benjamin Hardwick, of the Real Estate Exchange, has lately been sporting a darker shade of tan than usual in the exposed portions of his cuticle, and has thrown a volt or two more of energy and dash into his stride across the funeral marble pavement of the Exchange Auction Room. His moments of mental abstraction are longer and more frequent than they were wont to be and a suggestive fullness has made its appearance in the regions of his biceps and calves.

The mystery of all this was explained by Mr. Hardwick to one who came upon him in one of his reveries the other day. He was humming—

"My heart's in the heathlands—

My heart is not here,"

when he was called back to earthly and prosy affairs.

"I have been playing golf," he said.

"Out at Madison, New Jersey, where I am living, I play three times a week now. I used to play the game as a boy thirty years ago, on the Blackheath in Kent, you know. I consider it the finest exercise in the world for elderly men. Yes, this is the season—the next two months will be the best part of the year to play. It's then we have our wonderful Indian summer here, and the country is at its best. Our grounds—links we call them—are just near Madison. It's a great game in Scotland and England. Strange to say, I used to play with James and William Dunn 'on Blackheath thirty years ago, and now their sons are playing here at Shinnecock. We play with clubs, yes; mine were made by Morris, in England; he made my clubs thirty years ago. It's a very interesting game."

The Architects' Directory for 1894

We have received from Wm. T. Constock, the publisher of *Architecture and Building*, a copy of the neat and handy *Architects' Directory* for the current year. This little work, so far as we have been able to test it, is more complete and correct than any other publication in the same line. The information contained within its bright cover, and the excellent system by which it is arranged, makes it a valuable addition to the works of reference relating to the building trades.

Questions and Answers.

Correspondents who do not find answers to their communications in this paper must please refer to future issues.

To the Editor of THE RECORD AND GUIDE:

Please answer the following question in your next issue: What is the customary commission charged by brokers for the placing of a loan on bond and mortgage?

Answer.—It is customary to charge a commission of 1 per cent on the amount of the loan, but a statute of New York State provides for the payment of a commission of 50 cents on every hundred dollars. One-half of 1 per cent is therefore the commission that can be legally charged and collected for the placing of a loan. An agreement, verbal or in writing, to pay more than one-half of 1 per cent would not be of any assistance to the broker in the event of the borrower refusing to pay more than the legal commission.

REAL ESTATE.

To the Editor of THE RECORD AND GUIDE:

Suppose you own five lots fronting on Henry street, beginning at the corner of Atlantic street. Atlantic street being more desirable to build upon, could owner sell the lots fronting on Atlantic avenue, they being laid out on map, surveyed and recorded fronting on Henry street, by saying in deed 20 feet on Atlantic avenue running thence 80 or 100 feet deep parallel with Henry street; this is in case the 20 feet are sold separate? (Brooklyn.)

Answer.—Yes. The size of the plot owned is 80 by 100 feet and can be divided for sale in any way the owner desires.—LAW EDITOR.

RECEIVER'S POWERS, ETC.

To the Editor of THE RECORD AND GUIDE:

A firm engaged in the manufacture of brick is placed by the stockholders in the hands of a receiver. The assets are clay land and plant on same to manufacture brick, and stock on hand and bills receivable. (1) How long a time has he to close it out? and (2) what powers has the receiver to settle the matter? (3) If he runs the

business and applies to the court for an order to issue certificates, are they the first lien after the mortgages? (4) In case of foreclosure and sale, has he the power to buy in?

Answer.—(1) A reasonable time. (2) Such as are conferred upon him by the order by which he is appointed, and by the practice and usage of the court, or, if he is a receiver by statutory authority, such as are marked out by the statute. We have not the Statute of New Jersey at hand. (3) Receivers' certificates are, as a rule, expressly declared by the order of the court under which they are issued to be a first lien upon the entire property, income and franchises of the corporation. In such case they would take precedence of the mortgages. (4) If he is selling he can not bid for himself, but may buy in for the corporation of which he is receiver. If the sale is adverse he may bid.—LAW EDITOR.

CHATELAIN.

To the Editor of THE RECORD AND GUIDE:

As I am going to move will you kindly let me know in your next issue what disposition I can make of a desk in my office. The desk in question is a cheap one and belongs to a real estate broker who had desk-room in my place and owes me rent and borrowed money. The desk is locked and I have not seen the owner of it for about nine months.

Answer.—You can leave it behind you when you move, or store it on account of the owner, or take it with you. You would not run any great risk if you sold it for what it would bring and credited the owner with the proceeds. He has undoubtedly abandoned it.—LAW EDITOR.

MORTGAGE—INSURANCE.

To the Editor of THE RECORD AND GUIDE:

We hold a mortgage on a house, and wish to know can we compel the mortgagee to insure the building in a company selected by us. This house is insured now by two companies from Philadelphia of whose standing we know nothing.

Answer.—If there is the usual "insurance clause" in the mortgage you can; otherwise not.

AGENT'S COMMISSION.

To the Editor of THE RECORD AND GUIDE:

Bless my soul! What is your law editor about again? These replies on agent's commissions during the last six months have simply dumbfounded every real estate man who has read them. I have submitted the one in to-day's RECORD AND GUIDE to one Mr. B, who has had eighteen years' experience in renting, and to Mr. R, who has probably done more renting than any one man in his twenty-five years' experience. I wanted to test my own judgment and found it corroborated. The reply should have been:

"It is proper to charge $2\frac{1}{2}$ per cent on the amount of the first year's rent only, in leasing for a year and a half." To show you how absurd it would be to charge $2\frac{1}{2}$ per cent on the first year's rental and 1 per cent for the remainder of the term, let me give you some illustrations on the basis of a rent of \$2,000 per annum (for $1\frac{1}{2}$ years as in case named in THE RECORD AND GUIDE):

Example A.— $1\frac{1}{2}$ years' lease—To $2\frac{1}{2}$ per cent on 1 year at \$2,000 per annum.....\$50.00
To 1 per cent on $\frac{1}{2}$ year at \$2,000 per annum.... 10.00
Total.....\$60.00

Example B.—3 years' lease—To $2\frac{1}{2}$ per cent on 1 year at \$2,000 per annum..... 50.00
To 1 per cent on 2 years at \$2,000 per annum.... 40.00
Total.....\$90.00

Example C.— $2\frac{1}{2}$ years' lease—1 year at $2\frac{1}{2}$ per cent on \$2,000 per annum..... 50.00
 $1\frac{1}{2}$ years at 1 per cent on \$2,000 per annum.... 30.00
Total.....\$80.00

You will observe that the commission which would be paid under Example A for $1\frac{1}{2}$ years, by the rule laid down by your law editor would be \$60, and on 3 years, \$90. Now, you know, and we all know, that this charge is $2\frac{1}{2}$ per cent on the first year's rental on anything under 3 years to 1 per cent on the gross rental on any lease of 3 years or over. Now, see how your law editor's rule works:

Real Estate Exchange rule and rule in existence for fifty years in New York:

Example A.— $1\frac{1}{2}$ years' lease—To renting house at \$2,000 per annum for $1\frac{1}{2}$ years, commission $2\frac{1}{2}$ per cent on first year's rental of \$2,000.....\$50.00
Example B.—3 years' lease—To renting house for 3 years at \$2,000 per annum, 1 per cent on \$6,000.....\$60.00
Example C.—To renting at \$2,000 $2\frac{1}{2}$ years, $2\frac{1}{2}$ per cent on \$2,000.....\$50.00

Hence we see that, under your law editor's ruling, an agent will charge \$90 for a 3 years' lease at \$2,000, when the known rule (accepted by the courts) would only justify a charge of \$60; an agent will charge \$60 for $1\frac{1}{2}$ years' lease, when it should only be \$50, and \$80 on $2\frac{1}{2}$ years' lease when it should only be \$50. Regretting to bother you on this matter, I am, hastily, L. B.

Answer.—The query which appeared in THE RECORD AND GUIDE September 15th, was not strictly a "legal" query, but the inquirer sought information as to the "custom of the trade" among real estate agents. If the question was asked by a client of a lawyer: "I have leased a house for a year and a half—what commission am I entitled to?" The lawyer would answer: "The rate of commission is not regulated by statute. You are entitled to recover a commission in accordance with the 'custom' of real estate agents in such case." And then the lawyer would inquire, or direct his client to inquire, what was the "custom" and advise accordingly.

The query inadvertently upon was addressed to THE RECORD AND GUIDE by a Brooklyn agent. In order to answer it the law editor consulted the published "rates and terms for the sale and exchange and renting of property approved by the Brooklyn Real Estate Exchange, and found: "Rates for renting—For leasing city property one year, $2\frac{1}{2}$ per cent. For each succeeding year during term of lease, 1 per cent." He also inquired of one of the leading real estate agents of Brooklyn and learned that such was the "custom," and answered the query accordingly. The law editor likes his answers to be criticised; that he may correct an error if he makes one, or that if he is right he may satisfy the critic.

The law editor answering the query gave the Brooklyn "custom," our correspondent answers it according to that of New York.—LAW EDITOR.

BROKER'S COMMISSION.

To the Editor of THE RECORD AND GUIDE:

Will you kindly answer the following in next issue, if possible. A, the broker, procured B as a customer, who desired to purchase a dwelling. B mentioned to A that she thought a certain dwelling owned and occupied by C, a few doors from B, could be purchased, although not publicly for sale. A called on C, introduced himself as a broker, saying that B, who was A's customer, would like to buy, and asked for terms, C saying she would sell for \$10,500. A then called on B and told her the price, saying she would have to consult with her brother before purchasing. B and her brother called on C to look at house and B's brother, who was acting for B, told C he would give her \$10,000. B called on A in a few days, saying she and her brother had offered C \$10,000 and offer was under consideration. A called on C saying his customer would buy for \$10,000 and would call in a few days for decision. When A called on C for answer C declined to recognize A in the transaction because A was a stranger to C and that some friend of C told B about the house being for sale and she would not pay commission and would negotiate direct with B. Now, if a sale is consummated between B and C is A entitled to his commission for bringing customer, and could he collect from C?

Answer.—A cannot recover any commission from C for C never employed him. B employed him; he acted for B in the matter and

to B he must look for his compensation for services rendered.—LAW EDITOR.

LEASE—SUB-LETTING.

To the Editor of THE RECORD AND GUIDE:

Will you kindly give me the law on the following question: If a person signs a lease of a house with the clause in it, "that the party of the second part further covenants that she will not assign, let or underlet the whole or any part of the said premises," and she takes boarders or even rents rooms to lodgers, does this break the lease? One of my clients has notified his tenant, who has just moved into the house, and not even settled yet, to move out at once, as she has advertised two rooms to rent for boarders. Can he make her move? and has she broken her lease, either by advertising her rooms to rent, or if she does actually take boarders?

Answer.—Taking boarders or letting furnished rooms is not a violation of the covenant not to "assign, let or underlet the whole or any part of the said premises," and even if it were the landlord's notice to move amounts to nothing. For a violation of such a covenant the landlord cannot dispossess the tenant by summary proceedings. He must bring an action.—LAW EDITOR.

DIAGONAL STREET.

To the Editor of THE RECORD AND GUIDE:

Where the street front is not square with the lot lines, as on a diagonal street, can the owner of each house build his stoop, areas and railings at right angles with the street, or must he place them askew so as not to lap over the prolongation of the side line of his lot.

Answer.—He may build them at right angles with the street. Except in special instances, where the fee is in the city or in some previous grantor, the lot owner has the fee of the land to the middle of the street, at right angles to his front, and the public only has an easement therein, a right of way, etc.—LAW EDITOR.

Personal.

James G. Dimond was married on September 27th to Miss Juliette D. Farrington, of this city, the ceremony taking place at St. Francis Xavier's Church. The wedding trip will be westward as far as Chicago. Mr. Dimond will return to active business about October 4th.

John Livingston, of the firm of John Livingston & Son, returned from Europe on Tuesday last on the Majestic, after an absence of four months.

Minturn Post Collins returned from Europe last week on the Paris after spending three months traveling in England and on the Continent.

Realty is still slow of sale, although the transactions closed since Monday show a decided improvement on the business of last week. The continued purchase of West Side dwellings is the most encouraging feature of the present market, and it may be added that their sale has been more extensive than the reports indicate. Brokers have found buyers for several houses in addition to those announced as sold, but the particulars have been temporarily withheld. The latest investment by the Metropolitan Life Insurance Company is without significance as far as its effect on the general market is concerned. It is significant, however, as showing the probable wisdom of a rich corporation in protecting both the present and future value of its office property by acquiring the ownership of the adjoining block front on 23d street. The policy of the company is a costly one, but it will doubtless prove to be correct in time. It would, however, be interesting to know what the total real estate investment of the Metropolitan Life has been since the company decided to ignore established precedent and locate its building in the central section of the city. The company will buy no more property, it is said, on the authority of its president, John R. Hegeman, but the worthy president's statement must be taken *cum grano salis*, as it is an open secret that his ambition will never rest satisfied until the church property on Madison avenue and 24th street shall be added to the insurance company's possessions.

The following are the comparative tables for New York Conveyances, Mortgages and Projected Buildings for the corresponding weeks of 1893 and 1894.

Builder Wm. Raukin has secured a loan of \$325,000 from the Bank for Savings, at 4½ per cent interest, on the new Hotel Gerard, on West 44th street.

Taxes will be payable on and after Monday at Tax Receiver Austin's office in the Stewart building. Taxpayers who settle before the 1st of November will get a discount of 6 per cent, to be computed from the date of payment to December 1. A penalty of 1 per cent will be added to taxes remaining unpaid on the latter date, and a penalty of 7 per cent to those not paid by January 1. Taxes can be paid after securing tax bills by sending a check for the amount, but receipts will only be returned in cases where a stamped envelope is sent with the check.

The auction sale on Thursday, held at the Real Estate Exchange by Richard V. Harnett & Co., of property in the 12th Ward, owned by Michael H. Cashman, was successful in attracting a large attendance. There were nearly two hundred persons present, but among them were very few apparently who had put in an appearance with any intention of bidding. There were twenty-nine lots disposed of and two houses. The prices obtained were low ones in every instance. The auctioneers withdrew from sale thirteen lots on 188th street and three houses and lots on Wadsworth avenue. The property sold realized a total of \$74,100. On the same day Richard V. Harnett & Co. offered, at the conclusion of the Cashman sale, Nos. 524 to 542 West 133d street, ten single flats, on lots 17.6x99.11, but as there were no bidders it became necessary to announce the withdrawal of the property.

At the Broadway Salesroom on Wednesday the attendance was the largest of the present fall season. Many new faces were noticed, and there was more evidence of animation in the throng of brokers, operators and would-be investors than has been observed in several months. The property disposed of on that day brought full figures, and included a foreclosure sale of Nos. 737 and 739 9th avenue and a sale in partition of No. 1 and Nos. 85 and 87 East 113th street. On Tuesday D. P. Ingraham & Co. announced the withdrawal of No. 247 West 70th street, and on the following day Smyth & Ryan withdrew from sale two lots on the south side of 116th street, 125 feet east of Lenox avenue, and William Kennedy adjourned to October 10th the sale of Nos. 55 and 57 East 76th street. On Thursday James L. Wells adjourned to October 11th the sale of No. 271 Lenox avenue, and Frank Yeran the sale of property on Bainbridge avenue, near Suburban street, until the same date. D. P. Ingraham & Co. announced a postponement until October 23d of the sale of Nos. 111 to 126 East 60th street.

On Wednesday next, at the New York Real Estate Salesroom, No. 111 Broadway, Smyth & Ryan will sell at auction, to close an estate, two lots, 25x100 each, on the west corner of Bender street (8th avenue) and Cross place; a plot 61.57x42.33x50x82.6 on Jerome avenue, 208.64 north of Bender street, in the 24th Ward, of this city, and two choice lots, 25x100 each, on the northwest corner of Becker avenue and Catharine street, in South Mt. Vernon.

On Thursday next, October 4th, at the Real Estate Exchange Auction Room, 59 to 65 Liberty street, Richard V. Harnett & Co. will sell at auction the four-story and basement brownstone dwelling, 20x58 and extension x100x8½, No. 10 West 87th street. The house is modern in every respect, is handsomely trimmed in hardwoods, and the street is restricted to private dwellings.

MT. VERNON LOT SALE.

On Saturday next, October 6th, at 2 P. M., George W. Bard, auctioneer, will sell on the premises at Mt. Vernon, 343 choice lots in the 1st Ward, on Fulton avenue, Columbus avenue and 6th street. The property is well located in a settled neighborhood, surrounded by churches, schools, fine residences, stores, etc., and has all the public improvements. Maps, passes, etc., may be obtained on application to Mr. Bard at Mt. Vernon or to the attorney, Chas. H. Lott, at No. 206 Broadway, this city.

Gossip of the Week.

SOUTH OF 59TH STREET.

Geo. R. Read has sold, for John T. Williams to William H. Catlin, the seven-story brick and iron mercantile building, 50x80x87, Nos. 152 and 154 Franklin street, for about \$145,000. The building is rented to one firm for over \$10,000 per year.

Geo. R. Read has purchased for the Metropolitan Life Insurance Co. the property owned by the National Academy of Design, on the northwest corner of 23d street and 4th avenue, for a little less than \$600,000. It comprises the building occupied by the Academy, on the corner, and two dwellings, Nos. 19 and 51 East, adjoining on the street. The dimensions of the land are 120x98.9. The Metropolitan Life took title on Thursday from William H. Daily to Nos. 45 and 47 East 23d street, and in a few days the deed will pass, giving the company the ownership of No. 13 East, owned by the McCurdy estate. The conveyance of the latter parcel will complete the purchases of the company—all made through Geo. R. Read by which it has acquired the entire frontage on the north side of 23d street, from Madison to 4th avenues. It is not contemplated at present to further enlarge the new building on the Madison avenue corner. The contract of sale of the Academy property provides that title shall not pass until the 1st of May next, but there is every likelihood that the building will continue to be occupied after that date by the present owners as lessees.

Hoffman Bros. have sold for the Watkins estate to L. Sachs & Bro., for about \$130,000, the southwest corner of Spring and Mercer streets, a plot, 71x76, with old buildings. The purchasers have bought for investment and at present have no intention of improving the property, which it is said now rents at \$8,000 per annum.

Charles Martin has sold for James McCune to Andrew A. Walters the five-story double tenement, 25x75x98.9, No. 435 West 34th street, for \$32,000.

Daniel Cunningham has sold for Harvey S. Johnston to James McCune the five-story double tenement, No. 317 West 49th street, lot 25x100.5, for about \$32,000.

Simon Feist has sold No. 354 West 56th street, south side, 70 feet east of 9th avenue, a five-story flat, on lot 30x100.5, and Nos. 856 and 858 9th avenue, near 56th street, two five-story tenements, on plot 51.1x70, to Dr. M. J. Burstein, who pays for the former property \$65,000 and for the latter \$70,000, giving as consideration the house No. 124 Cherry street, a parcel of city lots and some mortgages. Mr. Feist has resold the Cherry street property to a Mr. Pettigrew.

George Jonas has negotiated a trade for John H. Struck by which he agrees to sell to William Cumming, Jr., and another the two five-story brick flats, Nos. 352 and 354 West 18th street, lots 25 x 92 each, for \$75,000, taking in exchange two lots, 50.6x100, on the east side of 5th avenue, 50 feet north of 111th street, at a valuation of \$30,000.

The trustees of Columbia College will take title on Monday to the old Bloomingdale Asylum property, north of 113th street and west of Amsterdam avenue. At the time the sale was made it was announced that possession would not be given until January, 1895. The property on 49th and 50th streets, 4th and Madison avenues, now occupied by the college buildings, will be sold as a whole, if possible, and if that plan should not prove feasible the parcels will be disposed of separately.

It transpires that Broker William M. Newman negotiated the sale of the Mystic Apartment House, on 39th street, opposite the Casino, noted in our issue of the 15th inst. The consideration was \$300,000, Wm. Frank Hall, the seller, taking in exchange from the buyers, Chas. Warren Parker and S. Weber Parker, an undivided half interest in 700 acres of land at Mamaronock, N. Y., known as the Alton Wood Park and Stock Farm, at \$1,500 per acre. Mr. Newman also negotiated for the Aronsons to S. W. Parker and Wm. Frank Hall a large interest in the Casino Co. and Theatre. The two latter gentlemen will have control of the finances, and the Aronsons will secure possession of the Casino on or about November 20th next, after the entire interior has undergone a transformation. It will be remembered that Mr. Newman sold the Manhattan Opera House for Oscar Hammerstein to Koster & Bial about eighteen months ago.

NORTH OF 59TH STREET.

George R. Read has sold for ex-Judge Charles Donohue to John Jacob Astor No. 7 East 65th street, a four-story stone front dwelling, 25x65x100.5. The property adjoins the Langdon dwelling, on that street, owned by Mr. Astor, and with the lots on the northeast corner of 5th avenue and 65th street, on which the new Astor residence is being erected, gives him a plot 125x200. The street buildings will eventually be razed and the land added to the site of the new building. Mr. Astor's total investment in the corner and adjoining property is \$715,000. His residence will cost over \$1,000,000.

Builder James B. Gillie has disposed of the last four of his row of eleven three-story stone front dwellings, recently completed, on 88th street, between Columbus and Amsterdam avenues. The dimensions of each are 18x52x100.8, and they have been sold at a uniform price of \$21,000, or a shade below that figure. No. 112 West has been bought by Arthur McAlenau, through Broker P. J. Cuskley; No. 140 West, by Mrs. Loretta Sanders, through Stadler & Smith; and Nos. 136 and 138 West, by Herbert B. Turner, of Turner, McClure & Rolston, through W. L. Power. The last two houses were purchased for the occupancy of the buyer's married daughters, to each of whom one will be presented.

King & Hutchinson have sold for Mr. Gillie No. 134 West 88th street, one of three three-story stone front houses, 18x52x100.8, upon which work has yet to be begun. The purchaser, W. H. McLeod, will pay the builder's usual price, about \$21,000, and secure possession of the completed house on or before the 1st of April next.

W. L. Power has sold for the assignee of John G. Pragne No. 102 West 87th street, a four-story stone front dwelling, on lot 20x100.8, to M. Beckhard for \$27,000. The house was sold some years ago for \$35,000. The same broker has sold for D. Willis James to Mrs. A. L. Wyant the four-story brick dwelling No. 141 West 85th street.

Livingston & Budd have sold for Henry A. Reukauff to a Mr. Cregan the four-story dwelling No. 148 West 74th street.

Joseph E. Steckler has sold for Michael Brennan No. 17 West 70th street, a four-story dwelling, on lot 25x102.2, to L. Heinzheimer for \$50,000. This completes the sale of the entire row built by Mr. Brennan.

Max Simon has sold for William H. Hall to A. Weyer the five-story double flat, 25x77x100.11, No. 65 West 102d street, for \$25,000, and for the same owner to H. Ettinger, No. 80 West 103d street, a five-story double flat, 25x87x100.11, for \$28,000.

The East River Mill & Lumber Company has sold the three-story dwelling, No. 357 West 119th street, 19x50x100.11, between Manhattan avenue and Morningside Park, to William Bartels for \$15,500. This is one of a row built by Richard E. Johnston.

Builder Harry Chaffee has sold the four-story stone front dwelling, No. 219 West 70th street, 15x60x100.5, for \$26,000, to an investor who is now abroad and for whom the house will be rented. The sale was negotiated through the up-town office of J. Romaine Brown & Co.

Daniel B. Friedman has purchased from Potter & Bro. the plot, 150x160, on the east side of Sherman avenue, 100 feet south of Hawthorne street. The lots are not far from the junction of the New Speedway and the River Boulevard.

Jenkins Bros. have sold the five-story flat, Nos. 345 and 347 Manhattan avenue, 37x65x75, for \$39,000 to Chas. H. Roosevelt, the latter to give in part payment his residence, stable and grounds at Pelham Manor, valued at \$15,000. We hear that H. H. Bliss negotiated the exchange.

Duff & Conger have sold for Potter & Bro. three lots on the south side of 103d street, 95 feet east of Manhattan avenue, for \$30,000 to Andrew J. Kerwin, for immediate improvement. This leaves only three lots left of the purchase made by the Messrs. Potter four months ago, the corner lots having recently been sold, also for improvement.

P. A. Geoghegan & Co. have sold for George A. Fisher the three-story stone front dwelling, No. 309 West 104th street, the last of a row of eleven recently built, for \$22,500.

Charles L. Harrell, of Harrell & Buchanan, has sold for Builder William J. Murphy one of his row of three-story dwellings on the west side of Edgecombe avenue, north of 145th street, now being completed.

Builder George Wallace has sold the most westerly but one of his row of six new four-and-a-half story stone front dwellings on the south side of 78th street, west of West End avenue, to a Mr. Belden for \$28,500.

Builder P. M. Stewart's sale to Mrs. W. Fox, reported last week, was of the dwelling No. 325 West 75th street, not 77th street, as erroneously stated by the broker.

NORTH SIDE.

Kaepfel & Brooker have sold for Frank P. Lockwood two cottages, on lot 16x115, on the east side of Bathgate avenue, 150 feet south of 182d street, to Malachi Kelly for about \$8,000.

WESTCHESTER COUNTY.

Jenkins & Brown have sold to Edson S. Lott, of New York, a two-story frame cottage and lot, 59x150, in Residence Park, New Rochelle, for \$8,500.

LEASES.

Seton & Wissmann have rented No. 37 East 69th street, furnished, for the season, to Albert Blum, and No. 50 West 83d street, unfurnished, to D. A. Shaw, to October 1, 1895.

R. L. Julian & Co. have leased for Mrs. Dore Lyon to Dr. P. Cleland and for a sanitarium, the dwelling, 20x70x90, No. 26 Edgcomb avenue, northeast corner of 135th street.

Tim & Co. have leased for John Jacob Astor the four-story 25-foot dwelling No. 18 West 33d street, to Mrs. Carlyn B. Wood, for three years at \$3,000 per annum.

De Blois, Hunter & Eldridge have rented No. 413 5th avenue for Mrs. Mary Lewis to Albert R. Shattuck, unfurnished, for three years; No. 48 West 20th street for Mrs. F. Stanfield, to Wm. J. C. Clifford for a similar term; No. 246 Lexington avenue, furnished, to Schnyler L. Parsons for the winter, and No. 133 East 38th street, unfurnished, for three years, for Dr. Moore to Dr. A. E. Meyer.

MERCANTILE.—Carbondale, Pa.—The proprietors of the Carbondale *Leader* will erect a three-story brick and iron building for the exclusive use of the newspaper.

Trade Notes.

YORK METAL LATH.

In the almost universal tendency towards more enduring, substantial and fire-proof construction metal lathing has more and more grown in use among the better class of architects, builders and owners. Its increased use has created demands upon the manufacturers for forms adaptable not only to wooden framing and studding, but to iron studding as well. On this point Messrs. Schratwieser & Moss, proprietors of the York Metal Lath Works, which are at Nos. 110 to 111 Navy street, Brooklyn, recently said: "In addition to applying our lath on wood, we are now constructing partitions entirely of iron; that is to say, the furring and studding consist of angle, channel and tee iron, with York Metal Lath laced to same. This class of work we plaster on both sides of partition, making a solid slab of iron and plaster. It is manifest that it would be almost impossible to injure such a partition by fire. We have recently set up at our works several different kinds of partitions, some on wood and some on iron, as object lessons on what can be accomplished with York Metal Lath, and to which we invite the attention of architects, builders and others interested in sound construction. In addition to this we are now constructing what we call solid partitions, that are especially adapted for air shafts, light shafts, dumb-waiter and elevator shafts in flats and office buildings and stores, where floor space is valuable and economy and fire protection are necessary. These partitions can be put in for about half the cost of brick walls and will save 80 per cent of the space. They can be built 1½, 2 or 3 inches thick. In plastering this class of work we always recommend a good plaster or gauged mortar as it makes the strongest wall. All of these partitions have been approved by the building departments of New York and Brooklyn, and are in use in hundreds of buildings, including the Postal Telegraph building, Broadway and Warren street; the Kuhn, Loch & Co. building, 27 and 29 Pine street; the Hanover Fire Insurance Co. building, 32 and 31 Pine street; seven public schools; four private residences at 75th street and Riverside Drive; the Hotel Marle Antoinette; Hotel Empire, and Bloomingdales' new store, in New York; the Seney Hospital; Bijou Theatre; Flatbush Hospital, and Hall of Records in Brooklyn.

BLUESTONE.

North River Bluestone is a standard article in high-class construction in this city, and for coping, flagging, sills, lintels, sidewalks, area walls, water tables, etc. James W. Moran is one of the oldest and most reliable dealers in this valuable class of stones, and has them in every dimension necessary to the trade at all times. He makes a specialty of furnishing and setting flagging and in this is excelled by no one. Mr. Moran's yards are at 100th street and East River, an address easy to remember.

Harry McNally, the well-known mason and builder, commenced work on Monday erecting a six-story brick and stone piano action factory at 134th street and Brook avenue for G. F. Abendschein. It will cover a plot 50x100. Mr. McNally, with Mr. D. P. Chesbro, is putting the finishing touches to a handsome seven-story and basement store which they built at No. 131 Liberty street. Mr. McNally's office is in the United Charities' Building, corner of 22d street and 4th avenue.

A. Silverson, of No. 257 Henry street, the well-known and successful carpenter and builder, has recently completed a six-story and basement store, on the southeast corner of Canal and Orchard streets, for B. Galewski, and a five-story and basement tenement, at No. 44 James street, for John F. Farrell, from plans by Peter Herter. Mr. Silverson is now erecting a four-story and basement livery stable, at Nos. 503 and 505 East 82d street, with accommodations for about 150 horses, for which Fred. Ebeling drew the plans. Leon Sobel is the owner. Mr. Silverson gives personal attention to all contracts intrusted to him and will cheerfully estimate on any work in his line.

"STEAM."

This is the title of a new book, published by the Babcock & Wilcox Co., of this city and London. Babcock & Wilcox boilers are in use all over the world now, wherever steam heating and steam power are wanted, and one does not need to go far to see them in operation. But as a beginning we advise anyone and everyone who is interested in the question of steam, either for power or heating—either to operate a cable or electric railroad or a sugar refinery or a coal mine, or to heat a hotel, office building or private residence, or for any other purpose, to read the Babcock & Wilcox Company's book on "Steam." This is its twenty-eighth edition, and it is a handsomely illustrated cloth-bound volume of nearly two hundred pages, sixty-five of which contain references to the thousands of boilers the company has heretofore supplied. Besides the English edition, there are editions in German and French. The offices of the Babcock & Wilcox Co. in this city are at No. 29 Cortlandt street.

The Stewart Ceramic Co., whose offices are at 312 Pearl street, were awarded the three highest medals at the Columbian Exposition at Chicago for ceramic bath-tubs, sinks and laundry tubs. Builders ought to investigate these goods before deciding on their selections.

The essentials to a good stable, private or public, include above all things, good fittings—feed boxes, hay racks, stall guards, gutters, cesspools, etc. Such things Tom Moore has in their perfection. He has offices in New York and Brooklyn—in the *World* building in New York, and in the Gates building, at Broadway and Gates avenue, in Brooklyn.

The contracts for tiling the new St. Luke's Hospital and the Coffee Exchange have been awarded to the Armstrong Tile Setting Co., of No. 126 West 23d street, who have executed many contracts satisfactorily.

The Manhattan Cornice and Roofing Works, of 1st avenue and 61st street, have recently completed contracts for roofing, cornice and skylight work for Chas. Stegmayer on flats at 92d street, near 3d avenue, and 84th street, near 1st avenue; for David Richey's two flats on 98th street, near Columbus avenue, and Murray Bros., factory and dwelling on East 71st street. They also have contracts for Smith & Johnson's new building at No. 71 4th avenue, and for Lindsay & Johnson, at No. 256 West 23d street. The proprietors of the Manhattan Cornice and Roofing Works, Messrs. W. A. Werner and P. Kullman, are both practical and experienced workers and they give personal and prompt attention to all orders for galvanized iron and copper cornices and skylights, as well as for tin, slate, tile and metal roofing.

Special Notices.

F. W. Belmont & Co. is the name of a new real estate brokerage and agency firm that has established new and handsome offices at No. 98 5th avenue, on the corner of 15th street. Mr. Belmont has been an active trader in the real estate market in this city for a number of years, and is therefore well acquainted with values and the tendency of special neighborhoods. Besides Mr. Belmont, H. E. Hawley, L. M. Sessions and Arthur Belmont are members of the firm.

The Bond and Mortgage Guarantee Company has declared a semi-annual dividend of 2½ per cent, payable October 1st.

H. J. Hume, real estate broker and auctioneer, has been proposed for membership in the Real Estate Exchange and Auction Room. He has been engaged in the real estate business for about eight years and handles all kinds of improved and unimproved property. Mr. Hume's office is at No. 253 Broadway, room 122, Postal Telegraph Building, where he will be glad to meet owners having property to sell, and intending purchasers. For the former he will try and get good prices and for the latter desirable parcels.

Edgar Jordan, real estate and insurance broker, of No. 257 East 72d street, near 2d avenue, makes a specialty of managing estates and collecting rents in all parts of the city. An increasing business testifies to his success, due to perseverance and satisfactory returns to owners, to whom he can refer.

MORTGAGES.

1. *NOTE.*—The arrangement of this list is as follows:
The first name is that of the mortgagor, the next that
of the mortgagee. The description of the property
then follows, then the date of the mortgage, the time
for which it was given, and the amount. The general
dates used as headings are the dates when the mort-
gage was handed into the Register's office to be re-
corded.

Whenever the letters "P. M." occur, preceded by the
name of a street, in these lists of mortgages, they mean
that it is a Purchase Money Mortgage, and for fuller
particulars see the list of transfers under the corre-
sponding date. Whenever the rate is not given, read
as 6 per cent.

Mortgages against 23d and 24th Ward properties
will be found all together at foot of this list.

JUDGMENTS.

In these lists of judgments the names alphabetically arranged, and which are first on each line, are those of the judgment debtor. The letter (n) means judgment for deficiency. (s) means not summoned. (f) signifies that the first name is fictitious, real name being unknown. Judgments entered during the week, and satisfied before day of publication, do not appear in this column, but in list of Satisfied Judgments.

Editor of THE RECORD AND GUIDE:

The lien filed against our premises, No. 612 East 83d street, by J Wardelmann, as published in THE RECORD AND GUIDE of last week, is an outrage. It is no credit to a man to take a contract and not fulfill it and then put on him for full amount, notwithstanding that we have paid all bills for material and labor. We shall have building finished and bond him.

REVIEW AND RECORD.

BROOKLYN, SEPTEMBER 29, 1894.

WE hear but little in these days about the consolidation question, and yet it is slated for decisive consideration in the forthcoming election. Doubtless this is because our friends, the politicians, are just now most deeply engrossed with the question of candidates. After the nominations shall all have been made, however, the public will hear more or less about "principles" and platform dogmatism, and among these we may confidently look forward this fall to a more or less intelligent discussion of this question. However Brooklyn may view the matter, it must not be taken for granted that New York will give it unqualified approval. Indeed, we think a great deal of missionary work will need to be done about it if a favorable vote upon the question is desired; and the sooner it is taken in hand the better it will be for Brooklyn.

THERE is one feature of this Greater New York question which our Brooklyn real estate friends cannot too often weave into their arguments. It is: that within the accessible limits of the present metropolis there is no land available for independent homes for the industrial and middle classes. An eminently worthy and numerically considerable part of the day population of New York city is made up of this class—the clerks, bookkeepers, salesmen, mechanics and other operatives in its hives of industry—by many of whom a modest cottage or small independent dwelling is much preferred over the communal style of living in flats, to which people of their class in New York city are now practically restricted. Brooklyn can still supply to thousands of these families just what they need in the way of homes— independent homes, with all the conveniences, costing from \$2,500 up, and renting as low as \$25 per month. Then there is Brooklyn's system of two-family houses, in which small families may find all the accommodation they want, with substantial independence, at rent as low as \$10 per month. A city of metropolitan aspirations ought not to require the import and element of its effective day population, above specified, to find its homes on alien soil, and since New York has not the soil available for such homes, it can do no better than to extend its limits to take in all there is in Brooklyn. New York will be the gainer also in having thus added to its electoral constituency a strong intellectual and moral element that will work for better government and thus counteract the politics of the slums.

THE recent heavy rains have given a new life to the parched verdure, and Brooklyn's lawns and grassy areas have taken on a spring-like aspect. This is fortunate in many ways, for it promises an exceptionally pleasant fall season. Indian Summer is coming on, and when it begins with a sturdy growth of new grass and bright shrubbery, there is promise of a long continuance of its balmy days and a picturesque transition through autumn's brilliant hues into the sober colors of winter. So much of Brooklyn is rural in its aspect that these facts are of material importance to her. An owner or agent goes without hope to show a suburban property when all around the trees are gasping with parched throats and prematurely withered leaves, and when every footprint on the stunted grass raises clouds of powdery dust. Such was the condition during July and August. But

when nature smiles with renewed youth, when the sward is a thick green carpet, when the foliage in the woods is bright and dense and strong, and when sunny leaves are turning fast to scarlet, then is the time to show off suburban properties. That's the way it is now all around about Brooklyn. During the next ten weeks there ought to be a good business done in suburban properties in Brooklyn.

Notes Gathered Here and There.

At the meeting of the Board of Aldermen on Monday, a remonstrance was received from the property-owners on 17th street, between 3d avenue and Gowanus Bay, against the proposed opening of that thoroughfare between the points named.

Taxpayers and residents on the line of Stayvesant avenue, between Broadway and Fulton street, sent a communication stating that there were rumors that application was about to be made to the Common Council for a franchise to build and operate a surface trolley railroad on that avenue. If such an application were made, the taxpayers desired to be heard in opposition.

Property owners on Grand avenue, between Putnam and Gates avenues, petitioned that that thoroughfare be repaired with asphalt, at a cost not to exceed \$950.

President Lott, of the Flatbush Water Company, has completed plans for the laying out of a park on the grounds of the company. The park will face on Avenue E, and extend from Brooklyn to Albany avenue. This work is in accordance with the terms of the sale of the land to the water company by the Germania Real Estate Co., and will afford a handsome pleasure ground, as the park will be free to the public.

Residents of the 29th Ward are complaining about the condition of the streets in that part of the city. They claim that it is impossible to drive along some of the thoroughfares, as they are full of holes or the mud is so thick that it is hard work for a horse to draw a carriage through it. They claim that the City Works Department should spend some money in the ward, as before annexation there were three highway commissioners, receiving \$500 a year each, and they had an allowance of \$10,000 to keep the streets in condition. There has not been a laborer seen on the streets of the 29th Ward since annexation.

Chief Judge Clement, of the Brooklyn City Court, handed down decision in the application of the heirs of the late Edward H. Litchfield for an injunction restraining the city from selling their lands for arrears in taxes, amounting to \$2,009,551.60, on Thursday. Judge Clement says that the injunction shall be issued provided the plaintiffs pay to the city \$250,000, representing the arrears due on the property since 1883.

PROPOSALS FOR CITY WORK.

Sealed proposals will be received at the Department of City Work, until Tuesday, October 2d, at 12 M., for repaving Dean street, from Nevins street to the granite pavement now laid on 4th avenue, with asphalt; also for constructing sewer in Map N, District 29, 57th street, between 1st and 2d avenues. Until Wednesday, October 3d, at 12 M., for grading and paving 40th street, between 5th and 6th

avenues, with cobblestone; also for grading and paving 40th street, between 5th and 6th avenues, with Belgian blocks, old or new. Until Thursday, October 4th, at 12 M., for constructing sewer in Map O, District 37, Central avenue, between George and Noll streets.

MORTGAGES.

NOTE.—The arrangement of this list is as follows: The first name is that of the mortgagor, the next that of the mortgagee. The description of the property then follows, then the date of the mortgage, the time for which it was given, and the amount. The general dates used as headings are the dates when the mortgage was handed into the Register's office to be recorded.

Whenever the letters "P. M." occur, preceded by the name of a street, in these lists of mortgages, they mean that it is a Purchase Money Mortgage, and for fuller particulars see the list of transfers under the corresponding date. Whenever the rate is not given, read as 6 per cent.

JUDGMENTS.

In these lists of judgments the names alphabetically arranged, and which are first on each line, are those of the judgment debtor. The letter (D) means judgment for deficiency. (C) means not satisfied. (S) signifies that the first name is delinquent, real name being unknown. Judgments entered during the week, and satisfied before day of publication, do not appear in this column, but in list of satisfied judgments.

BUILDING MATERIAL MARKET.
NEW YORK.

BRICKS.—Variations on the local market continue of a moderate and unimportant character, and, indeed, so far as prices are concerned, there are no changes at all, the general range standing precisely the same as for several weeks past. In the majority of cases, however, buyers refuse to pay the top rate, because they want something cheap, and continue to find a remarkably good run of quality at about \$1 a 4.25 per M. The one gain in the position since our last is the disappearance of the large unsold accumulation about at the depot, and the sufficiently close sale to additional arrivals to keep the number of unsold barge loads comparatively low. A very large percentage of the stock taken has passed directly into hands of consumers, although in a few instances dealers have again been found willing to run a cargo now and to stack for use at some distant period. For pales the demand is irregular, and open market offerings would with difficulty be placed except at low figures. From all evidences in hand the tapering off of brick making for the season is becoming more decided, and it is believed that with the end of this week operations will be suspended at a great many yards. Some, of course, will keep on until frost puts a quietus upon further production, but we find it a pretty general opinion here that if every maker along the river shuts down at once there will be supply enough on hand to last until the commencement of next season. No doubt seems to be entertained that this year's wintered supplies will probably be as good in average as ever known.

GLASS.—So far as business is concerned the market continues slow and unsatisfactory. Consumption is fuller than it was a month or so ago, but is readily enough met from the supplies in hands of jobbers and retailers, and not much attention is given to first-hand offerings. Buyers entertain no fears whatever in regard to supplies, as the offerings of both domestic and foreign goods are on the increase and prices are so demoralized as to make quotations little better than nominal. Probably local holders are not at the moment prepared to name lower figures in a jobbing way, but from first hands the offerings have been more direct, and 85 and 20 and even 90 per cent discount is said to have been named on large invoices.

LATH.—Very little change can be found in tenor of current reports. Moderate arrivals during most of the week have been of some advantage to the market, because receivers were spared the necessity of forcing a supply for sale, but even as it was, the local call did not altogether provide for stock and it required some search around among out-of-town custom to place the goods. There seems to be some uncertainty regarding the prospect for shipments, but hardly thought likely that manufacturers will find attraction in present rates to induce them to forward ward anything beyond what they are compelled to get out of the way, or may find it advisable to convert into cash. At the close about five million lath have come in together, but about all previously sold mostly outside the city, and some as high as \$1.80 a 1.85 per M.

LIME.—An open competitive market and a slow indifferent demand tend to keep affairs in an irregular condition, and there is again to be found quite decided discrepancies in statements regarding the character of trading, and the prices obtained for goods. The general impression given, however, is that demand lacks any special measure of vitality just now, and beyond getting enough for a working assortment dealers feel no great interest in supplies. We make no change in quotations this week, the finishing grade showing greatest uniformity on price, while on common, over which selling competition is greatest, the range is comparatively wide. The lowest is 70c., and that will buy St. John stock.

LUMBER.—In matter of distribution conditions remain in fair shape, and there has apparently been no loss of ground during the week. Business, of course, is not up to the average for this time of the year, but there has been no calculation upon such volume, and dealers have made up their minds to feel satisfied with what they can secure during the balance of the year, and to hope for more decided gain when preparations for late winter and spring consumption becomes necessary. Customers do not have to shop about much for assortments or to wait for deliveries, as most dealers are prepared to satisfy all wants promptly, and a

great many of them are getting in and storing considerable parcels picked up when bargains presented themselves.

In a wholesale way, a large percentage of the business is still principally the results of special efforts on the part of sellers, the direct open demand proving small, because sellers entertain no fear, apparently, in regard to ability to obtain supplies at about old cost. Increasing success, however, attends the effort to secure trade, and it is fair to record, in addition to wholesale deals in several of the staple lines of stock, with additional amounts still pending, that result has an influence to steady values previously somewhat shaky, but no pronounced advance has taken place. The increase in export demand on South American orders, to which we referred some few weeks ago, is taking out quite a bunch of stock, and will probably want more, especially for River Plate.

Eastern Spruce seems to be treated about as indifferently as ever by the average buyer, and in some cases, too, where appearances would seem to suggest an addition to yard supplies. Receivers, however, have had an experience for some weeks that leads them to hope that no ordinary run of randoms will come along, and it is only a very few who can secure much in the way of negotiation on specials. Values naturally remain easy and unsatisfactory. Piling remains about steady, and quite a large amount that has shown up in this month's arrival was fully engaged and went directly into consumers' hands. State spruce is scarce and firm and the West Virginia production fairly steady, in view of the very good general control exerted over the production and absence of offerings until goods are wanted.

Hemlock retains about former general features, the tendency of the market being toward improvement, if anything. Buyers do not act as though they were laboring under any apprehension in regard to supplies or marked addition to cost, but seem to feel convinced that they have nothing to gain by waiting, and when opportunity for negotiating convenient deliveries is presented they go ahead and close some very fair deals, having been made on both local and out of town account.

Carolina Pine has remained in a somewhat unsettled condition, but the tendency, if anything, seems to be toward improvement. Manufacturers have been "getting together" of late and shaping matters for greater uniformity of action, and the chances are that price lists will be more closely adhered to in the future.

White Pine remains in a somewhat uncertain position. There are many buyers who adhere to the notion that the removal of the duty should be reflected in reduced line of valuations, making no allowance for previous extremely low rates, which probably fully discounted tariff revision, and in view of such opinion, demand hesitates. Offerings, however, do not appear to be pressed seriously, and it is asserted by generally well-posted agents that manufacturers have no idea of urging their product at present.

Yellow Pine cannot be credited with getting any special increase of direct natural demand, but sellers who carefully canvass succeed in picking up a greater number of orders. There are also indications at hand of a tendency among manufacturers to formulate methods through which protective agreements can be perfected and the business brought into healthier condition than has for some time prevailed.

Hardwoods continue in very good form, and the tendency of the market is considered promising. Poplar is irregular, some operators claiming ability to obtain an advance of 50c. a \$1 over the summer rates, while others assert that on average quality there is no gain as yet established, and higher figures can only be made on car lots of special selection. Most accounts agree that the supply of poplar logs is small. Cypress is steadily held, and receivers seem to have an idea that they are steadily getting a foothold that will give them an excellent market when general business revives. Oak is holding its own, and red birch will be wanted. On export account there are a fair number of dealings and a pretty full assortment picked out.

GENERAL LUMBER NOTES.

STATE.

The Albany market is reported by *Argus* as follows:

The local trade in white pine lumber was fairly active last week, with continued slight improvement over the late very dull period. Prices and freights are about unchanged. Receipts are still light, la spruce and hemlock the situation has not altered any since a week ago. Current conditions in all large lumber markets indicate that the demand in the aggregate is probably enlarging while prices are low.

THE WEST.

The Northwestern *Lumberman* as follows:

It is evident that Canadian lumber is beginning to cut more of a figure in Eastern markets, on account of the abrogation of the tariff, than some expected so soon after that event. Considerable shipments are coming out of the Ottawa district, and there is special activity at Oswego. The dealers at Tonawanda and Buffalo also begin to feel the whiff of the breeze that is coming, though they are loudly whistling against the wind. Discussion of the possibly impending Canadian influx is likewise rife in Saginaw Valley. It is evident that the volume of Canadian lumber moving into the States has already increased in a noticeable degree, and that the movement is likely to enlarge as time passes. The Western operators look on this as men on one continent observe a pestilence on another, as an evil afar off and not likely to bridge the intervening space—not for a long time in any event. But competition and low prices in the East means a bar to a good deal of Western lumber that would otherwise go there. The pine dealers in all the lake region will have to meet this Canadian competition, and they may as well brace their fortitude for the trial. The effect will be the more seriously felt within a year or two. After that supply and demand will get settled to new conditions and the diminishing supply in the States will help to that end.

On the Chicago market prices have been well maintained, and some commission men are confident that the figures will be advanced before long. Several cargoes have lately arrived from Bay City, Mich., consisting mainly of piece stuff and

RECENT events have shown that the time is past for getting up scares in the stock market. When things are on the mend as they now undoubtedly are, there is a very good reason indeed for holding on to securities, which must inevitably profit in proportion as business enlarges or improves. This the late bears are finding out to their cost. Thanks to their exertions, prices are taking an upward direction. The movement is purely speculative, however, because, while it is impossible to force holders to part with stocks at prices prevailing for some time, the outside buying is very small. Professional shorts can congratulate themselves that this is so, because if there was a combination of stubborn holders and a new lot of buying in commission houses, the advance would be much more rapid than it is. For the same reason the dimensions of the advance just begun will be moderate. Stocks only discount the improvement made from time to time in the properties which they represent, and while this is the best kind of a movement for permanence that can be had, it is slow and affects the list irregularly. The August and September records of railroad earnings afford considerable encouragement to the holders of railroad securities, and are likely to cause buying of low-priced bonds, particularly of properties that have been able to keep out of receivers' hands up to this time. It is to be regretted that so little progress is being made toward restoring bankrupt properties to good standing. This is due to a want of grasp of what is necessary. The suggestion of the government directors of Union Pacific is a case in point. It throws the junior securities into the worst position they could be in, and therefore excites opposition. Nothing could be more crude than to base reorganization on fixed charges limited to net earnings in a year of unparalleled losses, especially in proposing to give all such net earnings to the prior bonds. This was the fault with the defunct Atchison plan, and is apparent in the present Reading plan. These plans suggest that their makers were either too incompetent or too lazy to take up and carefully consider all the facts in the case; to secure concessions here or there as the result of the investigation might warrant, as was done in the case of the Richmond Terminal, and found the easiest way to get rid of a burdensome task was to throw it upon shoulders least able to resent its imposition. This idea is utterly unscientific and will not do; until another is adopted reorganizations will have to wait. Trading circles are holding their own, which cannot be called unsatisfactory, and there appear here and there rehabilitations and new combinations which prove that things are better below the surface than upon it.

ENGLAND and France manage very nicely to maintain a condition of active diplomatic antagonism, the sparring taking place in a very large ring. It began in Egypt—if it may be said to have begun at any period later than the time of William the Norman—was carried to Tonquin, thence to Madagascar, ran over to Equatorial Africa, Siam and East Africa. The combatants have now got to Madagascar again. Where the fighting will be next it is hard to say, but it is not probable that anything more murderous than ink and paper will be the weapons employed now in this everlasting duel. Newspaper correspondents have now the unfortunate condition of the health of the Czar of Russia to work with for making new type-complications between the various nations of Europe, the only result of which will be some speculative movements in government securities. Bourse movements in Berlin and Vienna have indicated a return of buyers into the market, while in other great speculative centres there is dullness without weakness. Mail trade advices, both from Great Britain and the Continent, indicate some further improvement

in business, supported by the returns of railroad earnings, though continued low prices are generally bewailed. The smaller governments are still industriously endeavoring to get their houses in order. For instance, the Argentine Republic proposes to take up the provincial debt and clear the way for a new state of things; but while the motive is much to be commended, it is feared that the load is too great to lift, at the present time at any rate. The government of New Zealand has decided to raise a large amount of money to aid farming interests, besides assisting the State banks. The Cape Colony, which has had a fortunate absence of notoriety in the last few years, is issuing a new loan. Revised government returns of the French wheat crop reduce the previous estimate by about 32,000,000 bushels and the total to the requirements for home consumption. It goes without saying that the banks across the Atlantic are gorged with idle money, that the directors prefer to keep in their vaults rather than in securities, which might reasonably be expected to make some return; such a policy can only be due to a belief that a demand for these funds may spring up at any time within a reasonably near future, or that their employment in the purchase of such high-class securities as the banks would be restricted to would raise prices so much that they could not realize again except at a considerable loss.

An Irrepressible Conflict.

SURELY, even those who object to any legal restriction being placed upon the freedom of the citizen to erect upon the highways whatever style of building pleaseth him most, will feel compelled to acknowledge that the unrestrained independence he believes in has deprived the city of some of the advantages of an unusual architectural opportunity which presented itself recently at the northwest corner of Broadway and Murray street. On that site, it will be recalled, now stand, side by side, in unusual prominence, two most important additions to the rapidly increasing list of New York's "sky-scrapers"—the Home Life Insurance Company's building and the headquarters of the Postal Telegraph Company. Were these edifices less in evidence, or were the greater part of them hidden by their own altitude, as the upper stories of so many of our lofty buildings are in the canyon-like streets down-town, the lost opportunity we speak of would be less regrettable; but those two structures possess the rare distinction of facing a prospect ample enough to render their great height a positive architectural advantage.

It never happened before, since the beginning of the very high building era, that two wealthy corporations decided to construct on contiguous plots, at practically the same moment, edifices of similar type and of about the same altitude. The Broadway frontage taken for the buildings is 125 feet, and the mere possibility of dealing with a fourteen or fifteen-story structure of such exceptional horizontal dimensions stirs the architectural imagination, cramped somewhat as it is by the restrictions of the bean-stalk problem of piling masonry to the height of 150 feet upon one, or, at most two, city lots. To cast away a chance like that we speak of has, for the artistically minded, something of the character of vice. Sad to say, however, the sin was flagrantly and even obtrusively committed. Instead of a happy opportunity seized upon in the interest of art, we have an example of riotous freedom. And when we have such abundant evidence all over the city of our rampant individualism in architecture, surely in this case one is permitted to demand a slight concession to art without being chargeable with requiring too much on behalf of "general considerations." Slight the concession need have been to insure a very gratifying architectural result. The fact that two companies were concerned in the enterprise, and that each corporation desired to employ an architect of its own choosing, were not insurmountable obstacles to concerted action; or if concerted action be too much to require, surely, without entailing any real sacrifice, joint effort might have been made to procure two designs harmonizing one with the other. But no finicking concession to artistic effect marks the actual outcome of these corporate enterprises. The two buildings war violently with one another, and the pity is, the strife is one time can not mitigate. The two designs are antagonistic not in spirit only, but even the materials selected in each case were chosen apparently upon the principle of opposition. One would say, were not the idea unwarranted, that the architects of the two buildings were bitter rivals and desired to declare publicly, by their works, that positively no connection existed with the "shop next door."

So loud is the antagonism between the buildings that even the uninitiated view them comparatively. Probably no other two edifices in the city have been subjected to so much popular comparison. We have no intention to join in the process here. If we speak of differences, it is only to emphasize the unfortunate discord between the designs.

The architectural merits of the two structures are as dissimilar as are their respective defects. The emphatic character of the Home Life building is daintiness, which, in the treatment of the

The Ill-Mated Couple.

lower stories, verges upon a feminine prettiness. Its neighbor is markedly vigorous. Its vigor is carried in certain details to the defect of brutality. This difference is, perhaps, emphasized by a degree of similarity in the way the openings have been disposed of in the two buildings. In each alike, the windows are grouped in a central division, flanked by solidier pier-like divisions. In the Postal Telegraph building these divisions are strongly marked by projection, whereas in the Home Life the partition is effected merely by superficial accentuation. Indeed, here we touch upon the essential distinction between the two designs. In the case of the former edifice the design is structural. It is built. In the case of the latter it is, excepting one or two parts, largely a matter of applique. For example, compare the treatment of the four lower stories of the two buildings. In the Postal building the "architecture" is clearly constructed. In the Home Life we have a quantity of applied carving, tasteful in quality, it is true, but forming no more an organic part of the edifice than so much sgraffitto. We hasten to add that this criticism is not applicable, at least in so great a degree, to the crowning stories of the building, which, in our judgment, form one of the most picturesque bits of architecture in the city. One hesitates before qualifying a seventeen-story "sky-scraper" as festal; but certainly the Home Life building has a certain *riche* air that contradicts the grim commercialism of the actuary. On the other hand, the obstreperousness of commerce fairly protrudes from the Postal building. It offers no escape to the peaceable passer-by. If one may say so, the design is written with a "commercial fist." This is the defect of the work. It fails upon the side of its virtues. But far more than is the case with its neighbor, is it an effort at architectural expression through construction. Its defects are gross; whereas, of the architects of the Home Life building we may say as Johnson said of Steele, "They have practiced only the lightervices."

The contrariety of the two designs, however, is the most deplorable fault of both. Either would be better were the other away. The artistic obtuseness which the conflict bears witness to testifies to the strength of the Philistine in the land.

J. C.

ONE feature of Director of the Mint Preston's estimate of the gold production of the world in the current year has received scanty attention, and that is the prospect it throws out of a change in the relative positions of the gold producing countries. Last year the United States was at the head of the list, with Australasia—which can hardly be reckoned as one country, being made up of so many islands in the Southern Pacific, several of which are important—a close second, and South Africa third with an output valued at about \$6,500,000 less than that of the United States. In his estimate for 1894 Mr. Preston gives the United States a total production of \$42,000,000, an increase of about \$6,000,000 compared with last year; Australasia one of \$38,000,000, an increase of about \$2,250,000, and South Africa one of \$10,000,000, a gain of nearly \$11,750,000 over 1893. The gain for these and other countries all put together Mr. Preston estimates at \$20,500,000, so that if these figures prove to be correct, as they very probably will, South Africa will have a larger increase than all the other gold producing countries. Given, too, a maintenance of the increase at anything like the same ratio, South Africa will lead the list of gold producing countries in 1895. As far as the United States is concerned, so long as its gold production continues as substantial as it is, South Africa's probable supremacy in this respect concerns it only indirectly. But as in enumerating the many blessings which Providence has vouchsafed to this country, that of possessing the largest present and latent treasure in gold has been a source of considerable pride to its citizens, the great probability of a change is worthy of mention. What the influence of this exposing of immense wealth will have on South Africa is a much more interesting question. The United States is to-day the only large producer of the precious metals which can in any sense be called prosperous, and this is not due to the amount of gold and silver it produces. Its prosperity is founded upon its agricultural and not its mineral resources. Mexico has for centuries produced silver in large and gold in some quantity, but she would not be taken as a type of national affluence. Where mineral wealth is the main

resource, so much has to be spent for consumptive necessities that the nation cannot grow rich. Much is said of the arable and pastoral advantages of great territories in South Africa, but there is no proof that these are great enough, or available enough, to build a great nation upon. Americans can regard their own position with more complacency, and no doubt will, because they have within the limits of their own land the three great sources of national wealth, which, stated in the order of their importance, are agriculture, manufactures and mining.

Shall We Have Municipal Rapid Transit?

THE COMMISSION STATES THE QUESTION, WHICH IS NOW BEFORE THE PEOPLE.

The Rapid Transit Commissioners, at their meeting on Tuesday departed somewhat from their prearranged programme. It had been intended that the provisional report of Chief Engineer Wm. Barclay Parsons would be officially communicated to the board and made public, but this was deferred for a week in order to allow of other and more timely matter.

Some of the newspapers and many individuals have been urging the Commissioners to inaugurate a vigorous propaganda in favor of municipal ownership and construction of a rapid transit railroad system, thinking, apparently, that the Commission is charged under the law with that duty. This impression is, however, a mistaken one. The duty of the Commission under the law begins and ends, so far as the referendum is concerned, with preparing for submission to the people the question: "Shall the City build and own a rapid transit railway." This it has already done, by formulating and adopting the necessary resolutions and by calling upon the Police Commission to prepare official ballots for the submission of the question to the electors at the forthcoming election, now only thirty-one days distant.

But as a partial compliance with the public demand, the Commissioners felt that they ought to state the case in plain terms, so that the voters might know what they were to vote upon and what the position of the Commission was with respect to the objections that have been made both against the constitutionality of the act and the feasibility of the scheme that seems to be most generally approved—that for an underground electric system. They, therefore, called upon Messrs. Henry R. Beekman and A. B. Boardman, counsel to the board, for a report upon the provisions of the act relating to the referendum, its constitutionality and the financial ability of the city to "stand the racket," and upon Mr. Wm. Barclay Parsons, Chief Engineer to the board, for a report upon the engineering possibilities of the scheme which thus far stands as the determined plan of construction.

Counsel to the board, in their report said:

"The Rapid Transit act, in the broadest statement of its scheme, contemplates primarily the construction at the expense of the city, of rapid transit railways to be owned by the city, but which must for a long term of years at least, be operated by lessees paying to the city an annual rental therefor, and who are to furnish the rolling stock and otherwise to equip the road at their own expense. The power to authorize this, however, rests with the people, for the statute demands that before this great public work shall be undertaken it shall first receive the sanction of the voters of the city at the polls.

"Until this sanction shall have been obtained the Rapid Transit Commissioners are prohibited from doing more than to adopt routes, plans and specifications for the proposed road, and to secure the consents, required by the constitution, of the local authorities and of one-half of the property-owners on the line of the proposed route, or of Supreme Court Commissioners if the latter refuse. If the vote of the people is adverse to municipal construction then your Board is restricted to the sale of the franchise to construct and operate the road to the highest bidder, and the franchise thus passes under private ownership and control.

"The effect then of a vote against municipal construction would be to practically nullify the greater part of the rapid transit legislation of last winter, and to subject the present Board of Rapid Transit Commissioners to the same narrow restrictions which defeated the earlier efforts of the former Board.

"Should the vote be a favorable one the Legislature has wisely conferred upon the Board the most ample power to change and modify the routes, plans and specifications already adopted, or to adopt other or different routes, plans and specifications before proceeding with the work of construction. The reason for this is apparent. In creating a franchise for the construction and operation of a road which must be sold to private parties, the Commissioners must offer inducements to capitalists to purchase, by so framing the plan of the road as to make it yield an immediate and ample return upon the investment.

"The vote of the public is, therefore, not confined to a simple approval of municipal construction according to the routes and plans already adopted, but covers as well the construction, at the public expense, of any rapid transit railway which may be afterward approved by the Board and consented to by the local authorities and others whose consent is demanded by the Constitution. And, indeed, the formal resolutions of your Board disclose that it has already undertaken to obtain such data as will enable it to locate a new route on the east side of the city, north of 42d street, should the popular vote sanction the principle of municipal construction."

Should the vote of the people be favorable to municipal construction it will become the duty of the Commission, under the law, to immediately prepare the plans and advertise for proposals for the construction of a road, the successful bidder to equip the road and

have the privilege of operating it for not less than thirty-five or more than fifty years. This he is to do at his (or, since it must be a corporation, at its) own expense, and pay as annual rental to the city a percentage of the cost of construction sufficient at least to pay the interest on the bonds issued by the city to pay for the construction of the road and to provide a sinking fund for the ultimate liquidation of the debt so incurred. The successful bidder must furnish security for the prompt and faithful performance of his contract. As to the constitutional objections that have been raised by interested parties, the report of counsel says:

"We beg to state that in response to your request we have also examined the various constitutional objections which have been suggested to the Rapid Transit act, mostly proceeding from interested sources. We are decidedly of the opinion that they are untenable, and that the act is clearly constitutional as a whole and in all its parts.

"The question as to what effect the issue of the large amount of bonds necessary to provide for the construction of the road will have upon the credit of the city has been elsewhere discussed at great length. It is to be borne in mind, however, that the necessary result of an adequate provision for rapid transit in this city will be to add enormously to the values of real estate in the city. Under the constitutional provision which prohibits the city from incurring indebtedness in excess of 10 per cent of the assessed valuation of its real estate, there is now a margin for further indebtedness of some \$57,000,000.

"Notwithstanding the lavish issue of bonds for years past for large and extensive public improvements, this margin has been expanding instead of decreasing, a result naturally following the increased valuation of real estate flowing from these improvements, as well as the enormous annual revenues which go into the sinking fund, and which are applied in diminution of the city's debt.

"Although between the years 1887 and 1892, both inclusive, nearly \$66,000,000 of city bonds were issued, we find that the net debt of the city for the period had increased only some \$10,000,000, and that the margin for further indebtedness under the constitutional limitation, instead of diminishing, was some \$15,000,000 greater in 1892 than it was in 1887. It would seem, therefore, that there need be no apprehension that the issue of bonds for rapid transit will interfere with the issue of city bonds for other needed improvements."

The report of Chief Engineer Parsons deals with the structural and practical problems involved in the scheme which the Commissioner has to work out, and is given herewith in full:

"A rapid transit railroad in the city of New York, in order to meet the existing and future wants of the city, and to possess the elements of financial success, must fulfill the following conditions:

"It must be a line substantially constructed, capable of carrying heavy trains, with the means of running fast express trains, as well as local trains making conveniently frequent stops. The railway must extend from the Battery to the northerly limits of the city, on both sides of the city, and must be located close to the main lines of travel.

"Without expressing an opinion at this time on the merits of different systems, I may say:—That an underground railway, if ultimately determined upon by the Commission, can be safely constructed, without endangering abutting buildings, and that the cost can be determined in advance within reasonably narrow limits.

"That such a railway can be economically operated by electricity, which power will move the trains as fast as can be done by a steam locomotive.

"That an underground railway so operated will have a perfectly satisfactory atmosphere.

"An underground railway, as suggested above, would not be like any railway tunnel in operation in this country. The atmosphere would be pure and clear, being entirely free from smoke, and the structure, by being designed, especially as to the stations, with architectural skill, and being always well lighted, would be attractive in appearance.

"During the last summer, under your instructions, I have examined, in addition to over forty miles of underground railway in operation, the construction of sixteen miles of such railways under some of the busiest streets of London, Glasgow and Paris, besides two large tunnels, one beneath the Thames, and the other beneath the Clyde, the building of which is being done rapidly, securely and without serious delay to street travel.

"The successful operation by electricity of the City and South London, the Liverpool Overhead and the Chicago Intramural railways, shows that electrical traction has long since passed the experimental stage for service of this sort, and that this is not merely an opinion is further shown by the fact that the Baltimore and Ohio Railroad is now building an electrical power house and has ordered the construction of electrical locomotives weighing ninety-five tons each, which are to haul at regular service speed its large trains, both passenger and freight, through the tunnel recently completed under the city of Baltimore; and the further fact that the Metropolitan West Side Railroad, in Chicago, will commence to operate its elevated railway by the same power in January next.

"To show how closely the cost of construction can be foretold the preliminary estimates for the building of the Glasgow Central railway were £1,005,000, while the actual contracts amounted to £1,020,000, a variation of less than one and a-half per cent.

"The Commission has already given instructions in regard to establishing an east side route. No system of rapid transit would be complete which does not provide adequate facilities for this district, both above and below the Harlem River. At the present moment, since Madison avenue is debarred by statute, I am engaged in the study of this problem, and will shortly lay before your Board a full

plan which will give to the residents of the east side as complete accommodation as the plans already adopted provide for those on the west side."

Having thus in effect stated the whole case as it now exists before the people the Commissioners feel that they have gone as far in their official capacity as the law and the circumstances will justify them. The matter now rests with the voters of this city. Mr. Parsons' provisional report on the results of his inquiries made in Europe, with several illustrations, will be presented to the board next week.

Making Headway Against the Boycott.

THE LUMPERS HAVE PERFECTED AND INCREASED THEIR LEAGUE ORGANIZATION, AND ARE WORKING TOGETHER FOR MUTUAL PROTECTION.

The building contractors who have been boycotted by the Board of Delegates of the Building Trades express themselves as quite well satisfied with the results of this week's continued opposition to the boycott. A few builders have been forced into temporary compliance with the terms of the Walking Delegates, but in most instances the compliance is more apparent than real, and is resorted to only as a temporary relief from pressing annoyances. On the other hand all those who are standing out against the boycott have more and better men at work this week than last, and are fully able now to get along without the assistance of the Board of Delegates or the trades' unions.

Some of the master builders who were disposed to resent the impositions of the Board of Delegates have found it difficult to induce the lumpers, their sub-contractors, to go on with their work where it has been interdicted by the Walking Delegates, and the matter was made the subject of special action at the last meeting of the League. This was held on Wednesday evening in the Central Opera House hall, in 67th street, near 3d avenue. There were about a hundred present, many of them new faces, and thirty-eight of them stepped up to the Secretary's desk and signed the roll of membership, which now shows the names of 103 firms and individuals engaged as contracting specialists in the building trades. President John P. Leo was in the chair. A great deal of purely routine business was transacted, all of which was directed towards promoting co-operation among the members in defense of their mutual interests and towards increasing the efficiency of their organization.

Among other things, it was resolved to hold meetings every Wednesday night until the first of January and for that purpose a hall in Central Opera House has been leased. The object is to give members and their friends an opportunity to meet frequently for the exchange of views and for co-operative action in all matters of interest to the League. Again, to meet the difficulty above mentioned, that of sub-contractors failing or refusing to go on with their contracts on boycotted buildings, the League resolved to employ legal counsel, and on the application of any master builder to notify the lumper that if he did not so proceed with his work the builder would himself proceed with it, employing such help as he could obtain and would charge the cost up to the lumper. This resolution was received with many demonstrations of approval.

The Secretary's office has been established at room 522 in the United Charities Building, No. 287 4th avenue. Here it is proposed to maintain a Labor Exchange for the benefit of the members of the League and the men employed by them. Whenever, for example, a master carpenter has finished with a gang of men he will send them down to the Labor Exchange, where their names and addresses will be recorded and where other employers will file their applications for men. If there are applications on file the men will be sent to fill them without loss of time. Thus the employers and the men will co-operate for their mutual benefit. A superintendent has been engaged, and he will be in attendance at the Secretary's office at all times.

On the Walker & Lawson houses, on Riverside Drive, where the carpenters were ordered out a week ago yesterday, as told in last week's *RECORD AND GUIDE*, Paul B. Pugh, the lumping carpenter, reports that he is at work with all the hands he can find work for, and has been obliged to refuse work to about seventy-five other applicants. As they threatened last week, the Walking Delegates called out all the other trades, and the other work is at a standstill, but Mr. Pugh reports that they will start up soon. The boycott has not yet broken the lumping system, and, from present indications, is as far from the achievement of its object as ever it was.

Real Estate Market.

The brokers have done fairly well this week, but the business of the first six days of October can hardly be said to have realized the promise held forth of increased activity after the passing of September. If the aggregate of the sales reported since Monday can be relied upon as an indication of what the future has in store for the market during the remainder of the year, it must be admitted that there is little ground for encouragement. There are, however, two plausible excuses for the dullness that has prevailed, neither of which should be overlooked. The Hebrew holidays on Monday and Tuesday caused the temporary suspension from active participation in the selling and buying of real estate of an important element—operators and investors of the Jewish faith. It follows that their transactions, at all times a material feature of the market, have necessarily been curtailed. The other possible reason is that the conveyances have been unusually numerous, and as it happens not infrequently with many exchanges of property and some sales as well, that brokers do not receive commissions until purchases are consummated, many of them may have been busier harvesting previous earnings than attending to unknown fields, the

yield from which would be but slightly deferred through a day or two of neglect.

The auction market has continued in its own peculiarly lifeless way and any indications of improvement have yet to be observed. The sales were confined to Wednesday and Thursday, and included two foreclosures which realized \$48,150, out of a total of \$88,700. There were four offerings other than those by orders of court, and two of the parces secured buyers. Richard V. Harnett & Co.'s sale of No. 10 West 87th street, at the Real Estate Exchange on Thursday, proved a disappointment. It met the usual fate of West Side dwellings sold under the hammer in being knocked down for less than its actual value. The buyer secured a bargain at the price, \$29,000. On the same day S. De Walltearss offered on the Exchange No. 192 Bleecker street. It was bought in on a bid of \$20,500. At the Broadway Salesroom on Thursday Peter F. Meyer & Co. offered for account of Henry Morgenthau two lots on the southwest corner of Amsterdam avenue and 180th street. They were bought in at \$9,400 and \$7,450 respectively. The sale is said to have been ordered for the purpose of establishing a low value in order to affect the price of 100x40 feet, part of a plot on the opposite or northerly side of 180th street, which is to be taken for the opening of the street. The less paid for the lots the lower would be the assessments on the lots benefited, nearly all of which were disposed of at the Morgenthau syndicate sale in June, 1891, with an agreement that the sellers would pay the assessments for the opening of 180th street. Two parcels were withdrawn from sale during the week by William Kennelly, property on Edgecombe and Bradhurst avenues, south of 155th street, which will be readvertised, and a number of lots on Kingsbridge road, north of 184th street.

The following are the comparative tables for New York Conveyances, Mortgages and Projected Buildings for the corresponding weeks of 1893 and 1894.

There was a quorum present at the regular monthly meeting of the Board of Directors of the Real Estate Exchange on Tuesday for the first time in several months. Edward J. Willing, E. De Forest Shelton and Jacob King were elected stock members and Edmund H. Martine and Waldron Williams annual members. The Board appointed Benjamin Richards, Thomas S. Walker and J. Edgar Leary a committee to select candidates to be voted for at the next annual election.

On Thursday next, October 11, at the Real Estate Exchange Auction Room, Nos. 59-65 Liberty street, Richard V. Harnett & Co. will sell, by order of the executor of the estate of Ann Martin, deceased, the three three-story and basement brick dwellings and lots, 21x40x irregular, Nos. 165, 167 and 169 West 4th street, near 6th avenue.

Gossip of the Week.

SOUTH OF 59TH STREET.

A report is current that a sale is on the eve of consummation of the Downing building, the fourteen-story office and mercantile structure erected last year on Fulton and Dutch streets by John Pettit. The buyer is said to be a Chicago capitalist and the negotiations about to close are believed to be responsible for the presence in the city this week of Architect D. H. Burnham, of Chicago.

We learn that F. Southack has sold for L. Sachs & Bro. to a building firm for immediate improvement the plot, 71x76, with old buildings, on the southwest corner of Spring and Mercer streets, the sale of which, by Hoffman Bros. for the Watkins estate, was referred to last week. The Messrs. Sachs bought the property for \$128,000 and have resold it for \$145,000, giving them a profit of \$17,000 realized within ten days. Boehm & Coon are said to be the buyers.

James Bilger has sold for Charles Strauss, as assignee of James G. Prague, the vacant plot Nos. 122 and 124 East 34th street, 50x98.9, south side, 100 feet west of Lexington avenue, and the plot, 90x98.9, adjoining in the rear, on the north side of 33d street, beginning the same distance west of Lexington avenue, to Albert H. Bultman for \$108,000.

The four-story stone front dwelling, No. 36 West 34th street, lot 25x98.9, has been sold for the estate of the late Dr. Charles Herzog for a little over \$100,000, but not to Austen G. Fox, as reported in

two of the daily papers yesterday. Richard V. Harnett & Co., it is said, negotiated the sale, but an inquiry at their office failed to elicit any definite information regarding it.

Sire Bros., or John G. Norris, who frequently takes title to property purchased and owned by them, have traded Nos. 210 to 214 West 4th street, a seven-story apartment house, occupying the block front between Christopher and Grove streets, for mining property in Loudin County, Va., owned by W. Frederick Snyder, a bank president of Philadelphia. The dimensions of the land are 65.2 on 4th street, 64.3 on Christopher, 79.6 on Grove street and 75 in the rear. The price at which the city property figures in the exchange is \$190,000, and the value of the Virginia mines ss said to be about \$75,000. The difference in the value of the properties is represented by existing mortgages on the apartment houses.

George A. Bowman has sold for Charles Meyer the four-story flat, No. 416 West 28th street.

Albert Stake & Co. have sold for Oscar Lindemann, No. 522 West 50th street, a five-story brick tenement on lot 25x100.5, to S. Horowitz, of Brooklyn, for about \$26,000, the latter giving in payment a house on Fulton street, Brooklyn, valued at \$10,000.

The plot 71.8x88 and 87.6 with one four-story and two three-story old brick and frame buildings, Nos. 20 to 24 North Moore street, has been sold by Mrs. Martha V. Woodhull to D. S. Walton, for \$70,000.

Mills, Whitehouse & Hall have sold for Mrs. Emma L. Charlick her four-story residence, 14x60x100.5, No. 146 East 37th street, for \$18,325. The house was purchased by the seller in January, 1893, for \$20,000.

M. E. Hewitt & Co. have sold, for Mary Lelong, the four-story stone front dwelling, No. 153 West 48th street, 20x55x97, to William E. Gladstone for \$25,000.

NORTH OF 59TH STREET.

Berry & Glen have negotiated an exchange between Charles Perrett and ex-Mayor Alfred C. Chapin, of Brooklyn, by which the latter purchases "The Plymouth," a five-story brick apartment house, at No. 142 East 83d street, lot 36x102.2, for \$60,000, giving in consideration a plot of lots on 8th avenue, Brooklyn, valued at \$35,000.

Isaac T. Meyer has sold for Charles Strauss, as assignee of James G. Pragne, No. 179 West 88th street, a three-story limestone front dwelling, on lot 16.8x100.8, to Julia A. Fox for \$18,000.

John R. Foley has sold for John Pettit, Nos. 128 to 140 West 126th street, seven three-story stone front dwellings, 18.9x50x99.11 each, to Mandelbaum & Lewine for about \$108,000, or \$15,500 for each house. This sale has been made as reported, but it was impossible to obtain any verification of it yesterday from broker or principals.

Oscar C. Selbach has sold for A. A. Payne to Mrs. C. E. Stewart the northwest corner of 7th avenue and 138th street, one of the King model houses, for \$18,000.

Frank L. Fisher has sold for Builder John C. Umberfield the four-story stone front dwelling, 23x60x102.2, No. 9 West 75th street, to C. Armstrong, for \$58,000. This is the first sold of a row of five new houses recently completed.

Stabler & Smith have sold for Charles Strauss the three-story dwelling, No. 137 West 95th street, 18x56x100.11, to Wm. Schrader for \$20,000.

Stabler & Smith, conjointly with E. A. Cruikshank & Co., have sold for the trustees of the Genin estate to a Mrs. Goodwin the three-story dwelling, 20x50x100.8, No. 55 West 92d street, for about \$16,500.

The plot, 50x100.11, on the north side of 99th street, 225 feet east of Columbus avenue, is reported sold through Broker L. J. Adams, for \$18,000.

Henry and Edward Hirsh have bought of Henry Merz a plot of four lots on the south side of 89th street, 101 feet east of Riverside Drive.

The three-story brick dwelling, on lot 16.8x102.2, No. 322 West 85th street, is reported sold by Carrie S. Smith to a Mr. Forbes for \$21,000. The last conveyance of this property was in December for a consideration of \$23,000.

Peter F. Callahan has sold for William H. Hall the five-story double flat, 25x77x100.11, No. 63 West 102d street, and the similar flat, 25x87x100.11, No. 78 West 103d street, to a lady for investment at \$51,500. These flats adjoin on either street the two reported sold last week, and complete the sale of eight recently finished buildings, four on each street.

L. J. Phillips & Co. have sold for Francis Crawford the new four-story dwelling, No. 59 West 89th street, lot 21x100.8, to Abraham Boehm for his own occupancy.

J. W. & A. A. Teets have sold No. 346 West 121st street, a three-story stone front dwelling, 15x56x100.11, to Edward S. Simon for about \$16,000.

NORTH SIDE.

Kaeppel & Brooker have sold for Dr. C. V. Becker a house and lot, 25x120, on the north side of Oakland place, near Clinton avenue, to Sophia Schmidt for \$4,500, and for Herbert Eggleston a recently-purchased property on the north side of Elsemere place, 275 feet west of Marmion avenue, to James Wylie.

J. Clarence Davies has traded for John A. Knox the three two-story and basement brick dwellings on the south side of 156th street, 100 feet west of Westchester avenue, to Danzig & Kutz at \$6,500 each, the latter giving in part payment three lots, 25x100 each, on the east side of Union avenue, 100 feet north of Dawson street, at \$1,900 each.

John De Hart has sold to Larsen & Sakariassen, the lot on the east side of Crotona avenue, 48 feet north of Oakland place, for \$1,400. The plot will be improved by the erection of a three-story frame flat, 20x50.

WESTCHESTER COUNTY.

W. H. Hoyt & Co. have sold for Mrs. Laura B. Field her country place at Hastings-on-the-Hudson, consisting of eight acres with stone mansion and outbuildings, to William F. Foster, of this city, for \$45,000. Mr. Foster has also purchased eleven acres adjoining the former property on the north for about \$10,000, and is said to contemplate the erection of a costly residence. The same firm has sold a plot of about seven acres, part of the Minton estate at Hastings, to W. W. Tompkins for about \$20,000.

Lewis H. Wiggins has bought of Miss Julia A. Sanger the lot, 25x100, No. 120 Warburton avenue, Yonkers, for \$2,500. W. W. Robinson has purchased of Mrs. Purser the lot No. 18 Pier street, same city, for \$1,100. Both purchasers will erect residences.

The tables of figures published weekly showing that mortgages are being placed in increasing numbers at very low rates of interest are supplemented by the announcements of prominent mortgage brokers that they have large amounts to loan at very low rates. Mr. Eugene L. Clarkson, of No. 60 Broadway, has a large amount to loan on first-class New York City property at 4 per cent interest.

Trade Notes.

Robert G. Kenny, for years with Builder Richard Deeves as mason superintendent, has started in business on his own account as mason, builder and general contractor. Some of the most modern structures Mr. Kenny was engaged on are the Briery school, Fulton building, Metropolitan Realty building and Manhattan Life building. Mr. Kenny's office is at No. 1300 Broadway, corner of 31th street.

DISSOLUTION OF PARTNERSHIP.

The firm of Merry & Clark, importers of tin plate, has been dissolved. Mr. George E. Merry will carry on the business at the old stand, No. 535 West 15th street, under the firm-name of Merry & Co., and will continue to import the well-known brand of Merry's old method tin plates.

The Towle Vault Light Co., recently incorporated, have secured convenient and commodious quarters at Nos. 167 and 169 Ehn street, near Grand, for the manufacture of vault lights, skylights and patent light work of every description. The manager, Mr. Frank E. Towle, is an expert worker in this line, having had twenty-five years experience with leading firms of iron workers in New York and Brooklyn, to whom he can refer. The new company will turn out large and small work in a first-class manner and they intend to be in the front rank, with the best of facilities and expert workers and superintendence. Further particulars and estimates will be furnished on application. It should be added that the Towle Co. are filling orders for work on several public schools.
